Prior Authorization Process for Certain Hospital Outpatient Department (OPD) Services
Frequently Asked Questions (FAQs)

**Prior Authorization (General)**

1. **Q: What is prior authorization?**

   A: Prior authorization is a process through which a request for provisional affirmation of coverage is submitted for review before the service is rendered to a beneficiary and before a claim is submitted for payment. The prior authorization program for certain hospital OPD services ensures that Medicare beneficiaries continue to receive medically necessary care while protecting the Medicare Trust Funds from unnecessary increases in the volume of covered services and improper payments while keeping the medical necessity documentation requirements unchanged for providers. Prior authorization helps to make sure that applicable coverage, payment, and coding requirements are met before services are rendered while ensuring access to and quality of care.

2. **Q: When does the new Prior Authorization Process for Certain Hospital Outpatient Department (OPD) Services begin?**

   A: Prior Authorizations will be processed beginning June 17th for dates of service on or after July 1, 2020. The regulatory requirements were finalized as part of the Hospital Outpatient Prospective Payment System Final Rule, published in the Federal Register on November 12, 2019 (84 FR 61446), and a Correction Notice was subsequently issued on January 3, 2020 (85 FR 224).

3. **Q: What services require prior authorization under this process?**

   A: The following services will require prior authorization: blepharoplasty, botulinum toxin injections, panniculectomy, rhinoplasty, and vein ablation. The Final List of Outpatient Services that Require Prior Authorization is located [here](#).

4. **Q: Why is Medicare implementing prior authorization for these OPD Services?**

   A: The CMS has experienced significant increases in the utilization volume of some covered OPD services. During our analysis, we targeted services that represent procedures that are likely to be cosmetic surgical procedures and/or are directly related to cosmetic surgical procedures that are not covered by Medicare but may be combined with or masquerading as therapeutic services. We believe prior authorizations for these services will be an effective method for controlling unnecessary increases in the volume of covered outpatient services.

5. **Q: How does prior authorization help Medicare suppliers, providers, and
other practitioners?
A: Suppliers, providers, and other Medicare practitioners can be confident that
the items and services that their patients need will be covered without time
delays, subsequent paperwork, or the need to file an appeal for a claim that was
later deemed not payable. In addition, paid claims for which there is an
associated provisional affirmation decision will be afforded some protection
from future audits.

6. Q: Does this prior authorization process protect beneficiary access to
care?
A: Yes. The CMS believes this prior authorization program will both help
protect the Medicare Trust Funds from improper payments and make sure
beneficiaries are not hindered from accessing necessary services when they
need them. Prior authorization allows CMS to make sure items and services
frequently subject to unnecessary utilization are furnished or provided in
compliance with applicable Medicare coverage, coding, and payment rules
before they are furnished or provided, and it allows the beneficiary to be
notified if the item would be covered by Medicare and any potential financial
implications earlier in the payment process. Access is preserved by having set
timeframes for contractors to complete any prior authorization request
decisions, and an expedited process is available in cases where delays may
jeopardize the life or health of beneficiaries.

7. Q: I don’t see the final list of services in the Final Rule. Why not?
A: The Final List of Outpatient Services that Require Prior Authorization was
incorrectly numbered as Table 64 and titled as the Proposed List of Outpatient
Services That Would Require Prior Authorization. In the Correction Notice
published in the Federal Register on January 3, 2020, we explained that Table 64
should be numbered Table 65 and the full title of the table should read, “Table
65—Final List of Outpatient Services that Require Prior Authorization.” See 85
FR 225. The Final List is also available through the Prior Authorization webpage
here.

8. Q: Who will be required to submit prior authorization requests?
A: Hospital outpatient departments must submit a prior authorization request and receive
a provisional affirmation decision as a condition of payment. Claims for these services
submitted without a provisional affirmation decision will be denied. This regulation will
be implemented nationwide for dates of service beginning July 1, 2020.

9. Q: What provider types require prior authorization for these services?
A: Only hospital outpatient department services require prior authorization as part of this
program. Other facility/provider/supplier types such as physician’s offices, critical access
hospitals, or ambulatory surgery centers that submit claims other than type of bill 13X are not required to submit prior authorization requests. (Please see our FAQs regarding related services provided in the hospital OPD setting)

10. Q: Does the prior authorization requirement apply to Maryland waiver hospitals?

A: Yes. The Maryland hospital waiver does not affect their OPD requirement to participate in this program. Maryland OPDs are required to submit prior authorization requests for the services listed in this program.

11. Q: How will CMS exempt certain providers from the prior authorization process? How can I obtain an exemption?

A: As part of the Final Rule, we finalized CMS’ authority to exempt a provider from the prior authorization process based upon a provider’s demonstrated compliance with Medicare coverage, coding, and payment requirements in 42 CFR §419.83(c). We intend to exempt providers that achieve a prior authorization provisional affirmation threshold of at least 90 percent during a semiannual assessment (84 FR 61448). Exemptions will take up to 90 calendar days to effectuate and will remain in effect until CMS elects to withdraw the exemption. CMS will provide at least 60 days of notice prior to the effective date for withdrawal of an exemption. We anticipate that exemptions for providers who qualify will begin being granted sometime in Calendar Year 2021. More detailed information will be conveyed through the Hospital OPD Prior Authorization website as it becomes available.

12. Q: Where can I find the regulations implementing the new Hospital OPD Prior Authorization process?

A: The regulations are located at 42 CFR §§419.80-419.83.

13. Q: Where can I find additional operational details related to prior authorization?

A: An operational guide with additional details is available within the download section on the OPD Prior Authorization website.

Prior Authorization Request Process

14. Q: What form do I use to submit a prior authorization request and is it available on the website?

A: There is no specific form to request prior authorization. Your Medicare Administrative Contractor (MAC) may make a cover sheet or other templates available for voluntary use.

15. Q: How can providers submit prior authorization requests/what methods can be
used?
A: Providers can submit prior authorization requests to their respective MAC by all of the following methods: fax, mail, Electronic Submission of Medical Documentation (esMD), and MAC electronic portals. Submissions through esMD will be available beginning July 6, 2020. For more information about esMD, see [www.cms.gov/esMD](http://www.cms.gov/esMD) or contact your MAC.

16. **Q: How many days will it take to receive a prior authorization decision?**

   A: The standard review timeframe is up to ten (10) business days from the date the prior authorization request is received, excluding federal holidays.

17. **Q: What if I need a decision on my prior authorization request sooner than 10 days?**

   A: You can request an expedited review timeframe of up to two (2) business days if the standard timeframe for making a decision could seriously jeopardize the life or health of the beneficiary. The expedited request must include justification showing that the standard timeframe would not be appropriate. If the MAC determines that the request does not substantiate the need for an expedited review, they will provide notification and communicate a decision within the regular timeframe.

**Prior Authorization Request Process-Medical Review**

18. **Q: Does the Prior Authorization process require new coverage or documentation requirements?**

   A: No. Prior authorization does not create new coverage or documentation requirements. Regularly required documentation must be submitted earlier in the process. MACs may develop Local Coverage Determinations (LCD) specific to their jurisdiction. Providers should follow their jurisdiction’s LCDs /Local Coverage Articles, when applicable.

19. **Q: What are the different decisions that a prior authorization request can obtain and how will this decision be communicated?**

   A: The MACs can either render a provisional affirmation decision, partial affirmation decision, or a non-affirmation decision.

   a. A provisional affirmation decision is a preliminary finding that a future claim submitted to Medicare for the item or service likely meets Medicare’s coverage, coding, and payment requirements.

   b. A non-affirmation decision is a preliminary finding that, if a future claim is
submitted for the item or service, it does not meet Medicare’s coverage, coding, and payment requirements.

c. A provisional partial affirmation decision means that one or more service(s) on the request received a provisional affirmation decision and one or more service(s) received a non-affirmation decision.

d. The MAC will send the hospital OPD provider a written decision (i.e., provisional affirmation, provisional partial affirmation, or non-affirmation), and if applicable, provide the detailed reasons for the non-affirmation decision. The MAC will also share such information with beneficiaries.

20. **Q: I received a non-affirmation decision. What should I do?**

   A: The MAC will provide a detailed reason for a non-affirmation decision. Providers should review the information provided and consider if there is additional documentation that could address the non-affirmation decision upon resubmission of the prior authorization request. Providers may also request additional information or clarification from their MAC.

21. **Q: Will physicians and other related service practitioners receive a copy of the prior authorization decision letter?**

   A: No. Only the requester (hospital OPD) and beneficiary will receive a prior authorization decision letter. Physicians and other practitioners who provide related services in the hospital OPD to the procedure requiring prior authorization may obtain a copy of the decision letter from the hospital OPD.

22. **Q: What is a resubmitted request?**

   A: A resubmitted request is a subsequent prior authorization request submitted after the initial request was submitted, reviewed, and a non-affirmation decision was made. A request that is resubmitted with no additional documentation or information will likely receive a non-affirmation decision.

23. **Q: Can non-affirmation decisions be appealed?**

   A: Provided the claim has not been submitted for payment, the provider may resubmit the prior authorization request to their MAC an unlimited number of times. Non-affirmation decisions are not considered initial determinations and cannot be appealed; however, if a claim is submitted with a non-affirmation decision, and is subsequently denied, that is considered an initial determination and is appealable.

24. **Q: Will we be provided education on the reasons for the non-affirmation prior authorization decision?**
A: Yes. When the prior authorization request results in a non-affirmation decision, the MAC will provide the requester detailed information about missing or noncompliant documentation that resulted in the non-affirmation decision.

25. Q: Will these claims still be subject to additional postpayment reviews?

A: Generally, the claims that have a provisional affirmation decision will not be subject to additional review; however, CMS contractors, including Unified Program Integrity Contractors or MACs, may conduct targeted pre- and postpayment reviews if the provider shows evidence of potential fraud or gaming. In addition, the Comprehensive Error Rate Testing contractor must review a random sample of claims for postpayment review for purposes of estimating the Medicare improper payment rate.

Prior Authorization Request Process-Unique Tracking Number (UTN)

26. Q: Will there be a tracking number for each prior authorization decision?

A: Yes, MACs will list the prior authorization unique tracking number (UTN) on the decision notice. The UTN must be submitted on the claim in order to receive payment.

   a. The submission of the prior authorized claim is to have the 14 byte UTN that is located on the decision letter. For submission of electronic claims, the UTN must be in positions 1 through 18. When the claim enters the Fiscal Intermediary Shared System (FISS), the UTN will move it to positions 19 through 32 and zeros will autofill the first field. For providers submitting electronic claims, the Medicare Treatment Authorization field must contain blanks or valid Medicare data in the first 14 bytes of the treatment authorization field at the loop 2300 REF02 (REF01=G1) segment for the ASC X12 837 claim.

   b. For all other submissions, the provider must TAB to the second field of the treatment authorization field (positions 19–32) and key the UTN.

27. Q: How far in advance are we able to submit a prior authorization request from the anticipated date of service?

A: A provisional affirmation is valid for 120 days from the date decision was made. If the date of service is not within 120 days of the decision date, the provider will need to submit a new prior authorization request.

28. Q: For how long is the unique tracking number (UTN) valid?

A: Each UTN is valid for 120 days. The decision date is counted as the first day of the 120 days. For example: if the prior authorization request affirmation decision is documented on January 1, 2021, the prior authorization will be valid for dates of service through April 30, 2021. After that, the provider will need to submit a new request.
29. Q: Botulinum toxins can be injected for certain indications every 12 weeks. If an affirmation UTN is valid for 120 days, can a provider bill for two separate dates of services under one prior authorization request/UTN, or does each separate procedure require a new prior authorization request/UTN regardless if the next injection falls within 120 days?

A: Each UTN is valid for one claim/one date of service. Each procedure requires a new prior authorization request regardless if the next service falls within 120 days.

30. Q: Regarding vein ablations, these procedures may be staged. If all procedures occur within 120 days, do providers need to submit a separate prior authorization request for each procedure?

A: Each UTN is valid for one claim/one date of service. Each procedure requires a new prior authorization request regardless if the next service falls within 120 days.

31. Q: If multiple procedures that require prior authorization are to be performed on the same day, should the prior authorization request include all procedures?

A: A hospital OPD should include all applicable procedures that require prior authorization on the prior authorization request. Each prior authorization request will receive a single UTN, regardless of the number of procedures that are being requested.

32. Q: If one procedure is affirmed and one is non-affirmed, will each procedure receive a different UTN?

A: No. There will be one UTN for each prior authorization request, which will be encoded to match the affirmation/non-affirmation decisions to the respective procedure. In the event of a partial affirmation, where one or more procedures receives an affirmation decision and one or more receives a non-affirmation decision, the UTN must be included on the hospital OPD claim submitted for payment. Each service and decision will be tracked and coded in the UTN. Claims submitted with non-affirmed procedures will be denied.

**Claims Submission and Processing**

32. Q: Do the botulinum toxin J-codes listed in this program require prior authorization when they are used for injection procedures other than 64612 and 64615?

A: No. Prior authorization is only required when one of the required Botulinum Toxin codes (J0585, J0586, J0587, or J0588) is used in conjunction with the one of the required CPT injection codes (64612, injection of chemical for destruction of nerve muscles on one side of face, or 64615, injection of chemical for destruction of facial and neck nerve
muscles on both sides of face). Use of these Botulinum Toxin codes in conjunction/paired with procedure codes other than 64612 or 64615 will not require prior authorization under this program.

33. Q: The Rule states that any claims associated with or related to a service that requires prior authorization for which a claim denial is issued would also be denied. What types of associated services will be denied?

A: Associated/related (professional) services will be denied when there was a non-affirmation prior authorization request decision for the hospital OPD service(s), regardless of whether a claim is submitted or not, or there was no prior authorization request on file, and the hospital OPD claim was denied. These associated services include, but are not limited to, services such as anesthesiology services, physician services, and/or facility services.

34. Q: Are physicians and other associated providers required to submit the unique tracking number (UTN) on their claims?

A: No. Only the hospital OPD is required to include the UTN on their claim, as the prior authorization process is only applicable to hospital OPD services. The physician and other billing practitioners should submit their claims as usual; however, claims related to/associated with services that require prior authorization as a condition of payment will not be paid, if the service requiring prior authorization is not eligible for payment.

35. Q: Are associated/related services, such as a physician service billed under the Physician Fee Schedule, payable if the procedure requiring prior authorization is not payable?

A: No. Associated/related services, such as physician services performed in hospital OPDs, will not be paid for services that require prior authorization as a condition of payment for hospital OPD claims, if the service requiring prior authorization is not eligible for payment. Claims from other places of service are not affected.

36. Q: In some situations, a surgeon may change a procedure intraoperatively from the planned procedure to one that was not prior authorized. What can providers due to avoid receiving claim denials for these services and having to file an appeal?

A: If a service requiring prior authorization as a condition of payment is billed without an associated affirmation decision, it will be denied. Providers may submit prior authorization requests for multiple potential procedures if they believe that this could be a possibility. It may be best to submit a prior authorization request with several potential service codes; however, providers should be aware that this may result in a partial affirmation decision if the documentation does not support the need for all of the services requested.
37. Q: Does this prior authorization process apply to patients with Medicare Advantage plans?

A: No. This prior authorization process is only applicable to claims submitted to Medicare Fee-for-Service.

38. Q: Will patients who have Fee-for-Service Medicare secondary to other insurance coverage require prior authorization for these services?

A: If the provider is seeking payment from Medicare as a secondary payer for an applicable hospital OPD service, prior authorization is required. The provider or beneficiary must include the UTN on the claim submitted to Medicare for payment.

39. Q: If a hospital OPD submits a claim for a non-affirmed procedure and the claim is denied, as well as claims for related physician services, must the physician appeal separately or can the hospital OPD appeal the associated physician claim as well?

A: The appeal process has not changed. Each provider who determines that appealing a denial decision is appropriate must file their own appeal. An appeal request must include a request to review each (or all) of the services billed on each claim. The requests may be made in a single request or separate requests, but each disputed service for each claim must be identified in the appeal request(s).

40. Q: What will happen to related physician or other practitioner claims if the hospital OPD has not yet submitted its claim for the service requiring prior authorization?

A: For services requiring prior authorization in this program, related service claims may be held and/or records may be requested for review to determine what action should be taken on the claim.

41. Q: Can we submit prior authorizations retroactively – meaning that the service was already provided, but claim has not yet been billed?

A: No. A prior authorization request must be submitted before the service is provided to a beneficiary.

42. Q: If the hospital OPD performed an applicable procedure, but was unable to obtain prior authorization due to noncompliance from the physician, would this scenario qualify for issuance of an Advance Beneficiary Notice (ABN) to bill the service to the patient, even if the service should be covered?

A: An advance beneficiary notice (ABN) may be issued if the provider advises the beneficiary in advance that they expect payment for a service to be denied by Medicare. (See Act §1862(a)(1) and §1879 requirements of the Act and the Claims Processing Manual, Pub. 100-04, Chapter 30, § 50 for additional information on ABNs). The provider
must submit the claim with a GA modifier, and the MAC will review to determine if the
ABN was issued appropriately.

43. **Q:** If the physician determines that he/she is aware that the procedure is purely
cosmetic but the patient insists on us billing Medicare for one of these procedures,
must we give an advance beneficiary notice (ABN) in order to bill the patient for the
services?

A: Yes. An ABN may be issued if the provider advises the beneficiary in advance that
they expect payment for a service to be denied by Medicare. The provider must submit
the claim with a GA modifier, and the MAC will review to determine if the ABN was
issued appropriately.

44. **Q:** If the prior authorization request is non-affirmed and the patient signs an
Advance Beneficiary Notice (ABN), what will Medicare pay?

A: Medicare will make no payment for claims submitted with a non-affirmation UTN
and/or with the GA modifier (as required when an ABN has been properly executed).

45. **Q:** How do you define a hospital outpatient department and/or hospital outpatient
department services?

A: The hospital outpatient department setting is defined as visits and/or
services/procedures paid for under the Medicare Outpatient Prospective Payment System
that are submitted with a type of bill 13x.

46. **Q:** Is prior authorization required for CPT 21235 (obtaining ear cartilage for
grafting)?

A: No. CPT 21235 was originally in the list of hospital OPD services that require prior
authorization; however, in response to stakeholder feedback, we are removing this code
from the list, as it is commonly used in other procedures not related to rhinoplasty. This
code will not require prior authorization as a condition of payment.
