Executive Summary..... 3

Appendix A. Aggregate Data by Applicable Manufacturer/Group Purchasing Organization 6

Executive Summary

The Open Payments program is a Congressionally-mandated national disclosure program that promotes transparency by making information about the financial relationships between the healthcare industry (applicable manufacturers and group purchasing organizations, or GPOs) and healthcare providers (physicians and teaching hospitals) available to the public.

The Open Payments data includes payments and other transfers of value made to physicians and teaching hospitals, along with ownership or investment interests held by physicians (or their immediate family members) in the reporting organizations. Payments are reported across three payment categories: general payments, research payments, and physician ownership information (Table 1). The data collected by the Open Payments program are self-reported by applicable manufacturers and GPOs.

Table 1: Open Payments Program Payment Categories

General Payments	Research Payments	Physician Ownership Information
Payments or other transfers of value not made in connection with a research agreement or research protocol.	Payments or other transfers of value made in connection with a research agreement or research protocol.	Information about the ownership or investment interests that physicians or their immediate family members have in an applicable manufacturer or GPO.

CMS publishes financial data for each program year by June 30th of the following year, as well as updates from previous program periods, on its public CMS Open Payments [website](#). In addition, CMS updates, or refreshes, the Open Payments data at least once annually after its initial publication. The refreshed data includes data corrections made since the initial publication of data that were submitted by applicable manufacturers and GPOs. Open Payments data is available for the public to search, download, and evaluate.

For Open Payments Program Year 2015, as published on June 30, 2016, healthcare industry manufacturers reported \$7.52 billion in payments and ownership and investment interests to physicians and teaching hospitals. This amount was comprised of 11.90 million total records, attributable to 618,931 physicians and 1,116 teaching hospitals.

Payments in the three major reporting categories were:

- \$2.60 billion in general (i.e., non-research related) payments
- \$3.89 billion in research payments
- \$1.03 billion of ownership or investment interests held by physicians or their immediate family members

The Open Payments Program Year 2015 data set is the second full year of data available on the CMS Open Payments website. CMS also re-published 2013 and 2014 data, due to updates made by industry such as additions/deletions of records, resolution of disputes, and release of delay in publication records (Table 2). Over the course of the Open Payments program, CMS has published 28.22 million records, accounting for \$16.77 billion in payments and ownership and investment interests.

To ensure that manufacturers and GPOs are compliant with Open Payments' reporting requirements, CMS has the authority to impose civil monetary penalties for late, inaccurate, and incomplete reporting. CMS did not impose civil monetary penalties during Program Year 2015.

The summary table below shows the number of records and value of payments published and held for future publication, through Program Year 2015:

Table 2: Summary of Program Year Data

	2013 ¹	2014 ¹	2015	Total Published (2013, 2014, and 2015)	2013 Delay in Publication	2014 Delay in Publication ³	2015 Delay in Publication ³
Number of Records²	4.46 million	11.86 million	11.90 million	28.21 million	146,000	116,000	160,000
Value of Payments	\$3.91 billion	\$7.49 billion	\$7.52 billion	\$16.77 billion	\$293 million	\$903 million	\$1.03 billion

¹ This number varies from the previously published Report to Congress due to updates made by industry such as additions/deletions of records, resolution of disputes, and release of delay in publication.

² A record is defined as a single row in a dataset that was reported by an applicable manufacturer or GPO.

³ The Open Payments final rule 42 CFR § 403.910 provides applicable manufacturers and GPOs the opportunity to request a delay in publication pursuant to certain research payments or under a product research or development agreement for a period not to exceed four calendar years after the date the payment or other transfer of value was made, or upon the approval, licensure or clearance of the covered drug, device, biological, or medical supply by the FDA.

Over the course of the Open Payments program, CMS has published 28.22 million records, accounting for \$16.77 billion in payments and ownership and investment interests.

**Table 3: Program Year 2015 and Updated Program Year 2013 and 2014
Open Payments Summary Information**

Categories	Total
Program Year 2015
