Agenda

Reports Page - A review of the following Reports:

- ❖ National Coverage What's New Report
- ❖ National Coverage Annual Report
- ❖ Local Coverage What's New Report
- ❖ LCDs and Articles Status Report
- ❖ Proposed/Draft LCD Status Report
- ❖ Article Status Report
- ❖ Self Administered Drugs (SAD) Exclusion List

Database Downloads Page - A review the Downloads Features

- ❖ Current LCDs/Articles
- ❖ Current and Retired LCDs/Articles
- ❖ NCDs

Reports Page

The Reports Page is divided between National Coverage and Local Coverage Reports.

- National Coverage includes 2 Reports.
- Local Coverage includes 6 Reports.

The screenshot shows the Medicare Reports Page interface. At the top is a navigation bar with buttons for OVERVIEW, ADVANCED SEARCH, INDEXES, REPORTS (highlighted in orange), DOWNLOADS, and BASKET (0). To the right of the buttons is a link for Contextual Help. Below the navigation bar is a section titled 'Reports' with a brief description: 'Reports provide users with reports of National and Local Coverage data. You may begin by selecting National Coverage or Local Coverage and selecting the name of the report you would like to see. Use the [Advanced Search](#) feature if you are looking for a particular National or Local Coverage item.' Below this is a link to 'Expand All | Collapse All'. The main content area is divided into two sections: 'National Coverage' (with a '[2 Reports]' count) and 'Local Coverage' (with a '[6 Reports]' count). The 'National Coverage' section contains two reports: 'National Coverage What's New Report' and 'National Coverage Annual Report'. The 'Local Coverage' section contains six reports: 'Local Coverage What's New Report', 'Local Coverage Determinations (LCDs) Status Report', 'Proposed/Draft Local Coverage Determinations (LCDs) Status Report', 'Local Coverage Determinations (LCDs) Last Updated Report', 'Articles Status Report', and 'Self-Administered Drug (SAD) Exclusion List Report'. Each report entry includes a title, a brief description, and a link to view the report.

Reports

Reports provide users with reports of National and Local Coverage data. You may begin by selecting National Coverage or Local Coverage and selecting the name of the report you would like to see. Use the [Advanced Search](#) feature if you are looking for a particular National or Local Coverage item.

[Expand All](#) | [Collapse All](#)

National Coverage [2 Reports]

National Coverage What's New Report
Use this report to view a list of National Coverage Analyses (NCAs), Coding Analyses for Labs (CALs), Medicare Evidence Development & Coverage Advisory Committee (MEDCAC) Meetings, Technology Assessments (TAs), National Coverage Determinations (NCDs), and Medicare Coverage Documents postings for the specified timeframe.

National Coverage Annual Report
Use this report to view a list of National Coverage Determinations (NCDs), National Coverage Analyses (NCAs), and Coverage Analyses for Labs (CALs) by year.

Local Coverage [6 Reports]

Local Coverage What's New Report
This report provides the user with all Local Coverage Documents (LCDs) and Articles that were updated in the most recent Medicare Coverage Database (MCD) weekly update. The update is completed on Thursdays, unless otherwise scheduled and includes changes in LCDs and Articles that were completed by the previous Sunday...[more](#)

Local Coverage Determinations (LCDs) Status Report
This report provides the user with LCD activity and inventory for specific time periods. Users can quickly determine which LCDs were approved, revised, or retired in a given time period...[more](#)

Proposed/Draft Local Coverage Determinations (LCDs) Status Report
This report provides a quick and easy method for determining the most recent "status" for individual Proposed LCDs. The report may be queried by specific MACs or contract types (Ex: All DME MACs) and the query results page lists the Proposed/Draft LCDs and their status...[more](#)

Local Coverage Determinations (LCDs) Last Updated Report
This report provides users with the ability to determine when an LCD was last updated and the reason for the update. It is of particular assistance with identifying LCDs that were affected by the quarterly and annual CPT/HCPCS and ICD-10-CM Diagnosis code updates...[more](#)

Articles Status Report
This report provides the user with Article activity and inventory for specific time periods. Users can quickly determine which Articles were approved, revised, or retired in a given time period...[more](#)

Self-Administered Drug (SAD) Exclusion List Report
This report provides user with a list of drugs that are excluded from Medicare because they are deemed "self-administered". Users select a time period, a specific MAC or a Contract Type (Ex: MAC - Part A), and either a specific code or all codes...[more](#)

National Coverage Reports

This Section is comprised of two reports:

- ❖ The National Coverage What's New Report: Specific National Coverage Document Types may be selected by specific time frames to determine what, if any, changes or updates have been completed to them; and,
- ❖ The National Coverage Annual Report: Three specific National Coverage Document Types may be selected by year to determine what, if any, changes or updates were completed within the specified year.

 **National Coverage** [2 Reports]

National Coverage What's New Report
Use this report to view a list of National Coverage Analyses (NCAs), Coding Analyses for Labs (CALs), Medicare Evidence Development & Coverage Advisory Committee (MEDCAC) Meetings, Technology Assessments (TAs), National Coverage Determinations (NCDs), and Medicare Coverage Documents postings for the specified timeframe.

National Coverage Annual Report
Use this report to view a list of National Coverage Determinations (NCDs), National Coverage Analyses (NCAs), and Coverage Analyses for Labs (CALs) by year.

National Coverage What's New

The What's New Report Browser allows you to run a report for a specific document type and time frame.

- ❖ The query is divided between selections for Document Types; and Timeframe selections.
- ❖ Document Types include NCDs, NCAs, CALs, MEDCAC, TAs, and MCDs.
- ❖ Timeframes include Last Week's Updates, 30 days, 60 days, or 90 days in the past.

National Coverage What's New Report Browser

Date and
Selection
Criteria

No NCDs updated during
the selected Timeframe.

The Report Results page does not display any results for NCDs updated during this time frame. However, the query did return results for 3 NCAs. They can be accessed by clicking on the NCA Title. They also can be added to your basket. The Results page also indicates the action taken on the document and the date if was updated.

National Coverage Annual Reports

The National Coverage Annual Report provides an annual update on 3 specific National Coverage Document Types: NCAs, NCDs, and CALs.

 National Coverage Annual Report Browser

An asterisk (*) indicates a required field.

***Select Document Type(s):**

***Select Year:**

[RESET SELECTION CRITERIA](#)

National Coverage Annual Report Criteria

In this example, the user is searching for all 3 documents types for 2012.

National Coverage Annual Report

Rectangular Snip

Use the browser below to select the Document Type and Year of the report you would like to see and select the **Submit** Button to return your results. After submitting your criteria, you may select the document title to view the details page for the specific record. You can also select items using their corresponding check boxes in the right column. After selecting the check boxes you can print the selected items or add them to your basket by selecting the **Print Selected** or **Add to Basket** Buttons.

The annual report is run based on the date the NCA/CAL was opened (tracking sheet posted) and/or on the date the NCA/CAL was closed (decision memo posted). For example, if an NCA/CAL was opened in 2011 and closed in 2012, it would appear on both the 2011 and 2012 reports. The NCD year references the NCD Transmittal Date.

National Coverage Annual Report Results

National Coverage Report Results display on one screen on the MCD. However, for this presentation four slides are used to demonstrate the findings.

Slide 1: The results include 19 Total Documents/Records. This first slide includes the 7 NCDs that were revised in 2012.

- ❖ To open one of the NCDs, click on the NCD Title.
- ❖ To add an NCD to the basket, check mark the **SELECT ALL** square at the end of the NCD Title and then click on the **Add to Basket** icon.

National Coverage Annual Report Results [19 Records]

Report Creation Date: 10/5/2016

Your Selection Criteria Were: Document Type(s): All
Year: 2012

**** Please Note:** The annual report is run based on the date the NCA/CAL was opened (tracking sheet posted) and/or on the date the NCA/CAL was closed (decision memo posted). For example, if an NCA/CAL was opened in 2011 and closed in 2012, it would appear on both the 2011 and 2012 reports. The NCD year refers to the NCD Transmittal Date.

Local Coverage What's New Report

- ❖ This report provides information on all Local Coverage Documents (LCDs) and Articles that were updated in the most recent Medicare Coverage Database (MCD) weekly update.
- ❖ The weekly refresh is completed the on Thursdays and includes updates in LCDs & Articles that were completed by the previous Sunday.
- ❖ The report can be filtered to include specific Medicare Administrative Contractors (MACs) or Contract Types (Ex: All A and B MACs) and a specific date selection from the “Select Database Update” list. The report is most helpful to determine which LCDs and/or Articles were updated or retired in a given time period.

Using the Local Coverage What's New

- ❖ In this example, the user wants to know what updates were made to NGS Contractor #06101 (Part A MAC) documents with a refresh date of 09/05/2016.
- ❖ Remember this includes updates/revisions that were made to LCDs and Articles from Monday 08/29/16 – 09/05/16. This data first displayed on the MCD on Thursday 09/08/16.

LCDs Status Report

- ❖ This report provides the user with LCD activity and inventory for specific time periods. Users can quickly determine which LCDs were approved, revised, or retired in a given time period.
- ❖ The Activity numbers provide the list of affected LCDs, and the LCD title is a link to the record. This report can be used as an alternative to the “What’s New Report” for LCDs to filter for a longer time frame. Rather than viewing changes weekly, this report can be used for a single month, a quarter, or a year.

Using the LCDs Status Report

- In this example, since the user bills for services in both Florida and Georgia, two contractors First Coast Service Options and Palmetto GBA have been chosen for the 03Q16 time period.

Proposed/Draft LCDs Status Report

- ❖ This report provides a quick and easy method for determining the most recent “status” for individual Proposed LCDs.
- ❖ A Report may be filtered by specific MACs or contract types (Ex: All DME MACs) and the results page lists the Proposed/Draft LCDs and their status.

Proposed/Draft Status Legend:

- D=Proposed/Draft under Development, not yet released for comment
- C=Proposed/Draft LCD released for comment
- E=Formal comment period has ended; comments now being considered
- F=Final new/revised LCD has been issued for notice
- A=Active policy, notice period complete and policy in effect

Using the Proposed/Draft LCDs Status Report

- ❖ In this example, the user wants information on the status of one or more Proposed LCDs from Noridian Healthcare Solutions, LLC (01111, A and B MAC).
- ❖ There is no date criteria associated with this report.

LCDs Last Updated Report

- ❖ This report provides users with the ability to determine when an LCD was last updated and the reason for the update.
- ❖ It is of particular assistance with identifying LCDs that were affected by the quarterly and annual CPT/HCPCS and ICD-10-CM Diagnosis code updates.
- ❖ Though Bill Type Code and Revenue Code updates are less frequent, it is also a good tool to identify these updates as well.
- ❖ It may be filtered by individual MAC or by Contract Types (Ex: A and B and HHH MACs) with a specific “Reason for Change” selected.
- ❖ The results may be sorted in myriad ways.
- ❖ The “Reason for Change” is listed in the 4th Column on the Results page.

Using the LCDs Last Updated Report

- ❖ This user is looking for LCDs updated by Cahaba and wants to look for all the “Reasons for Change”.
- ❖ The Select Contractor(s) by Name radio button is chosen and Cahaba Government Benefit Administrators is selected.

Articles Status Report

- ❖ This report provides user with Article activity and inventory for specific time periods.
- ❖ Users can quickly determine which Articles were approved, revised, or retired in a given time period.
- ❖ The Activity numbers provide the list of affected Articles; and, the Article title is a link to the record.
- ❖ This report can be used as an alternative to the “What’s New Report” for Articles to filter for a longer time frame. Rather than viewing changes weekly, this report can be used for a single month, a quarter, or a year.
- ❖ Functionally, this report mirrors the LCDs Status Report. Please see slides 22 – 26.

Self Administered Drug (SAD) Exclusion List Report

- This report provides user with a list of drugs that are excluded from Medicare because they are deemed “self-administered”.
- Users select a time period, a specific MAC or a Contract Type (Ex: MAC - Part A), and either a specific code or all codes.
- The report includes the Article ID Number, Title, CPT/HCPCS codes, and Drug Brand Names.
- The SAD Article Title is a direct link to the record information.
- Each Contractor/Contract Number may only have one active SAD Article.
- Each article title begins with “Self Administered Drug Exclusion List: “.

SAD Exclusion List Report

- ❖ For more information on Self-Administered Drugs, please see the Medicare Benefit Policy Manual, Publication 100-2, Chapter 15, Section 50.2 which addresses how to determine Usually Self-Administered Drugs and Biologicals.
- ❖ Use this link for the Chapter 15, Medicare PBM and information on Self Administered Drugs: <https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/bp102c15.pdf>

Using the SAD Exclusion List Report

❖ In this example, the user is looking for all currently in effect CPT/HCPCS Codes included in the NGS MAC Part B 06102 Contract SAD Exclusion List.

MCD ARCHIVE

Document Update Schedule

Local Coverage Documents (LCDs and Articles) move from the CMS Medicare Coverage Database (MCD) to the MCD Archive in real-time, according to the following schedule:

- Proposed/Draft LCDs move to the MCD Archive 90 days after being released to the final LCD.
- Retired LCDs and Articles move to the MCD Archive 1 year after their retirement dates.
- Superseded versions of active LCDs and Articles move to the MCD Archive after 1 year.
- All LMRPs reside on the MCD Archive.
- All ICD-9 LCDs and Articles reside on the MCD Archive.

Please visit the [MCD Archive Site](#) to view archived documents.

- ❖ On the Downloads Page itself, there are five Data Sets available for download.
 - ❖ “Current” refers to “Currently in Effect” documents.
- ❖ Similar to the Overview Page, the Downloads Page also displays information about the MCD Archive. This section gives the information on when the documents will leave the MCD and go into the MCD Archive.
- ❖ Our next Lunch & Learn will be covering the MCD Archive, so we won’t be focusing on that here.

Downloads Page

- ❖ The page also provides information on downloading the Data Set files and which programs you will need to use them.
- ❖ The Data Set files are all stored within .ZIP files, so you will need a method of unzipping them, i.e. WinZIP, PKUNZIP, 7zip, etc.

Download Contents

The Downloads provide options to capture a set of Local Coverage data (Articles and LCDs) or National Coverage data (NCDs and Public Comments for NCAs/CALs).

For the Local Coverage data, separate download files are available for "Current" or "Current and Retired" LCDs or Articles. The Download files include Data Dictionaries that explain the content and usage of each database.

Please Note: Only the most recent version of the dataset is available; the downloaded database contains future modifications already on file with CMS.

Download Times

If you wish to download this data, please realize that downloading may take some time (as much as 6 hours depending on the speed of your internet connection).

Downloads Data Set Limitations

Some Articles and LCDs may contain attachments, but these attachments are not available in the download. However, they may be accessed by viewing the individual Articles and LCDs using the Medicare Coverage Database Website.

Please Note: Only the most recent version of the dataset is available; the downloaded database contains future modifications already on file with CMS.

Hardware and Software Requirements

For hardware and software requirements for download files, please reference [CMS's File Formats and Plugins Page](#).

Zip File Instructions

The database that can be downloaded is an Access 2000 database contained within a compressed, or "zipped," file. The database file can be extracted from the compressed file using either the WinZip or PKUNZIP utility. In the former case, open the compressed file using WinZip, select the file with the .MDB extension from the list of files displayed, choose the Extract command from the Actions menu, and then specify the directory where the extracted file is to be saved. In the latter case, open an MS-DOS window, go to the directory where the compressed file is saved, and execute the command.

PKUNZIP "compressed name file" *.MDB where "compressed name file" is the name of the compressed file saved on your disk drive. This case assumes that the executable PKUNZIP.exe is in a directory in your PATH statement.

The latest version of WinZip can be downloaded from [WinZip.com](#).

The latest version of PKZIP can be downloaded from [PkWare.com](#).

Proposed/Draft LCDs in the Downloads Files

Proposed/Draft LCDs can be identified by using the DISPLAY_ID field. For more information, please see the Data Dictionaries.

Downloads Page – Downloading a Data Set

- ❖ To download one of the Data Set ZIP files, simply select the radio button for the Data Set you want, and click the “Submit” button (we’ll be using the Current and Retired LCDs Data Set for the following examples).
- ❖ Depending on your browser settings, you may be prompted to Open or Save the file. Always choose to Save the file, so that you can unzip it at your leisure.

DATA SET DOWNLOADS

From this page, users may download the following data sets. **Please Note:** Only the most recent version of the dataset is available; the downloaded database contains future modifications already on file with CMS. Please use the MCD "Date Criteria" search found on the Advanced Search page for precise calendar requests.*

Firefox Download:

Internet Explorer Download:

Downloads Page – Downloading a Data Set

- ❖ Once you've downloaded the ZIP file, extract the contents using the tool of your choice (i.e., WinZIP, PKUNZIP, 7zip, etc.)
- ❖ Regardless of the file you've downloaded, there will be four files within the ZIP file:
 - ❖ A Microsoft Access file
 - ❖ Another ZIP file, containing CSV (comma separated values) files
 - ❖ A Data Dictionary file in PDF format
 - ❖ A Readme file (readme_first.txt)

Downloads Page – Data Set File Details

- ❖ If this is the first time you've downloaded a Data Set, start with the Readme file (readme_first.txt), as it gives more information on obtaining the programs needed to view the PDF, Access, and CSV files.
- ❖ The Data Sets themselves are divided up into multiple data tables. Each Data Set has one primary table, and multiple crosswalk and lookup tables.
 - ❖ The NCD Data Set only has the NCD primary table.
- ❖ The Data Dictionary PDF provides in-depth information on the data tables contained in the Data Sets and their relationships to one another.
- ❖ The Microsoft Access file (.MDB) is the best way to utilize the Data Sets, as all the tables are stored in one file, and can be queried using SQL (Structured Query Language).
- ❖ The CSV files are available for use, in the event you do not have Microsoft Access.
 - ❖ There is one CSV file per data table from the Access file.
 - ❖ To use them, unzip the “_CSV.ZIP” file from the main ZIP file you've downloaded.

Downloads Page – Data Set File Details

❖ Example of the Current and Retired LCDs Access data tables, and CSV data table files:

The image displays two side-by-side windows. The left window, titled 'All Access Objects', shows a list of tables under the 'Tables' tab. The right window, titled 'WinZip Pro - all_lmrp_csv.zip', shows a list of CSV files with their respective sizes and compression ratios.

All Access Objects - Tables

Downloads Page – Understanding the Data Sets

- ❖ To get the most out of the Data Sets for your research goals, it helps to have a basic understanding of relational databases.
- ❖ The main goal of a relational database is to reduce the amount of repeated data.
 - ❖ For example, let's say your LCD has 5 ICD-10 codes associated to it. This would require one row of data for each code, for a total of five rows in a data table.
 - ❖ If we put everything into the same table, this would require five rows of every piece of information for that LCD, so things like the LCD Title or the Coverage Indications, Limitations, and/or Medical Necessity text would be repeated verbatim five times in the data table, to support five different ICD-10 codes.
 - ❖ However, if we put the pieces of information that would be the same for each of those five rows (Title, Coverage Indications, Limitations, and/or Medical Necessity, etc.) into one table, and the five ICD-10 codes in a separate table, then we would only need one row in the first table, and five rows in the second.

All Data

	A	B	C	D
1	LCD ID	LCD Title	Coverage Indication	ICD-10 Code
2	L12345	One Table	All Coverage	A12.34
3	L12345	One Table	All Coverage	A23.45
4	L12345	One Table	All Coverage	A34.56
5	L12345	One Table	All Coverage	A45.67
6	L12345	One Table	All Coverage	A56.78

VS.

LCD Data

	A	B	C
1	LCD ID	LCD Title	Coverage Indications
2	L12345	Two Tables	All Coverage

LCD/ICD-10 Data

	A	B
1	LCD ID	ICD-10 Code
2	L12345	A12.34
3	L12345	A23.45
4	L12345	A34.56
5	L12345	A45.67
6	L12345	A56.78

Downloads Page – Understanding the Data Sets

- ❖ Taking a closer look at the two tables, notice that the ICD-10 table also has the LCD ID column as well.

LCD Data

	A	B	C
1	LCD ID	LCD Title	Coverage Indications
2	L12345	Two Tables	All Coverage

LCD/ICD-10 Data

	A	B
1	LCD ID	ICD-10 Code
2	L12345	A12.34
3	L12345	A23.45
4	L12345	A34.56
5	L12345	A45.67
6	L12345	A56.78

- ❖ Using this shared column, also called a Key Column, we can relate the data in different tables together (thus the term relational database).
- ❖ We can even recreate the single table by combining the two tables together using the Key Column to line up the rows.
 - ❖ This is also known as a Table Join.

Joined Data

	A	B	C	D
1	LCD ID	LCD Title	Coverage Indication	ICD-10 Code
2	L12345	Two Tables	All Coverage	A1234
3	L12345	Two Tables	All Coverage	A2345
4	L12345	Two Tables	All Coverage	A3456
5	L12345	Two Tables	All Coverage	A4567
6	L12345	Two Tables	All Coverage	A5678

Downloads Page – Primary vs. Crosswalk vs. Lookup Tables

- ❖ Where are the ICD-10 Code Descriptions?
- ❖ Remember the main goal is to reduce repeated information.
- ❖ The LCD/ICD-10 table has to store the data for all LCDs, so the ICD-10 Codes could be repeated many times within that table.
- ❖ This leads us to create a third table, that has the ICD-10 Codes and their descriptions.

ICD-10 Data

	A	B
1	ICD-10 Code	Description
2	A12.34	Sample Description
3	A23.45	Description Sample
4	A34.56	Sampling Descriptions
5	A45.67	Descriptioning Samples
6	A56.78	Samples of Descriptions

- ❖ Since our main focus is the LCD information, we refer to the LCD table as a Primary table.
- ❖ The ICD-10 table with the descriptions is known as a Lookup table.
- ❖ Finally, the table that has both LCD and ICD-10 Code IDs is known as Crosswalk table.

Downloads Page – Primary vs. Crosswalk vs. Lookup

- ❖ Using this concept of table separation and Key Columns, we can Join our three tables together into one big informative table.

Downloads Page – Primary vs. Crosswalk vs. Lookup

- ❖ Why don't we just store this Joined table?
- ❖ Doing so would increase the file size incredibly, as all the text would be repeated over and over again.
- ❖ Some notes on naming conventions:
 - ❖ Primary tables are generally just the name of the object you're looking for:
 - ❖ LCD
 - ❖ ARTICLE
 - ❖ NCD
 - ❖ Lookup tables generally end with “_LOOKUP” at the end:
 - ❖ ICD10_CODE_LOOKUP
 - ❖ HCPC_CODE_LOOKUP
 - ❖ Crosswalk tables generally have an “_X_” in them to denote the two tables that are being Cross-walked (X-walked):
 - ❖ LCD_X_ICD10_SUPPORT
 - ❖ LCD_X_HCPC_CODE

Downloads Page – Using the Data Dictionary

- ❖ The Data Dictionary included in your Data Set download, is your absolute best friend when it comes to using the data.
- ❖ Each Data Dictionary contains an in-depth description of every table within the Microsoft Access file (which corresponds to every file within the CSV ZIP file), as well as a Table of Contents showing where to find the table you're looking for.
- ❖ Every table description has three parts, the list of columns in the table, the Primary Key Columns (a list of Key Columns that make each row unique), and the intended usage of the table.

Table Name	
LCD	
Table Structure	
Variable Name	Description
lcd_id	LCD system identifier. The LCD ID is derived from this identifier by adding the prefix "L". The exception is Draft LCDs which use the DISPLAY_ID field explained below.
lcd_version	LCD version number. A new version is created for an LCD each time the LCD is edited, approved or reactivated.
display_id	The ID for Draft LCDs is derived from this field by adding the prefix "DL". The LCD_ID field remains the system identifier for Draft LCDs.

Primary Keys
lcd_id lcd_version
Usage
This is the primary LCD table and contains one record for each LCD. The record included is the most recent version (i.e., the max version) of the LCD that existed at the time of the download; historical versions are not included. Historical versions can only be accessed directly through the Medicare Coverage Database (MCD).
Important! Please note that this table contains Draft policies. These Draft policies can be identified by using the DISPLAY_ID field.

Downloads Page – Using the Data Dictionary

- ❖ The Usage section is the most important, as it includes information on what Key Columns to join to relate the tables together.
- ❖ For example, if you want to find the ICD-10 Codes that Support Medical Necessity for an LCD, you would look in the LCD_X_ICD10_SUPPORT table's usage section:

Usage

Join from table LCD on lcd_id, lcd_version to retrieve the ICD-10 diagnosis codes for which the service is generally covered, and/or considered medically necessary for an LCD.

- ❖ Once you've found the tables you want to join together, you can then use the Microsoft Access file to accomplish this.

Downloads Page – Using the Microsoft Access File

- ❖ When you first open one of the Microsoft Access files, you'll first need to click the “Enable Content” button in the yellow ribbon near the top of the program:

- ❖ Once you've done that, you will then need to click the “Accept” button on the resulting License page:

Downloads Page – Using the Microsoft Access File

- ❖ Once you've accepted the license, you'll get the list of tables.
- ❖ You can always just open a table and start browsing, but the best method is to create Queries.

The screenshot shows the Microsoft Access interface. On the left, the 'All Access Objects' pane lists various tables and queries. The 'lcd' table is selected. The main window displays a data table with the following columns: lcd_id, lcd_version, display_id, title, determinati, cms_cov_policy, orig_det_eff, ent_det_eff, rev_eff_date, rev_end_date, and indicatio. The data rows list various medical procedures and their associated codes and dates.

Downloads Page – Using the Microsoft Access File

- ❖ Creating a Query allows us to utilize the information in the Data Dictionary.
- ❖ To create a Query, click on the Create->Query Design menu item.
- ❖ Let's start with a simple query to get used to the interface, selecting all the information in the Primary LCD table for a particular LCD.
- ❖ To create a Query, click on the Create->Query Design menu item.
- ❖ You then select the tables you want to use, and click Add.
 - ❖ In this case, it's just the LCD table .
- ❖ Then click Close.

Downloads Page – Using the Microsoft Access File

- ❖ To start, select the fields you would like to see, we'll chose all of them, represented by an asterisk (*).
- ❖ Clicking the “View” button will just give you a list of all LCDs in the table, and all the columns.
- ❖ To get query results for one LCD in particular, we would select LCD_ID as another field and then put a value in the “Criteria” line.
 - ❖ For these examples, we're going to be using L35458.
 - ❖ As noted in the Data Dictionary, the LCD_IDs are stored without the “L” prefix in the data.

*												

Downloads Page – Using the Microsoft Access File

- ❖ Getting back to our first example, let's say we wanted to see all the ICD-10 Codes that Support Medical Necessity for L35458.
- ❖ We would start by selecting the LCD_X_ICD10_SUPPORT table from the “Show Table” popup to our query design.
- ❖ Please note: If you run the Query now (by clicking the “View” button), you will get many more rows than anticipated, because we have not established the relationship between the tables yet.

lcd	lcd_x_icd10_support
*	*
lcd_id	lcd_id
lcd_version	lcd_version
display_id	icd10_code_id
title	icd10_code_version
determination_number	icd10_support_group
cms_cov_policy	asterisk
orig_det_eff_date	range
ent_det_end_date	last_updated

Downloads Page – Using the Microsoft Access File

- ❖ First, we need to establish the relationship between (JOINing them) the Primary LCD table, and the LCD_X_ICD10_SUPPORT Crosswalk table.
- ❖ Going back to the Data Dictionary, we know that we need to use the LCD_ID and LCD_VERSION columns to JOIN them together.
- ❖ Drag the two columns over from one table to another to establish this.
- ❖ Then select the columns you'd like to see in the field list below.

JOIN Relationship
