Implementation of Medicare Secondary Payer Mandatory Reporting Provisions in
Section 111 of the Medicare, Medicaid, and SCHIP Extension Act of 2007

(See 42 U.S.C. 1395y(b)(7) & (8))

**ALERT: Liability Insurance (Including Self-Insurance), No-Fault Insurance, and
Workers' Compensation – Beneficiary Lookup Online Query Capability for
Responsible Reporting Entities (RREs)**

This ALERT provides information related to a new, online, real-time query capability being offered on the Section 111 Coordination of Benefits Secure Website (COBSW). The new Beneficiary Lookup action will provide a response as to whether information supplied for an injured party can be matched to a Medicare beneficiary. This online query capability will be available on March 1, 2011 and may be used to assist with reporting liability insurance (including self-insurance), no-fault insurance, and workers' compensation (collectively referred to as Non-Group Health Plan or NGHP) information mandated by Section 111 of the MMSEA.

NGHP RREs, that have not selected the Direct Data Entry (DDE) reporting option and are in a production status, will have the new action (Beneficiary Lookup) available on the RRE Listing page after logging on to the Section 111 COBSW (www.section111.cms.hhs.gov). The Beneficiary Lookup will utilize the same matching criteria and methodology as used for the Query Input File and the Claim Input File.

To use the Beneficiary Lookup action:

- Log on to the Section 111 COBSW
- The RRE Listing page will display
- Click on the Actions drop-down box for the RRE ID under which you wish to query
- Select the Beneficiary Lookup action from the list and click on the Go button
- The Beneficiary Lookup page will display
- On the Beneficiary Lookup page, enter the following required information
 - HICN or SSN
 - Injured Party First Name
 - Injured Party Last Name
 - Injured Party Date of Birth
 - Injured Party Gender
- Click on the Next button
- The system will attempt to match the information submitted to a Medicare beneficiary. First, an exact match on the HICN or SSN must be found. If both the HICN and SSN are supplied for the matching, only the HICN will be used. Then at least three out of the four remaining criteria must be matched exactly. (Only the first letter of the first name and first six letters of the last name will be used.)
- The Beneficiary Lookup Response page will then display the following:

- If the information entered was matched to a Medicare beneficiary, a message will show indicating a match was found and the following data elements will display
 - Current HICN Medicare has on file for the beneficiary
 - SSN supplied by the user, if applicable
 - Current First Name Medicare has on file for the beneficiary
 - Current Last Name Medicare has on file for the beneficiary
 - Current Date of Birth Medicare has on file for the beneficiary
 - Current Gender Medicare has on file for the beneficiary
- If the information entered cannot be matched to a Medicare beneficiary, a message will indicate that no match was found. The information entered for the query will redisplay, but no information will be returned indicating why a match was not found.

IMPORTANT: RREs are limited to 100 query requests per RRE ID per calendar month using the Beneficiary Lookup on the COBSW. Each month the system will display a count of the remaining queries left, and will reset this count up to 100 on the first day of each succeeding calendar month. Each query submitted using the Beneficiary Lookup will count toward this limit of 100 per month, regardless of whether or not a match was found.

NOTE: The Beneficiary Lookup function will be displayed on the action list of the RRE Listing page prior to March 1, 2011 but it is not operational until March 1, 2011. The transaction count will show zero, and will not be set to 100 until March 1, 2011.

Important Considerations:

- The effective date the Beneficiary Lookup action on the RRE Listing page of the Section 111 COBSW (www.section111.cms.hhs.gov) is **March 1, 2011**.
- Use of the Beneficiary Lookup action is limited to that prescribed by the Section 111 Data Use Agreement as documented in the User Guide and agreed to by the RRE's Authorized Representative on the signed Profile Report as well as by each user of the Section 111 COBSW.
- The Beneficiary Lookup action will only be available for RRE IDs in a production status.
- The Beneficiary Lookup action will not be available to RREs that have selected Direct Data Entry (DDE) as a submission method because this same functionality is offered within the DDE process.
- All users associated to the RRE ID (Account Manager and Account Designees) will be able to use the Beneficiary Lookup function.
- RREs are limited to 100 online query transactions using the Beneficiary Lookup action per RRE ID per month.
- Use of the Beneficiary Lookup action is optional. It will be offered under all non-DDE RRE IDs. No special application or sign-up is required.
- RREs using the Beneficiary Lookup action may continue to submit the Query Input File, as documented in the User Guide.
- The Section 111 NGHP User Guide and the Section 111 COBSW User Guide will be updated to include this information.
