Source: Medicaid Analytic Extract (MAX), 2005. This table is based on information contained in Tables 2, ND.2, D.2, ND.8, and D.8 in the Statistical Compendium Volume, United States (hereafter “the Compendium”).

<sup>a</sup>Medicaid beneficiaries featured in this chartbook include those who had fee-for-service (FFS) Medicaid pharmacy benefit coverage for at least one month during calendar year 2005. Beneficiaries who were in capitated managed care arrangements for the entire year are excluded. For more details on how we determined the study population, see Table 1 of the Compendium.

<sup>b</sup>Dual eligibles are beneficiaries who had Medicare as well as Medicaid FFS pharmacy benefit coverage for at least one month during their Medicaid enrollment in 2005. Nondual beneficiaries include beneficiaries who were never dually eligible or were dually eligible but never had Medicaid FFS pharmacy benefit coverage. Refer to Table 1 in the Compendium for more information about how we determined dual eligibility status.

<sup>c</sup>This group includes beneficiaries who resided in nursing facilities throughout their Medicaid enrollment in 2005. Refer to Table 1 in the Compendium for more information about how we determined all-year nursing facility residency.

<sup>d</sup>Medicaid basis of eligibility is classified as: aged, disabled, adults, and children. The disabled group includes beneficiaries of any age who were determined to be eligible because of disability or blindness. The children's group includes children receiving foster care and adoptive services.

<sup>e</sup>The percentage represents all ages below 65.
