## I. GENERAL INFORMATION

A. Background: The DMEPOS CBP was mandated by Congress through the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. The statute requires that Medicare replace the current fee schedule payment methodology for selected DMEPOS items with a competitive bidding process. The intent is to improve the effectiveness of the Medicare methodology for setting DMEPOS payment amounts, which will reduce beneficiary out-of-pocket expenses and save the Medicare program money while ensuring beneficiary access to quality items and services.
B. Policy: In implementing the DMEPOS CBP, the Centers for Medicare \& Medicaid Services (CMS) issues recurring update notifications on a quarterly basis. Instructions for updating the DMEPOS CBP files are included in these transmittals. The DMEPOS CBP files are provided to the DME Medicare Administrative Contractors (MACs) and the Pricing, Data Analysis, and Coding (PDAC) contractor via CMS's mainframe telecommunication system on a quarterly basis.

The Virtual Data Center (VDC) transmits the DMEPOS CBP files when received from the Competitive Bidding Implementation Contractor (CBIC) to the ViPS Medicare System (VMS), and VMS makes the file updates available to the contractors for use in processing DMEPOS CBP claims. Automated entry of the file additions, updates or deletions are done on a quarterly basis using fully refreshed files, for the following three DMEPOS CBP files: the Competitive Bidding Area (CBA) ZIP code file, the Healthcare Common Procedure Coding System (HCPCS) file, and the CBA pricing file. The CBIC transmits these three files to the CMS mainframe telecommunications system via Connect: Direct for VDC retrieval, while the VMS maintainer updates the supplier record files with the information provided in the VMS nightly extract.

For more information, see the Quarterly Updates Page
(https://www.dmecompetitivebid.com/quarterlyupdates) on the CBIC website.
