

CMS Center for Consumer Information & Insurance Oversight (CCIIO), Health Insurance Exchange Public Use Files (Exchange PUFs) Data Dictionary for Plan ID Crosswalk PUF

1. Overview of the Plan ID Crosswalk PUF

The Centers for Medicare & Medicaid Services (CMS) Center for Consumer Information & Insurance Oversight (CCIIO) publishes the Exchange PUFs to improve transparency and increase access to data on Qualified Health Plans (QHPs) and Stand-alone Dental Plans (SADPs) offered through the Exchanges in the individual market and Small Business Health Options Program (SHOP). The PUFs include data from states with Federally-facilitated Exchanges (FEEs) including states performing plan management functions, and State-based Exchanges that rely on the federal information technology platform for QHP eligibility and enrollment (SBE-FPs). The Exchange PUFs also include data on Multi-State Plans (MSPs) and certified off-exchange SADPs. The PUFs exclude data from SBEs that do not rely on the federal platform for QHP eligibility and enrollment.

The Plan ID Crosswalk PUF (CW-PUF) is one of the files that comprise the Exchange PUFs. The purpose of the CW-PUF is to map QHPs and SADPs offered through the Exchanges during the previous plan year to plans that will be offered through the Exchanges in the current plan year. These data either originate from the issuer's Plan ID Crosswalk template of the QHP Application (i.e., template field), or were generated by CCIIO for use in data processing (i.e., system-generated).

This data dictionary describes the variables contained in the CW-PUF. Each record reports the mapping between a plan offered in the previous plan year to a plan offered in the current plan year at the county or county-zip code level. For the PY2026 PUF, each record maps between a plan offered in 2025 with a plan offered in 2026. The CW-PUF is available for plan years 2015 through 2026.
