

Fact Sheet: Medicare Part B Inflation Rebates for Calendar Years 2023 & 2024

For the first time, the Centers for Medicare and Medicaid Services (CMS) has assessed inflation rebates to drug manufacturers that raised the prices of certain Medicare Part B drugs faster than the rate of inflation. The first round of invoices that CMS delivered to drug manufacturers covered each quarter in calendar years 2023 and 2024. In general, the rebate amount is equal to the number of units of the Part B rebatable drug furnished during the quarter multiplied by the difference between the specified amount¹ and the inflation-adjusted payment amount. For further information on how Part B rebatable drugs are identified and the Part B rebate amount is calculated, refer to 42 CFR § 427.101 and 42 CFR §§ 427.300-427.304 respectively.

The following tables contain the billing and payment codes for which manufacturer(s) owed a Part B rebate, and the total Part B rebate amounts owed for all four quarters in each of the calendar years 2023 and 2024. Total Part B rebates owed to Medicare for all four quarters in 2023 and 2024 amount to more than **\$14 million** and more than **\$121 million** respectively. Inflation rebate funds are deposited in the Federal Supplementary Medical Insurance Trust Fund as required by law.

¹ The applicable calendar quarter specified amount is calculated as described in [42 CFR § 427.302\(b\)](#).

Calendar Year 2023

Billing and Payment Code	Code Description	Part B Rebate Owed
90396	VARICELLA-ZOSTER IMMUNE GLOBULIN, HUMAN, FOR INTRAMUSCULAR USE	\$99.39
C9482	SOTALOL HYDROCHLORIDE IV	\$6,255.52
J0291	INJ., PLAZOMICIN, 5 MG	\$196.23
J0558	PENG BENZATHINE/PROCAINE INJ	\$3,730.38
