

Summary of MCMP Coronary Artery Disease Algorithm Revisions-v1.1

Coronary Artery Disease

Revision added 1/22/2008

ACE Inhibitor or ARB Therapy (CAD-7)

Denominator Inclusion Option #1:

TOPIC_DRUG_CODES Table lists applicable drug codes for patients who were prescribed an active anti-diabetic medication ~~where~~ and DRUG_EXCLUSION = N.

The word “where” was changed to **and** on page 16. The version number was also changed from 1.0 to 1.1 in the footer section of the document.
