In August 2022, President Biden signed the Inflation Reduction Act of 2022 (P.L. 117-169) into law. The prescription drug law improves Medicare by expanding benefits, lowering drug costs, and improving the sustainability of the Medicare program for generations to come. The drug law provides meaningful financial relief for millions of people by improving access to affordable treatments and strengthening Medicare, both now and in the long run.

Beginning in 2025, the prescription drug law requires all Medicare prescription drug plans (Medicare Part D plans) — including both standalone Medicare prescription drug plans and Medicare Advantage plans with prescription drug coverage — to offer Part D enrollees the option to pay out-of-pocket prescription drug costs in the form of monthly payments instead of all at once to the pharmacy under the Medicare Prescription Payment Plan. This will be helpful for people with Medicare Part D who have high-cost sharing earlier in the plan year by spreading out those expenses over the course of the year.

This document provides a timeline of key dates for implementation of the Medicare Prescription Payment Plan for the first year.

**Medicare Prescription Payment Plan Implementation Timeline**
