### Background

---

CR 13278 is a maintenance update of ICD-10 conversions and other coding updates specific to NCDs. These NCD coding changes are the result of newly available codes, coding revisions to NCDs released separately, or coding feedback received.

The translations from ICD-9 to ICD-10 aren't consistent one-to-one matches, nor are all ICD-10 codes appearing in a complete General Equivalence Mappings (GEMs) mapping guide or other mapping guides appropriate when reviewed against individual NCD policies.

Relevant NCD coding changes in CR13278 include:

- NCD 50.3 – Cochlear Implants ICD-10

- NCD 90.2 – Next Generation Sequencing (NGS)
- NCD 210.1 – Prostate Screening Tests

[Previous NCD coding changes](#) are available. Also, see the [NCD spreadsheets](#) for CR 13278.

CMS isn't including any policy changes in this ICD-10 quarterly update. We cover NCD policy changes using the current, longstanding NCD process.

Your MAC will adjust any claims processed in error associated with CR 13278 that you bring to their attention.
