

Medicare Diabetes Prevention Program (MDPP)

Expanded Model Fact Sheet

The Medicare Diabetes Prevention Program (MDPP) is a behavior change intervention that builds on the success of the CDC's National Diabetes Prevention Program (National DPP). The National DPP is a structured lifestyle intervention that was tested in the Medicare population through an Innovation Center-funded DPP Model Test (Y-USA test). The DPP Model test showed that group-based community sessions can lead to beneficiary weight loss and Medicare savings.¹

The Prevalence and Cost of Diabetes

Diabetes affects many individuals, negatively impacts health outcomes, and carries high costs. Effective behavior change can reduce the risk of type 2 diabetes.

While Many are At-Risk for Diabetes, Few are Aware

1 in 2 Adults over age 65 have prediabetes²

however...

Only 1 in 7 adults aged 65 and older with prediabetes are aware of their condition³

Diabetes Prevalence is High and Growing

One in four adults over age 65 have diabetes⁴

and...

Prevalence of diabetes is expected to double by 2050 among adults⁵

The Disease Burdens the System with High Costs

\$104B Annual Medicare cost of care for Americans 65+ with diabetes⁶

and...

Adults with diabetes have more ED visits, hospitalizations, and take a larger number of prescription drugs⁷

Program Overview

The goal of MDPP is to help Medicare beneficiaries achieve at least 5% weight loss through up to one year⁸ of behavior change sessions to prevent the onset of type 2 diabetes through practical training in:

Long-term dietary change

Increased physical activity

Behavioral change strategies for weight loss

There are three key groups that participate in the delivery of MDPP services: suppliers, coaches, and beneficiaries.

Suppliers...

- Are hospitals, community organizations, churches, clinics, and other kinds of organizations
- Have **preliminary or full CDC DPRP recognition**
- Meet program eligibility requirements as described in the *Supplier Requirements Checklist*.
- Deliver up to 1 year of MDPP set of services to eligible Medicare beneficiaries.⁹
- For more on supplier eligibility visit: <https://innovation.cms.gov/Files/x/mdpp-supplierreq-checklist.pdf>

Coaches...

- Are employees, contractors, or volunteers of an MDPP supplier
- Have a valid National Provider Identifier (NPI) that meet full program eligibility requirements.
- Can be clinical or non-clinical professionals trained in the CDC-approved curriculum.^{10,11}
- For more on coach eligibility, visit: <https://innovation.cms.gov/Files/f/act-sheet/mdpp-coachelig-fs.pdf>

Eligible Medicare beneficiaries...

- Are individuals enrolled in Original Medicare (Part B) or Medicare Advantage (Part C) and meet a minimum BMI and 1 of 3 blood test requirements, in addition to other criteria. Beneficiaries with Original Medicare/Fee-for-Service coverage pay no out-of-pocket costs to participate.
- For more on beneficiary eligibility, visit: <https://innovation.cms.gov/Files/f/act-sheet/mdpp-beneelig-fs.pdf>

The Benefits of MDPP

Reach a population that is likely unaware of their pre-diabetes status

Empower high-risk individuals to take action by improving their health

Create community impact by promoting healthier evidence-based behaviors

Reduce risk of type 2 diabetes among Medicare beneficiaries

Achieve cost-savings through weight loss and improved population health
