

LTCH Data Submission Specifications Errata Version 4.10.1 for Final Data Specifications V4.10.0

Errata History

Date	Changes Made
03/10/2026	Issues 01 and 02 were added.

Issue(s) Added:

Issue ID	Problem	Resolution	Status
01	Edit -3745 was inadvertently omitted from the data specifications, while still being active in iQIES. It has been restored to the data specifications...but must be replaced, since it referenced deleted item A0800 (Gender).	Edit -3745 will be deleted and replaced with edit -4048. The new edit will read exactly as edit -3745 did, except that it will reference A0810 (Sex) instead of A0800 (Gender).	This change will be made in the next version of the LTCH Data Submission Specs. It will be implemented in production for the upcoming iQIES release on 10/01/2026.
02	Since the dash [-] will be allowed as a valid value for the D0150 frequency items, these items must now be mapped to the APU warning edit (-3900).	The following items will now be mapped to the APU warning edit -3900: D0150A2, D0150B2, D0150C2, D0150D2, D0150E2, D0150F2, D0150G2, D0150H2, D0150I2.	This change will be made in the next version of the LTCH Data Submission Specs. It will be implemented in production for the upcoming iQIES release on 10/01/2026.
