

CMS Center for Consumer Information & Insurance Oversight (CCIIO), Health Insurance Exchange Public Use Files (Exchange PUFs) Data Dictionary for Plan ID Crosswalk PUF

1. Overview of the Plan ID Crosswalk PUF

The Centers for Medicare & Medicaid Services (CMS) Center for Consumer Information & Insurance Oversight (CCIIO) publishes the Exchange PUFs in order to improve transparency and increase access to data on Qualified Health Plans (QHPs) and Stand-alone Dental Plans (SADPs) offered through the Exchange in the individual market and Small Business Health Options Program (SHOP). The PUFs include data from states with Federally-facilitated Exchanges (FFE) including states performing plan management functions, and State-based Exchanges that rely on the federal information technology platform for QHP eligibility and enrollment (SBE-FPs). The Exchange PUFs also include data on Multi-State Plans (MSPs) and certified off-exchange SADPs. The PUFs do not include data from SBEs that do not rely on the federal platform for QHP eligibility and enrollment.

The Plan ID Crosswalk PUF (CW-PUF) is one of the files that comprise the Exchange PUFs. The purpose of the CW-PUF is to map QHPs and SADPs offered through the Exchanges during the previous plan year to plans that will be offered through the Exchanges in the current plan year. These data either originate from an issuer's Plan ID Crosswalk template of the QHP Application (i.e., template field), or were generated by CCIIO for use in data processing (i.e., system-generated).

This data dictionary describes the variables contained in the CW-PUF. Each record reports the mapping between a plan offered in the previous plan year to a plan offered in the current plan year at the county or county-zip code level. For the PY2022 PUF, each record maps between a plan offered in 2021 with a plan offered in 2022. The CW-PUF is available for plan years 2015 through 2022.

<i>Comments:</i>	For the 2015 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2014 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2015 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product. For the 2016 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2015 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2016 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the

particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product.

For the 2017 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2016 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2017 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product; a value of 8 equals Crosswalk to a different issuer; crosswalk determined by CMS and not existing issuer.

For the 2018 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2017 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2018 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product; a value of 8 equals Crosswalk to a different issuer; crosswalk determined by CMS and not existing issuer; a value of 10 equals Discontinuing plan; plan discontinued in a bare county.

For the 2019 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2018 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2019 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in

the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product; a value of 8 equals Crosswalk to a different issuer; crosswalk determined by CMS and not existing issuer; a value of 10 equals Discontinuing plan; plan discontinued in a bare county.

For the 2020 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2019 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2020 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product; a value of 8 equals Crosswalk to a different issuer; crosswalk determined by CMS and not existing issuer; a value of 10 equals Discontinuing plan; plan discontinued in a bare county.

For the 2021 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2020 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2021 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product; a value of 8 equals Crosswalk to a different issuer; crosswalk determined by CMS and not existing issuer; a value of 10 equals Discontinuing plan; plan discontinued in a bare county.

For the 2022 dataset: a value of 0 equals Renewing the same product/plan combination using the same 2021 Plan ID; a value of 1 equals Renewing the same product/plan combination using a different 2022 Plan ID; a value of 2 equals Renewing product or renewal in a different plan within the product; a value of 3 equals Continuing product with no plan available in the particular service area under that product and enrollment in a different

product; a value of 4 equals Continuing product with no plan available in the particular service area under that product and no enrollment option; a value of 5 equals Discontinuing product and no enrollment option; a value of 6 equals Discontinuing product and enrollment into a different product; a value of 7 equals Continuing product; no silver plan available in the particular service area under that product, enrollment in a silver plan under a different product; a value of 8 equals Crosswalk to a different issuer; crosswalk determined by CMS and not existing issuer; a value of 10 equals Discontinuing plan; plan discontinued in a bare county.

Variable Name: AgeOffPlanID_2015
Variable Definition: Fourteen-character alpha-numeric code that identifies the plan available to enrollees who will age-off (i.e., no longer meet the criteria for continued eligibility) the 2014 plan prior to January 1, 2015
Data Type: Text
Variable Label: 2015 Age Off Plan ID
Allowable Values: Free text
