I. GENERAL INFORMATION

A. Background: The DHHS adopted the Phase III CAQH CORE, EFT and ERA Operating Rule Set that was implemented on January 1, 2014 under the Patient Protection and Affordable Care Act (ACA) of 2010. The Health Insurance Portability and Accountability Act (HIPAA) amended the Social Security Act (the Act) by adding Part C—Administrative Simplification—to Title XI of the Act, requiring the Secretary of DHHS (the Secretary) to adopt standards for certain transactions to enable health information to be exchanged more efficiently and to achieve greater uniformity in the transmission of health information. Through ACA, Congress sought to promote implementation of electronic transactions and achieve cost reduction and efficiency improvements by creating more uniformity in the implementation of standard transactions. This was done by mandating the adoption of a set of operating rules for each of the HIPAA transactions. The ACA defines operating rules and specifies the role of operating rules in relation to the standards. This RUN applies to chapter 22, section 80.2.

This CR deals with the regular update in CAQH CORE defined code combinations per Operating Rule 360 - Uniform Use of CARC and RARC (835) Rule.

CAQH CORE will publish the next version of the Code Combination List on or about October 1, 2022. This is based on the CARC and RARC updates as posted at the official ASC X12 website on or about July 1, 2022. This will also include updates based on the market-based review that CAQH CORE conducts once every two years to accommodate code combinations that are currently being used by health plans including Medicare, as the industry needs them.

See: <https://nex12.org/index.php/codes> for CARC and RARC updates and http://www.caqh.org/sites/default/files/core/phase-iii/code-combinations/CORE-required_CodeCombos.xlsx?token=_29xvBua for CAQH CORE defined code combination updates.

NOTE: Per ACA mandate, all health plans including Medicare must comply with CORE 360 Uniform Use of CARCs and RARCs (835) rule or CORE developed maximum set of CARC/RARC and CAGC combinations for a minimum set of four (4) business scenarios. Medicare can use any code combination if the business scenario is not one of the four (4) CORE defined business scenarios. With the four (4) CORE defined business scenarios, Medicare must use the code combinations from the lists published by CAQH CORE.
