

May 10th is Mother's Day. The Centers for Medicare & Medicaid Services is asking the provider community to help keep women with Medicare healthy by ensuring that they take advantage of Medicare-covered preventive services. Medicare covers mammograms, bone mass measurements, screening pap tests, and screening pelvic exams, among other services, that can help women live longer, healthier lives.

The [Medicare Learning Network](#) (MLN) offers a variety of educational products related to Medicare-covered preventive services geared towards women. They include:

- The Bone Mass Measurements brochure, which provides information on Medicare coverage of bone-mass measurements.
http://www.cms.hhs.gov/MLNProducts/downloads/bone_mass.pdf
- The Cancer Screenings brochure, which provides information on Medicare coverage of cancer screenings, including screening mammography, screening pelvic exams, and screening pap tests.
