Step 3 – Communicating the Quality Payment Program

A significant challenge with any new CMS program is adequately communicating the requirements to clinicians who may be included and need to participate. CMS is seeking thought leaders who enjoy thinking outside-of-the-box to find innovative ways to educate clinicians and generate an awareness about the Quality Payment Program, and to share insights and feedback from the community of practice peers.

Using the space provided below, in two to three paragraphs, discuss your ideal approach to effectively communicating the Quality Payment Program to clinicians who may have limited familiarity. Highlight the methods you would use, any partnerships you would form, challenges you may expect to face and how you plan to overcome those barriers, and ways to reduce burden. Use specific examples from your current role, if possible.
