### Affected Providers

---

- Physicians
- Suppliers
- Other providers billing Medicare Administrative Contractors (MACs) for services

### Action Needed

---

Make sure your billing staff knows about National Coverage Determinations (NCDs) with added ICD-10-CM codes.

### Background

---

CR 14226 announces changes included in the January 2026 quarterly release of the clinical diagnostic laboratory services edit module. The laboratory negotiated rulemaking committee developed the NCDs for clinical diagnostic laboratory services in 2001. CMS developed the nationally uniform software and incorporated it in the Medicare shared systems so that MACs process laboratory claims for the 23 NCDs in the [Medicare NCD Manual, Chapter 1, Part 3](#), sections 190.12–190.34 uniformly throughout the nation.

We update the laboratory edit module quarterly, as necessary, to reflect ministerial coding updates and substantive changes to NCDs. Changes result from coding analysis decisions developed under code maintenance procedures in the negotiated NCDs and ICD-10-CM biannual code updates.
