Issue ID	Problem	Resolution	Status
04	<p>Edit -3941 reads as follows: If A0310G1=[1], then if A2400A is active, then it must equal [0]. However, situations have been identified where an interrupted stay would not result in the answer of No for A2400A.</p>	<p>Edit -3941 was deleted from the data specifications.</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs. It will be implemented in production on December 3, 2019. Since this was a new edit for this version of the data specs, it will no longer exist in the ASAP system.</p>
05	<p>The specs did not contain restrictions on entry of any of the A2400 items when an interrupted stay was indicated (A0310G1 = [1]).</p>	<p>A new FATAL edit, -3965, was added to read as follows: If A0310G1=[1], then A2400C must equal [-----].</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs. It will be implemented in production on December 3, 2019. The new edit will be retroactive for all assessments with a target date of October 1, 2019 or later.</p>

Issue ID	Problem	Resolution	Status
06	<p>States will be able to choose whether PDPM values are calculated for OBRA assessments beginning October 1, 2020. A new item is needed to indicate whether the state has chosen to do so for the assessment.</p>	<p>The new item, STATE_PDPM_OBRA_CD, will be added as of October 1, 2020.</p> <p>This item will have two possible values:</p> <ul style="list-style-type: none"> • 0 (No, do not perform PDPM calculations for OBRA's) • 1 (Yes, perform PDPM calculations for OBRA's). <p>This item is mandatory for all assessments with target date on or after October 1, 2020, and it is part of the Control section in the data specifications.</p> <p>The value will be placed at position 1827 of the fixed-length string.</p> <p>The item will be mapped to existing edit -3676.</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs.</p> <p>It will be implemented in production on October 1, 2020.</p>
07	<p>The ASAP system will use the DMS, not the submitted value in STATE_PDPM_OBRA_CD, to determine whether PDPM values should be calculated for the state where the assessment was performed.</p> <p>The state will be able to specify begin and end dates for OBRA PDPM calculations. If the value submitted in STATE_PDPM_OBRA_CD does not match the DMS value specified by the state for the date range where the target date of the assessment falls, then the user will be notified of the mismatch, and the PDPM value will be recalculated by the ASAP system using the DMS value.</p>	<p>A new WARNING edit, -3966, will be issued by ASAP if A0310A=[01,02,03,04,05,06] and A0310B=[99] and the DMS value specified by the state for the date range where the target date of the assessment falls does not match the submitted value for STATE_PDPM_OBRA_CD.</p> <p>This edit will only apply for assessments with target date on or after October 1, 2020.</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs.</p> <p>It will be implemented in production on October 1, 2020.</p>

11	<p>Edit -3897 reads as follows: Payment Reduction Warning: A dash (-) submitted in this quality measure assessment item may result in a payment reduction for your facility of two percentage points for the affected payment determination. This edit does not apply for OBRA assessments where states have chosen to have PDPM values.</p>	<p>Edit -3897 will be modified to read as follows: If A0310B=[01,08], then the following warning message will apply if a dash is submitted for this item: Payment Reduction Warning: A dash (-) submitted in this quality measure assessment item may result in a payment reduction for your facility of two percentage points for the affected payment determination.</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs. It will be implemented in production on October 1, 2020.</p>
12	<p>PDPM calculations for OBRA assessments will utilize two lookup tables for I0020B: the existing lookup table and a secondary lookup table, which will direct the PDPM to utilize the Medical Management category if the code is found. A new WARNING edit will be issued if the submitted value for I0020B is not present in either lookup table.</p>	<p>A new WARNING edit, -3967, will be created and read as follows: If A0310B=[99] and STATE_PDPM_OBRA_CD is active and STATE_PDPM_OBRA_CD=[1] and I0020B cannot be found in either data spec dictionary table pdpm_icd_codes_FYxxxx or pdpm_icd_codes_2_FYxxxx (where FYxxxx is the fiscal year matching the target date of the assessment), then the PDPM cannot be determined for this assessment. NOTE: ASAP will use the DMS value for the state where the assessment was performed instead of STATE_PDPM_OBRA_CD to determine whether this warning is applicable. This edit will only apply for assessments with target date on or after October 1, 2020.</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs. Issue Added: 12/04/2020

Issue ID	Problem	Resolution	Status
17	<p>Edit -3963 was revised in the final specs, and then again in Issue 1 of this errata. However, the edit then no longer forced values to be entered in X0600 items when inactivating a non-OSA assessment.</p>	<p>Edit -3963 will be revised to add the following as subedit d: If A0050 (formerly X0100)=[3] and X0570A=[0], then the following items, when active, must not equal [^]: X0600A, X0600B, X0600F, X0600H. This change will be retroactive for all assessments with a target date on or after 10/01/2019.</p>	<p>This change will be made in the next version of the MDS 3.0 Data Submission Specs. It will be implemented in the production release.</p>
