VT	6,094	73,986
WA	69,545	762,783
WV	18,752	217,018

*Data Quality: States' submissions have considerable variation in terms of completeness and quality. For additional information regarding state variability in data quality, please refer to [DQ Atlas](#). For this analysis, Arizona, and New Mexico have serious data quality issues for one or more months, making the data unusable for calculating enrollment measures.

** Kentucky attributed the enrollment decrease to removing individuals who had been receiving temporary coverage under the state's presumptive eligibility policy.
