Transmittal 14043	**Date: November 12, 2026**
	Change Request 14638

SUBJECT: Implementation of Changes in the End-Stage Renal Disease (ESRD) Prospective Payment System (PPS) and Payment for Dialysis Furnished for Acute Kidney Injury (AKI) in ESRD Facilities for Calendar Year (CY) 2027

I. SUMMARY OF CHANGES: The purpose of this Change Request (CR) is to implement the CY 2027 rate updates and policies for the ESRD PPS and for payments for renal dialysis services furnished to beneficiaries with AKI in ESRD facilities. This recurring update notification applies to publication 100-02, Medicare Benefit Policy Manual, chapter 11.

EFFECTIVE DATE: January 1, 2027
**Unless otherwise specified, the effective date is the date of service.*
IMPLEMENTATION DATE: January 4, 2027

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

III. FUNDING:
For Medicare Administrative Contractors (MACs):
The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is

not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

SUBJECT: Implementation of Changes in the End-Stage Renal Disease (ESRD) Prospective Payment System (PPS) and Payment for Dialysis Furnished for Acute Kidney Injury (AKI) in ESRD Facilities for Calendar Year (CY) 2027

EFFECTIVE DATE: January 1, 2027
**Unless otherwise specified, the effective date is the date of service.*
IMPLEMENTATION DATE: January 4, 2027

I. SUMMARY OF CHANGES: The purpose of this Change Request (CR) is to implement the CY 2027 rate updates and policies for the ESRD PPS and for payments for renal dialysis services furnished to beneficiaries with AKI in ESRD facilities. This recurring update notification applies to publication 100-02, Medicare Benefit Policy Manual, chapter 11.

II. GENERAL INFORMATION

A. Background: CY 2027 ESRD PPS and AKI Dialysis Payment Updates: Effective January 1, 2011, CMS implemented the ESRD PPS based on the requirements of section 1881(b)(14) of the Social Security Act (the Act). The ESRD PPS provides a single per treatment payment to ESRD facilities that covers all the resources used in furnishing an outpatient dialysis treatment. The ESRD PPS base rate is adjusted to reflect patient and facility characteristics that contribute to higher per treatment costs.

In accordance with section 1834(r) of the Act, as added by section 808(b) of the Trade Preferences Extension Act of 2015, CMS pays ESRD facilities for furnishing renal dialysis services to Medicare beneficiaries with AKI. CR 9598 implemented the payment for AKI renal dialysis services and provides detailed information regarding payment policies. Beginning January 1, 2025, payment will be made for renal dialysis services provided to AKI beneficiaries who dialyze at home at the same payment rate as in-center.

The ESRD PPS includes consolidated billing requirements for limited Part B services included in the ESRD facility's bundled payment. CMS periodically updates the lists of items and services that are subject to Part B consolidated billing and are therefore no longer separately payable when provided to ESRD beneficiaries by providers or suppliers other than ESRD facilities.

Effective January 1, 2025, all oral-only renal dialysis drugs and biological products are paid under the ESRD PPS.

The ESRD PPS contains several patient-level case mix adjustment factors, facility-level adjustments and add-on payment adjustments. The adult patient-level case-mix adjustment factors are for: age, body surface area, low body mass index, onset of renal dialysis services, and four comorbidity categories. The pediatric case-mix adjustment factors are based on two age categories (0-12 and 13-17) and two modalities (hemodialysis and peritoneal dialysis). The facility level adjustments are the wage-index, the rural adjustment, the Low-Volume Payment Adjustment (LVPA), and the Non-contiguous Areas Payment Adjustment (NAPA). The other payment adjustments are the outlier payment, the home dialysis training add-on payment adjustment (training add-on), the Transitional Drug Add-on Payment Adjustment

(TDAPA), the Transitional Add-on Payment Adjustment for New and Innovative Drugs and Supplies (TPNIES), the post-TDAPA add-on payment adjustment, and the transitional pediatric ESRD patient add-on payment adjustment (TPEAPA) for CYs 2024, 2025, and 2026. Of these payment adjustments, only the wage index and training add-on apply for AKI beneficiaries.

Further details on payment adjustments relevant for this CR are provided below. For detailed information on all ESRD PPS payment policies please see chapter 11 of the Benefit Policy Manual CMS Pub 100-02. We note that this background refers to current or historical policies and does not incorporate any policy changes effectuated by this CR:

Transitional Drug Add-on Payment Adjustment (TDAPA): The TDAPA is a payment adjustment under the ESRD PPS for certain new renal dialysis drugs and biological products. As discussed in the CY 2019 and CY 2020 ESRD PPS final rules, for new renal dialysis drugs and biological products that fall into an existing ESRD PPS functional category, the TDAPA helps ESRD facilities to incorporate new drugs and biological products and make appropriate changes in their businesses to adopt such products, provides additional payments for such associated costs, and promotes competition among the products within the ESRD PPS functional categories, while focusing Medicare resources on products that are innovative (83 FR 56935; 84 FR 60654). For new renal dialysis drugs and biological products that do not fall within an existing ESRD PPS functional category, the TDAPA is a pathway toward a potential base rate modification (83 FR 56935). The TDAPA eligibility requirements are set forth in the ESRD PPS regulations at 42 Code of Federal Regulations (C.F.R.) Subsection (§) 413.234. CMS generally bases the TDAPA on 100 percent of the Average Sales Price (ASP). If ASP is not available, the TDAPA is based on 100 percent of the Wholesale Acquisition Cost (WAC) and, when the WAC is not available, the payment is based on the drug manufacturer's invoice. Under CMS's conditional ASP reporting policy at § 413.234(c), as finalized in the CY 2020 ESRD PPS final rule (84 FR 60679) and clarified in the CY 2024 ESRD PPS final rule (88 FR 76409), if CMS determines that the latest full calendar quarter of ASP data is not available for any drug paid for using the TDAPA, we will stop applying the TDAPA for the new renal dialysis drug or biological product within the next 2-calendar quarters. ASP reflecting zero or negative sales is considered submitted for the purposes of the conditional ASP policy but not considered available for the purposes of TDAPA payment, so the TDAPA is instead based on WAC or invoice pricing as specified.

The TDAPA for a new renal dialysis drug or biological product that is used to treat or manage a condition for which there is an existing ESRD PPS functional category is paid for a period of 2 years. Following payment of the TDAPA, the ESRD PPS base rate will not be modified. While the TDAPA applies to a new renal dialysis drug or biological product, the drug or biological product is not considered an ESRD outlier service. The ESRD PPS includes Consolidated Billing (CB) requirements for limited Part B services included in the ESRD facility's bundled payment. CMS periodically updates the lists of items and services that are subject to Part B consolidated billing and are therefore no longer separately payable when provided to ESRD beneficiaries by providers other than ESRD facilities.

CMS reviews and issues TDAPA payment determinations on a quarterly basis for new renal dialysis drugs or biological products that fit within an existing ESRD PPS functional category.

For the TDAPA amount for phosphate binders, CMS pays an additional $36.41 per monthly claim to account for additional costs associated with furnishing the drugs in an ESRD facility during CYs 2025 and 2026, as finalized at 42 CFR 413.234(c)(4).

Post-TDAPA Add-on Payment Adjustment: Beginning January 1, 2024, the ESRD PPS provides additional payment for certain new renal dialysis drugs and biological products after the end of the TDAPA period under section 413.234(g). The post-TDAPA add-on payment adjustment is applied to all ESRD PPS payments and is calculated using utilization of the drug or biological product during the most recent twelve-month period for which data is available. The post-TDAPA add-on payment adjustment is calculated

annually and is applied for 12 calendar quarters following the end of the TDAPA period for a drug or biological product, conditional on the receipt of ASP data. If ASP data is not usable due to ASP reflecting zero or negative sales, the TDAPA is based on WAC or, if WAC is not available, invoice pricing. The post-TDAPA add-on payment adjustment amount is then multiplied by the patient-level case-mix adjustment factors for the patient and is added on to the ESRD PPS payment.

Transitional Pediatric ESRD Add-on Payment Adjustment (TPEAPA): Beginning January 1, 2024, the ESRD PPS provides the TPEAPA for all claims for services provided to pediatric ESRD patient under section 413.235(b)(2). The TPEAPA is equal to 30 percent of the per-treatment payment amount for the pediatric ESRD patient. The TPEAPA will be applied for CYs 2024, 2025, and 2026.

Low-Volume Payment Adjustment (LVPA): The ESRD PPS includes a payment adjustment for ESRD facilities which furnish a low-volume under section 413.232. The LVPA applies only for ESRD facilities with furnish fewer than 4,000 treatments over each of the past 3 cost reporting years and have not opened, closed, or received a new provider number due to a change in ownership (except where the change in ownership results in a change in facility type) in the 3 cost reporting years. For the purposes of determining the number of treatments for the LVPA treatments are aggregated for ESRD facilities that are under common ownership and within 5 road miles of the ESRD facility in question. There are several exemptions to the eligibility requirements for disasters or other emergencies at sections 413.232(g)(5) and (6). ESRD facilities must submit an attestation to its Medicare Administrative Contractor (MAC) to receive the LVPA. The deadline for this attestation is usually November 1st of the payment year in question, but has been extended several times as noted at section 413.232(e). The LVPA only applies to payment for adult patients.

Home and Self-Dialysis Training Add-on Payment: The ESRD PPS makes an additional payment for ESRD treatments which include training for home and self-dialysis. The training add-on amount is $96.50 and is adjusted by the ESRD facility's wage index. The training add-on does not apply during the onset of renal dialysis period, the first four months on dialysis. The training add-on is provided at section 413.235(c).

B. Policy: CY 2027 ESRD PPS and AKI Dialysis Payment Updates: Section 1881(b)(14)(F) of the Act requires an annual increase to the ESRD PPS base rate by an ESRD market basket increase factor, reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. That is, the ESRD bundled market basket increase factor minus the productivity adjustment will update the ESRD PPS base rate. In accordance with section 1834(r) of the Act, the payment rate for renal dialysis services provided to beneficiaries with AKI is the ESRD PPS base rate adjusted by the ESRD PPS wage index and, at the Secretary's discretion, adjusted on a budget neutral basis by any other adjustment factor applied under the ESRD PPS.

ESRD PPS Base Rate:

- A budget-neutrality adjustment factor for the wage index and related policies of 1.00260.
- A budget-neutrality adjustment factor for the changes to the low-volume payment adjustment, home dialysis training add-on, and pediatric payment adjustment factors of 0.98864.
- A $12.85 increase to the ESRD PPS base rate to account for the incorporation of phosphate binders to the base rate.
- A productivity-adjusted market basket increase of 1.9 percent.
- The CY 2027 ESRD PPS base rate is $297.52 ((($281.71 + $12.85) × 1.00260 × 0.98864) × 1.019 = $297.52).

Labor-related share:

- The labor-related share is 63.5 percent.

Wage index:

For CY 2027, the ESRD PPS uses the ESRD PPS wage index methodology established in CY 2025, which utilizes Bureau of Labor Statistics wage data by geographic area weighted by occupational mix based on freestanding ESRD facility cost report full-time equivalent data.

- The CY 2027 ESRD PPS wage index is updated to reflect the most recent wage data and the most recent full year of freestanding ESRD facility cost report data.
- A five percent cap will be applied to the reduction in the wage index for ESRD facilities from CY 2027.
- The wage index floor is 0.6000.
- The ESRD PPS wage index for an ESRD facility will be based on the most recent Core-Based Statistical Area (CBSA) delineations according to OMB 23-01 (Office of Management and Budget).

Outpatient Provider Specific File (PSF) Changes

Effective CY 2023, a permanent five percent cap was adopted and applied to all ESRD facilities on any decrease to an ESRD facility's CY 2025 final wage index from its final wage index in the prior year. Under the five percent cap policy, a new ESRD facility that opens during CY 2026 would be paid the wage index for the area in which it is geographically located for its first full or partial CY with no cap applied, because a new ESRD facility would not have a wage index in the prior CY.

In addition, as discussed earlier, for CY 2025 we began phasing out the rural adjustment for ESRD facilities that became urban in CY 2025 because of the adoption of the revised CBSA delineations based on OMB Bulletin 23–01 over a period of three years. Under this transition policy, these ESRD facilities will not receive a rural adjustment for CY 2027.

To implement this policy for CY 2027, MACs must update the following fields in the PSF for all ESRD facilities:

- **Supplemental Wage Index** - used for the prior CY wage index value
- **Supplemental Wage Index Indicator** - used to indicate the value in the "Supplemental Wage Index" field is the prior CY wage index and whether a rural transition applies.

MACs must update the "Supplemental Wage Index" and "Supplemental Wage Index Indicator" for all facilities that were active in CY 2026.

MACs must follow the steps below to ensure the appropriate values are applied in the Supplemental Wage Index and Supplemental Wage Indicator fields:

1. If the facility was not active for CY 2026, then skip the below steps and leave the "Supplemental Wage Index" and "Supplemental Wage Index Indicator" fields blank. If the facility was active for CY 2026, then follow the steps below.
2. Validate the accuracy of the facility's Federal Information Processing Standard (FIPS) state and county codes.
3. Validate the accuracy of the facility's CY 2026 CBSA based on the facility's FIPS state and county codes and the CBSA delineations defined in Office of Management and Budget Bulletin No. 23-01.
4. Identify the CY 2026 ESRD PPS wage index calculated by the Pricer software and used to pay claims for each ESRD facility in CY 2026, and add this wage index value to "Supplemental Wage Index" field

5. If the ESRD facility's "Supplemental Wage Index Indicator" for CY 2026 was "2", then update the value of "Supplemental Wage Index Indicator" to be "1". For all other providers that were active for CY 2026, update the value of "Supplemental Wage Index Indicator" to be "1".

Outlier Policy:

- CMS made the following updates to the adjusted average outlier service Medicare Allowable Payment (MAP) amount per treatment.
    - The adjusted average outlier service MAP amount per treatment is $41.83 for adult patients.
    - The adjusted average outlier service MAP amount per treatment is $63.27 for pediatric patients.
- CMS made the following updates to the Fixed Dollar Loss (FDL) amount that is added to the predicted MAP to determine the outlier threshold.
    - The FDL amount is $90.60 for adult patients.
    - The FDL amount is $229.49 for pediatric patients.
- CMS made the following changes to the list of outlier services.
    - Effective January 1, 2025, all renal dialysis drugs and biological products, except those currently paid for using TDAPA, are eligible for the outlier payment.
    - Renal dialysis drugs that are oral equivalents to injectable drugs are based on the most recent prices obtained from the Medicare Prescription Drug Plan Finder, are updated to reflect the most recent mean unit cost. In addition, CMS will add or remove any renal dialysis items and services as necessary. See Attachment A.
    - The mean dispensing fee of the National Drug Codes (NDCs) qualifying for outlier consideration is revised to $0.50 per NDC per month for claims with dates of service on or after January 1, 2027. See Attachment A.

Rural Adjustment Transition Policy:

CY 2027 represents the end of the rural phase out from the CY 2025 change to the CBSA delineation and no rural phase out adjustment will be applied for this year.

Effective beginning in CY 2025 the ESRD PPS rural adjustment will be determined based on the most recent CBSA delineations according to OMB 23-01. ESRD facilities which received the 0.8 percent rural adjustment in CY 2024 but were re-designated into an urban CBSA under the most recent delineations would receive a transitional phase-out of the rural adjustment wherein the ESRD facility would receive two-thirds of the adjustment (0.53 percent) for CY 2025, one-third of the adjustment (0.27 percent) for CY 2026, and no rural adjustment for CY 2027. For CY 2026 this is a payment adjustment factor of 0.0027. For the calculation of the imputed MAP under the outlier payment, the 1/3rd of the current 2.2 percent reduction factor would also be applied to the average MAP, with the resulting multiplicative factor being 0.9927.

Increase to the Base Rate for Phosphate Binders:

For CY 2027 we are increasing the ESRD PPS base rate by $12.85 to account for the inclusion of phosphate binders into the ESRD PPS base rate.

Changes to the Low-Volume Payment Adjustment (LVPA):

The LVPA increases payments to ESRD facilities which furnish low treatment volumes. Beginning January 1, 2027, we are expanding the LVPA to ESRD facilities, which furnish fewer than 8,000 treatments per year. ESRD facilities which furnished fewer than 8,000 treatments in each of the past three cost reporting years, would be eligible for one of 6 tiers of payment based on the median treatment volume of the past 3 cost reporting years. This does not change the other eligibility criteria for the LVPA or the aggregation of

treatment count for commonly owned ESRD facilities within 5 miles for the purposes of determining treatment volume for the LVPA.

Effective January 1, 2027, ESRD facilities which are eligible for the LVPA, are divided into one of six tiers based on the median treatment count of the past three cost-reporting years.

- ESRD facilities that furnished a median of fewer than 3,000 treatments over the past three cost reporting years will be categorized as Tier 1 and will receive an LVPA of 1.368 percent.
- ESRD facilities that furnished a median of between 3,000 and 3,999 treatments over the past three cost reporting years will be categorized as Tier 2 and will receive an LVPA of 1.249 percent.
- ESRD facilities that furnished a median of between 4,000 and 4,999 treatments over the past three cost reporting years will be categorized as Tier 3 and will receive an LVPA of 1.173 percent.
- ESRD facilities that furnished a median of between 5,000 and 5,999 treatments over the past three cost reporting years will be categorized as Tier 4 and will receive an LVPA of 1.120 percent.
- ESRD facilities that furnished a median of between 6,000 and 6,999 treatments over the past three cost reporting years will be categorized as Tier 5 and will receive an LVPA of 1.080 percent.
- ESRD facilities that furnished a median of between 7,000 and 7,999 treatments over the past three cost reporting years will be categorized as Tier 6 and will receive an LVPA of 1.050 percent.

Extension of the LVPA attestation deadline for CY 2027 payments:

CMS is extending the attestation deadline for the LVPA until December 31, 2026. ESRD facilities must attest by this date to receive the LVPA for payment year 2027, unless extraordinary circumstances justify an exception.

Changes to Payment for Pediatric Patients:

CMS is updating the case-mix adjustment factors and the separately billable services factors for all categories of pediatric patients beginning in CY 2027. The updated factors are as follows:

- For patients aged 12 and under who are on peritoneal dialysis the case-mix adjustment factor is 1.410 and the separately billable services modifier is 0.523.
- For patients aged 12 and under who are on hemodialysis the case-mix adjustment factor is 1.503 and the separately billable services modifier is 1.269.
- For patients aged 13 to 17 who are on peritoneal dialysis the case-mix adjustment factor is 1.436 and the separately billable services modifier is 0.734.
- For patients aged 13 to 17 who are on hemodialysis the case-mix adjustment factor is 1.536 and the separately billable services modifier is 1.531.

These updated factors are being implemented alongside the expiration of the Transitional Pediatric ESRD Add-on Payment Adjustment (TPEAPA) for CY 2027. Consistent with current policy, the TPEAPA will no longer apply for CY 2027 and onward.

CMS is also updating the LVPA to apply for renal dialysis services furnished to pediatric ESRD patients. ESRD facilities who wish to receive the LVPA for payments for adult or pediatric ESRD patients must attest for the LVPA using the established process.

Pediatric ESRD Facility Exception to the LVPA Aggregation of Treatment Volume for Commonly-Owned ESRD Facilities:

Beginning for payment year 2027, ESRD facilities that are Children's Hospitals or furnish at least 50% of treatments to pediatric ESRD patients can request an exception from CMS for the aggregation of treatment

volume for facilities under common ownership at 42 CFR 413.232(c) if they are under common ownership with one or more ESRD facilities that do not furnish at least 50 percent of treatments to pediatric ESRD patients. If the exception is granted, when the MAC determines the treatment volume for the ESRD facility which has received the exception, the MAC shall not consider the treatment volume for the commonly-owned facilities for which the exception has been granted when aggregating the number of treatments for commonly-owned facilities within 5 road miles.

Changes to Training Add-on Payment Adjustment:

CMS is increasing the training add-on payment adjustment beginning in CY 2027. The training add-on payment adjustment for CY 2027 and future years is $138.00. Additionally, we are allowing for the training add-on payment to apply for ESRD treatments during the onset period. To reduce duplicative payments during the onset period, we are reducing the onset payment adjustment to 1.311.

Post-TDAPA add-on payment adjustment amounts:

Effective January 1, 2027, the post-TDAPA add-on payment adjustment amount will be updated quarterly throughout the year. In this CR, we are publishing the post-TDAPA add-on payment adjustment amounts for Q1 CY 2027 and including estimated post-TDAPA add-on payment adjustment amounts for future quarters.

For CY 2027 three drugs, Korsuva®, Defencath®, and Vafseo® are set to be included in the calculation of the post-TDAPA add-on payment adjustment. Korsuva® will be included for only the first quarter. Defencath® and Vafseo will be included for all calendar quarters.

The quarter 1 post-TDAPA add-on payment adjustment amount is $0.0793 for Korsuva®, $8.3220 for Defencath®, and $0.9970 for Vafseo®. The final post-TDAPA add-on payment adjustment amounts for the first quarter of CY 2027 and the estimated post-TDAPA add-on payment adjustment amounts for the other 3 quarters are as follows:

Q1 (January - March): $9.3983 (Korsuva®, Defencath®, and Vafseo®)

Q2 (April - June): $9.3190 (Defencath® and Vafseo®)

Q3 (July - September): $9.3190 (Defencath® and Vafseo®)

Q4 (October - December): $9.3190 (Defencath® and Vafseo®)

TDAPA: There are no eligible renal dialysis drugs for which ESRD facilities will continue to receive payment using the TDAPA under the ESRD PPS for CY 2027.

TPNIES: There are no renal dialysis equipment or supplies eligible for the TPNIES for CY 2027.

TPNIES for Capital-Related Assets (CRAs):

There are no TPNIES for CRAs continuing for CY 2027 that are home dialysis machines for hemodialysis.

- The CY 2027 average per treatment CRA for TPNIES offset amount is $10.63.

AKI Dialysis Payment Rate Updates:

- The AKI dialysis payment rate for CY 2027 is $297.52, which is the base rate under the ESRD PPS for CY 2027.
- AKI dialysis claims are eligible for the wage-adjusted add-on per treatment adjustment for home and self-dialysis training.
- The labor-related share is 63.5 percent.
- The AKI dialysis payment rate is adjusted for wages using the same wage index that is used under the ESRD PPS.
- The AKI dialysis payment rate is not reduced for the ESRD Quality Incentive Program (QIP).
- The TDAPA does not apply to AKI claims.
- The TPNIES does not apply to AKI claims.
- The TPEAPA does not apply to AKI claims.
- The post-TDAPA payment adjustment does not apply to AKI claims.
- Unless otherwise noted above, all patient-level and facility-level payment adjustments under the ESRD PPS do not apply to AKI claims.

III. BUSINESS REQUIREMENTS TABLE

"Shall" denotes a mandatory requirement, and "should" denotes an optional requirement.

Number	Requirement	Responsibility								
		A/B MAC			DME MAC	Shared-System Maintainers				Other
		A	B	HHH		FISS	MCS	VMS	CWF	
14638.1	The ESRD PPS Pricer shall include all CY 2027 ESRD PPS updates.									ESRD Pricer
14638.2	Medicare contractors shall pay claims (type of bill 72X) with the CY 2027 ESRD PPS Pricer for renal dialysis services furnished on or after January 1, 2027.					X				
14638.3	Medicare contractors shall update the provider file for ESRD facilities as necessary to reflect: 1. Attested low volume facilities if applicable; 2. Revised CBSA codes if applicable; 3. Quality indicator for any applicable QIP adjustments.	X								
14638.3.1	Medicare contractors shall update the Supplemental Wage Index and Supplemental Wage Index Indicator fields for CY 2026 for all ESRD facilities, in accordance with the instructions provided under the Policy section of this CR.	X								
14638.3.2	Medicare contractors shall determine whether an ESRD facility is eligible for the LVPA by using the	X								

Number	Requirement	Responsibility								
		A/B MAC			DME MAC	Shared-System Maintainers				Other
		A	B	HHH		FISS	MCS	VMS	CWF	
	updated treatment volume threshold of 8,000. As such, an ESRD facility is alible for the LVPA only if it furnished less than 8,000 treatments in each of the 3 cost reporting years (based on as-filed or final settled 12-consecutive month cost reports, whichever is most recent. Contractors shall continue to evaluate attestations for the LVPA using the same processes, including: • Treatment volume for the purpose of the LVPA should aggregate the treatment volume of all commonly owned ESRD facilities within 5 road miles specified at 42 CFR 413.232(c). Unless an exception has been granted for under § 413.232(g)(7) in which case the aggregation of treatment volume should not include the treatment volume of the commonly-owned ESRD facility for which the exception has been granted. • The ESRD facility must not have opened, closed, or received a new provider number due to a change in ownership (except where the change in ownership results in a change in facility type) in the 3 cost reporting years (based on as-filed or final settled 12-consecutive month cost reports, whichever is most recent) preceding the payment year, except as specified in § 413.232(g)(6). • Application of any exemptions for disasters or other emergencies under §§ 413.232(g)(5) or 413.232(g)(6). • Recoupment of payments for ineligible ESRD facilities which attest for the LVPA as specified at § 413.232(h). We anticipate this change in eligibility will result in an increase in the number of LVPA eligible ESRD facilities nationally by about 1100.									
14638.3.3	Medicare contractors shall update the provider file for ESRD facilities eligible for the LVPA by including the appropriate tier value in the Outpatient Provider	X

IV. PROVIDER EDUCATION

Medicare Learning Network® (MLN): CMS will develop and release national provider education content and market it through the MLN Connects® newsletter shortly after we issue the CR. MACs shall link to relevant information on your website and follow IOM Pub. No. 100-09 Chapter 6, section 50.3.3 for distributing the newsletter to providers. When you follow this manual section, you don't need to separately track and report MLN content releases. You may supplement with your local educational content after we release the newsletter.

Impacted Contractors: A/B MAC Part A

V. SUPPORTING INFORMATION

Section A: Recommendations and supporting information associated with listed requirements: N/A

"Should" denotes a recommendation.

X-Ref Requirement Number	Recommendations or other supporting information:

Section B: All other recommendations and supporting information: N/A

VI. CONTACTS

Post-Implementation Contact(s): Contact your Contracting Officer's Representative (COR).

VII. FUNDING

Section A: For Medicare Administrative Contractors (MACs):
The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question

and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

Medicare Benefit Policy Manual

Chapter 11 - End Stage Renal Disease (ESRD) and Acute Kidney Injury (AKI)

Table of Contents
(Rev. 14043; Issued: 11-12-26)

50.2 - Inclusion of Phosphate Binders in the ESRD PPS Base Rate

20.3.1 – Drug Designation Process

(Rev. 14043, Issued: 11-12-26, Effective: 01-01-27, Implementation: 01-04-27)

A. Definition of a New Renal Dialysis Drug or Biological Product

A "new renal dialysis drug or biological product" is an injectable, intravenous, oral or other form or route of administration drug or biological product that is used to treat or manage a condition(s) associated with ESRD. It must be: (1) approved by the Food and Drug Administration (FDA) on or after January 1, 2020, under section 505 of the Federal Food, Drug, and Cosmetic Act or section 351 of the Public Health Service Act; (2) commercially available, and; (3) designated by CMS as a renal dialysis service under §413.171.

B. Determination of Whether a New Renal Dialysis Drug or Biological Product is Included in the ESRD PPS Bundled Payment

To determine when a new renal dialysis drug or biological product is included in the ESRD PPS bundled payment, CMS will:

- Review the new product's FDA labeling data and information;
- Review the new product's information presented for obtaining a HCPCS code; and
- Conduct an internal medical review following the announcement of the new product's FDA and HCPCS decision.

1. If the new renal dialysis drug or biological product is used to treat or manage a condition for which there is an existing ESRD PPS functional category, the new renal dialysis drug or biological product is considered included in the ESRD PPS bundled payment, and the following steps occur:

- The new renal dialysis drug or biological product is added to the existing ESRD PPS functional category.
- Unless excluded, the new renal dialysis drug or biological product is paid for using the Transitional Drug Add-On Payment Adjustment (TDAPA) (see section 20.3.1.C below) if it meets the TDAPA eligibility requirements outlined at §413.234(c)(5). Drugs excluded from TDAPA eligibility, effective January 1, 2020, include drugs approved by the FDA under section 505(j) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) and drugs approved under section 505(c) of the FD&C Act that are classified by FDA as new drug application (NDA) Types 3, 5, 7 or 8, Type 3 in combination with Type 2 or Type 4, Type 5 in combination with Type 2, or Type 9 when the "parent NDA" is Type 3, 5, 7 or 8.

  NOTE: If not eligible for the TDAPA, the new renal dialysis drug or biological product qualifies as an ESRD outlier service.

  For more information regarding the outlier policy see §60.D of this chapter.

2. If the new renal dialysis drug or biological product is used to treat or manage a condition for which there is not an existing ESRD PPS functional category, the new renal dialysis drug or biological product is not considered included in the ESRD PPS bundled payment and the following steps occur:

- CMS notifies the TDAPA applicant of its TDAPA determination.

- CMS adds a new ESRD PPS functional category or revises an existing ESRD PPS functional category through rulemaking for the condition that the new renal dialysis drug or biological product is used to treat or manage.
- The new renal dialysis drug or biological product is paid for using the TDAPA for a period of at least 2 years until sufficient claims data for rate setting analysis is available.
- Following payment of the TDAPA, CMS undertakes rulemaking to modify the ESRD PPS base rate, if appropriate, to account for the new renal dialysis drug or biological in the ESRD PPS bundled payment.

NOTE: Following payment of the TDAPA, the new renal dialysis drug or biological product qualifies as an ESRD outlier service.

C. Transitional Drug Add-On Payment Adjustment (TDAPA)

The TDAPA is a payment adjustment under the ESRD PPS for certain new renal dialysis drugs and biological products. To be eligible for the TDAPA a drug must have an HCPCS application submitted in accordance with the official Level II HCPCS coding procedures and have submitted an application for the TDAPA prior to January 1, 2028, or within three years of FDA approval under section 505 of the Federal Food, Drug, and Cosmetic Act or section 351 of the Public Health Service Act. Applications for the TDAPA under the ESRD PPS must be submitted in the electronic application intake system, Medicare Electronic Application Request Information System™ (MEARIS™). Information regarding the application process, any renal dialysis drugs and biological products that have been determined eligible for the TDAPA, and their respective payment amounts is available on the CMS website: https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ESRDpayment/ESRD-Transitional-Drug

1. New renal dialysis drugs and biological products that fall in an existing ESRD PPS functional category and are eligible for the TDAPA.

Basis of Payment

The TDAPA is based on 100 percent of average sales price (ASP), which CMS receives from the drug or biological product manufacturer. Subject to the ASP conditional policy (described below in § 20.3.1.C.3), if ASP is not available, then the TDAPA is based on 100 percent of wholesale acquisition cost (WAC) and, when WAC is not available, the payment is based on the drug manufacturer's invoice.

Duration of the TDAPA

The TDAPA for these products is paid for 2 years. The TDAPA payment period begins on the effective date of the CMS Change Request (CR) implementing the TDAPA for the drug or biological product. During the time a new renal dialysis drug or biological product is eligible for the TDAPA, it is not an eligible ESRD outlier service as defined under 42 CFR § 413.237(a)(1) and therefore is ineligible for outlier payment.

2. New renal dialysis drugs and biological products that do not fall in an existing ESRD PPS functional category and are eligible for the TDAPA.

Basis of Payment

In general, the TDAPA is based on 100 percent of ASP, which CMS receives from the drug or biological product manufacturer. Subject to the ASP conditional policy (described below in 20.3.1.C.3), if ASP is not available *because no ASP has yet been made available*, then the TDAPA is based on 100 percent of WAC and, when WAC is not available, the payment is based on the drug manufacturer's invoice. *If ASP is reported but is not usable for a given quarter because it is zero or negative and there is a prior quarter ASP that is usable, the TDAPA will be based on that older ASP data before reverting to WAC or invoice pricing.*

Under 42 CFR § 413.234(c)(4), the TDAPA for phosphate binders is based on 100 percent of ASP plus an additional amount derived from 6 percent of per-patient phosphate binder spending based on utilization and cost data.

Duration of the TDAPA

The TDAPA is paid until sufficient claims data for rate setting analysis for the new renal dialysis drug or biological product is available, but not for less than 2 years. The TDAPA payment and data collection periods for these drugs and biological products begin on the effective date of the applicable CMS ESRD PPS annual update CR for MACs and ESRD facilities. During the time a new renal dialysis drug or biological product is eligible for the TDAPA, it is not an eligible outlier service as defined under 42 CFR § 413.237(a)(1) and therefore is ineligible for outlier payment.

3. ASP conditional policy

If CMS does not receive a full calendar quarter of ASP data for a new renal dialysis drug or biological product within 30 days of the last day of the 3rd calendar quarter after CMS begins applying the TDAPA for the product, CMS will no longer apply the TDAPA for that product beginning no later than 2-calendar quarters after CMS determines a full calendar quarter of ASP data is not available.

If CMS stops receiving the latest full calendar quarter of ASP data for a new renal dialysis drug or biological product during the applicable time period the TDAPA is applied, CMS will no longer apply the TDAPA for the product beginning no later than 2-calendar quarters after CMS determines that the latest full calendar quarter of ASP data is not available.

NOTE: for purposes of this conditional policy, in circumstances where a manufacturer submitted ASP data reflecting zero or negative sales during the TDAPA period, CMS is considered to have received the latest full calendar quarter of ASP data, and CMS would not discontinue TDAPA payment under the conditional policy in § 413.234(c).

Information regarding the submission of ASP data is available on the CMS website: https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Part-B-Drugs/McrPartBDrugAvgSalesPrice.

D. Determination of When an Oral-Only Drug is No Longer Oral-Only

An “oral-only drug” is a drug or biological product with no injectable functional equivalent or other form of administration other than an oral form.

An “oral-only drug” is no longer considered “oral-only” if an injectable functional equivalent or other form of administration of the oral-only drug is approved by the FDA.

50.2- Inclusion of Phosphate Binders in the ESRD PPS Base Rate

(Rev. 14043, Issued: 11-12-26, Effective: 01-01-27, Implementation: 01-04-27)

As discussed in 20.3.D of this chapter, CMS finalized a policy in the CY 2011 ESRD PPS final rule (75 FR 49044) to delay payment for oral-only renal dialysis drugs and biological products under the PPS until January 1, 2014. This was further delayed until CY 2025 as a result of legislation. Phosphate binders are a renal dialysis drug that falls within the bone and mineral metabolism ESRD PPS functional category. Prior to CY 2025, phosphate binders were considered oral-only and were excluded from the ESRD PPS. Beginning January 1, 2025, all oral only drugs and biological products, including phosphate binders, were incorporated into the ESRD PPS. Phosphate binders were paid for using the TDAPA for a TDAPA period of 2 years.

Effective January 1, 2027, the ESRD PPS base rate increased by $12.85 to account for phosphate binders. To determine this base rate increase, CMS used the total units of oral phosphate binders and the total number of paid hemodialysis-equivalent dialysis treatments furnished, as derived from Medicare ESRD facility claims (that is, the 837-institutional form with bill type 072X) for the second, third, and fourth quarters of calendar year 2025 and for the first and second calendar quarters of 2026. CMS also used the weighted average ASP based on the most recent determinations by CMS. Lastly, CMS calculated an operational cost component equal to an amount approximately equivalent to 6 percent of observed ASP-based expenditures. CMS used this methodology to calculate the average per treatment payment amount for phosphate binders that is added to the ESRD PPS base rate (see 42 CFR § 413.234(g)).

60 - ESRD PPS Case-Mix Adjustments ESRD PPS Payment Adjustments

(Rev. 14043, Issued: 11-12-26, Effective: 01-01-27, Implementation: 01-04-27)

The ESRD PPS includes patient-level adjustments (also known as the case-mix adjustments), facility-level adjustments, and training adjustments, as well as an outlier payment. In addition, the ESRD PPS includes certain add-on payment adjustments as discussed in § 60.C of this chapter. Under the ESRD PPS, the beneficiary co-insurance amount is 20 percent of the total ESRD PPS payment, after the deductible (see §60.E of this chapter).

Note: In general, the ESRD PPS case-mix adjustments, facility level adjustments and add-on payment adjustments do not apply to AKI beneficiaries. The only payment adjustments that apply to AKI dialysis claims are the ESRD PPS wage index and, beginning January 1, 2025, the add-on payment adjustment for home and self-dialysis training.

A. Patient-level case-mix adjustments

The ESRD PPS base rate is adjusted for characteristics of both adult and pediatric patients to account for case-mix variability. Pediatric patient-level adjusters (see §60.A.6 of this chapter), consist of combinations of two age categories and two dialysis modalities. The adult case-mix adjusters include age, body surface area (BSA), low body mass index (BMI), and six comorbidity categories (three acute and three chronic), and the onset of renal dialysis. Based on the refinement of the ESRD PPS, effective January 1, 2016, adult case-mix payment adjustments are made for four comorbidity categories (two acute and two chronic) as indicated in the chart below. The comorbidity categories of bacterial pneumonia *and* monoclonal gammopathy were removed.

1. Adult case-mix adjusters

This section presents a list of the ESRD PPS case-mix adjusters for adults and provides several examples using the adult case-mix adjusters implemented in CY 2011 and refined in CY 2016. The onset adjustment factor was further refined *effective* CY 2027. Any revisions to the case-mix adjusters will be addressed in subsequent rulemaking.

Adult Patient-Level Characteristics	Adjustment Value	
	CY 2011-2015	Beginning CY 2016
Age: 18-44	1.171	1.257
Age: 45-59	1.013	1.068
Age: 60-69	1.000	1.070
Age: 70-79	1.011	1.000
Age: 80+	1.016	1.109
Body Surface Area (per 0.1 m^2)	1.020	1.032
Low Body Mass Index (BMI <18.5)	1.025	1.017
Onset of Renal Dialysis <4 Months	1.510	1.327**
Pericarditis (acute)	1.114	1.040
Bacterial pneumonia (acute)*	1.135	---
Gastro-intestinal tract bleeding (acute)	1.183	1.082
Hereditary hemolytic or sickle cell anemia (chronic)	1.072	1.192
Myelodysplastic syndrome (chronic)	1.099	1.095
Monoclonal gammopathy (chronic)*	1.024	---

*Were removed effective January 1, 2016.

** *The onset adjustment factor was reduced to 1.311 effective January 1, 2027*

Calculating the ESRD PPS Bundled Payment Amount

The following example demonstrates the calculation of the ESRD PPS bundled payment in an urban area with a wage index of 1.10. Before giving the particulars of the dialysis patient for the example, shown first

is how to calculate the labor-adjusted base rate, which is the starting point for the computation of the case-mix adjusted base rate (the examples below use rates effective January 1, 2026).

- Base rate: $281.71
- Labor-related share of base rate: $281.71 * 0.552 = $155.50
- Wage index adjusted labor-related share: $155.50 * 1.1000 = $171.05
- Non labor-related share of base rate: $281.71 * (1 - 0.552) = $126.21
- Wage index adjusted base rate: $171.05 + $126.21 = $297.26

Provided next is the continuation of the example with the inclusion of the patient characteristics portion of the payment.

A 45 year old male Medicare beneficiary is 187.96 cm. (1.8796 m.) in height and weighs 95 kg. He receives dialysis in an ESRD facility on January 1, 2026. Using the formula for BMI, note that the patient is not underweight, having a BMI of 26.89 kg/m^2, which is greater than the threshold value of 18.5 kg/m^2.

$BMI_{Patient} = weight_{kg} / height\ (m^2)$
$= 95/1.8796^2$
$= 95/3.5329$
$= 26.89$

The formula for calculation of a patient's BSA is:

- 0.007184 multiplied by height in meters $^{0.725}$ multiplied by weight in kg. $^{0.425}$
- or $BSA = 0.007184 * height_{cm}^{0.725} * weight_{kg}^{0.425}$

The BSA for the patient in this example is calculated as:

$BSA_{Patient} = 0.007184 * 187.96^{.725} * 95^{.425}$
$= 0.007184 * 44.5346 * 6.9268$
$= 2.2161$

Using the adult case-mix adjusters table shown above, the BSA multiplier is 1.032. The patient's case-mix adjustment or payment multiplier (PM) based on his BSA of 2.2161 is computed as follows:

$PM_{BSA} = 1.032^{(2.2161-1.90)/0.1}$
$= 1.032^{3.161}$
$= 1.1047$

The example patient's PM would reflect the applicable case-mix adjustments from the adult case-mix adjusters table above for both age and BSA and may be expressed as:

$PM_{Patient} = PM_{age} * PM_{BSA}$
$= 1.068 * 1.1047$
$= 1.1798$

The example patient's ESRD payment rate for treatments furnished in his ESRD facility (assuming a wage index of 1.000) would be:

$281.71* 1.1798 = $332.36

NOTE: This example is computed without regard to other adjustments (e.g., outlier payments, training add-on, low-volume adjustment, etc.).

Additionally, this case-mix adjustment multiplier would be applied to any post-TDAPA add-on payment adjustment amounts applicable for the claim. For example, if the post-TDAPA add-on payment adjustment amount for the quarter of the claim in question was $0.50, the post-TDAPA add-on to the per-treatment payment rate would be:

$0.50*1.1798 = $0.59

2. Patient Age

There are 5 age categories for adults (18-44; 45-59; 60-69; 70-79; and 80 and above) in the ESRD PPS and each category has a separate case-mix adjuster. Note that when a beneficiary reaches a birthday that results in a different age category, the age change is effective from the first day of the birthday month, regardless of the date the birthday occurs in that month. The case-mix adjustment factor corresponding to the age of the dialysis patient is multiplied by the wage index adjusted base rate as a step in the calculation of the ESRD PPS per treatment payment amount. The examples shown below draw on values from the table of the CY 2016 adult case-mix adjusters as well as the discussion of the wage adjusted ESRD PPS base rate found in the section above (examples below are using rates effective January 1, 2026).

- Example 1: Mr. Taylor is 38 years of age and is classified in the 18-44 age group with an associated case-mix adjuster of 1.257. Applying the case-mix adjuster of 1.257 to the wage index adjusted base rate of $281.71 (assuming a wage index of 1.000) yields the age adjusted base rate amount of $354.11 ($281.71 x 1.257 = $354.11).

- Example 2: Mrs. Williams was born on July 4, 1936. On June 15, 2016, she is 79 years old and is classified in the 70-79 age category with a case-mix adjustment of 1.000 (the reference group). However, beginning with dialysis treatments occurring on and after July 1, 2016, she will move into the 80+ age group with an associated case-mix multiplier of 1.109.

- Example 3: Mr. Davis was born on September 29, 1971. For dialysis treatments occurring in August 2016, he is 44 years old and would be classified in the 18-44 age group with an associated case-mix adjuster of 1.257. Beginning with dialysis treatments occurring on and after September 1, 2016, he is classified in the 45-59 age category with a case-mix adjuster of 1.068 because he is considered to have attained age 45 on September 1.

3. Body Size: Low Body Mass Index (BMI) and/or Body Surface Area (BSA)

Low BMI and BSA are two measures used to estimate body size. Both measures are strong predictors of variation in costs and are closely associated with the duration and intensity of dialysis necessary to achieve a therapeutic dialysis target for ESRD patients. Both are objective measures that are computed using height and weight data located on the patient claim. The BMI and BSA are calculated for all beneficiaries. Low BMI is associated with higher costs due to additional resources that may be necessary to address malnutrition or frailty. BSA is associated with higher costs due to more time on the dialysis machine.

Although height and weight are taken at intervals throughout any given month of dialysis treatment, the measurements for the purpose of payment must be taken as follows:

- The dry weight of the patient is measured and recorded in kilograms immediately following the last dialysis session of the month.

- The patient height is measured and recorded in centimeters during the last dialysis session of the month. The measurement is required no less frequently than once per year.

The formula for the calculation of the BMI is weight in kilograms divided by height in meters squared, or kg/m^2. As an example, the designated low BMI adjustment factor of 1.017 (see §60.A.1 of this chapter) is only applied for those beneficiaries with a BMI value that is less than $18.5 kg/m^2$ which is a clinical measure of being underweight and an indicator of malnutrition.

The formula for the calculation of the BSA is $BSA = w^{0.425} * h^{0.725} * 0.007184$ where w and h represent weight in kilograms and height in centimeters. The BSA factor is defined as an exponent equal to the value of the patient's BSA minus the reference BSA of 1.90 divided by 0.1. Using the example of adult adjusters above, the BSA adjustment factor of 1.032 is then exponentiated based on the calculated BSA factor as $1.032^{(BSA-1.90)/0.1}$. The reference BSA used to calculate the BSA is the national average among Medicare dialysis patients.

4. Onset of Dialysis

Effective January 1, 20*27*, the ESRD PPS onset of renal dialysis adjustment is 1.3*11*. An ESRD facility may only receive the onset of dialysis adjustment for adult Medicare ESRD beneficiaries. The onset period is defined as the initial 120 days of outpatient maintenance dialysis, which is designated by the first date of when regular chronic dialysis began as reported on the CMS Form 2728. The onset of dialysis adjustment factor is a multiplier used in the calculation of the ESRD PPS per treatment payment amount for dialysis furnished in either an ESRD facility or home setting. For example, when a dialysis patient is not eligible for the Medicare ESRD benefit at the initiation of their maintenance dialysis but is Medicare eligible at the end of 85 days, the onset of dialysis adjustment will be applied to the ESRD facility's ESRD PPS base rate for each treatment furnished in the following 35 days. However, if the patient is not Medicare eligible at any time during the initial 120 days of receiving maintenance dialysis, the onset of dialysis adjustment will not apply.

The onset of dialysis adjustment is a one-time adjustment. It is not applied when a patient changes ESRD facilities or after a failed transplant. If a patient changes or transfers to another ESRD facility during the initial 120 days, the new ESRD facility will only receive the onset of dialysis adjustment for the remaining time. In other words, the 120 day "clock" does not start over.

If the onset of dialysis adjustment is being applied to the ESRD PPS base rate, then those treatments would not be eligible for the comorbidity adjustment. However, those treatments are eligible for an outlier

payment when appropriate.

5. Comorbidity Categories

The two acute comorbidity categories are pericarditis and gastro-intestinal tract bleeding with hemorrhage. The two chronic comorbidity categories are myelodysplastic syndrome and hereditary hemolytic anemia (including sickle cell anemia). For each patient only the single comorbidity with the largest adjustment factor will be applied to the payment calculation, as explained in the CY 2011 ESRD PPS final rule (75 FR 49106). The related comorbidity diagnosis codes can be found at the CMS ESRD Payment Web site located at https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ESRDpayment/Patient-Level-Adjustments.html

NOTE: Prior to January 1, 2016, the ESRD PPS included payment adjustments for the comorbidity categories of bacterial pneumonia and monoclonal gammopathy, which were removed effective January 1, 2016.

The ESRD facility is responsible for obtaining documentation of the presence of an acute or chronic comorbidity. If an ESRD facility is unaware of the existence of a comorbidity because it does not impact the facility's costs, then the ESRD facility should not expect to receive a comorbidity adjustment. The comorbidity payment adjustment is only applied if the appropriate diagnosis code, specified under one of the categories above, is identified on the ESRD claim. Comorbidities other than the two acute and the two chronic conditions identified above do not qualify for a comorbidity adjustment. Even if an ESRD patient has or has had one of the four conditions that would qualify for a comorbidity payment adjustment, the condition must be currently active and effect the cost of care for the ESRD facility to be eligible to receive the adjustment.

To qualify for the comorbidity adjustment there must be adherence to diagnosis coding requirements. Diagnosis codes are updated annually as stated in Pub. 100-04, Chapter 23, section 10, are posted at http://www.cms.gov/Medicare/Coding/ICD10/index.html, and are effective each October 1st.

For transfer patients, it is expected that ESRD facilities will work together on the appropriate transfer of information to facilitate appropriate billing for dialysis services. The counting of treatments for an acute comorbidity adjustment is based on the patient and not on the ESRD facility. Therefore, counting does not restart when a beneficiary moves to a new ESRD facility but rather continues for the remaining 4 months.

a. Duration of Acute Comorbidity Adjustment

Payment for an acute comorbidity adjustment begins in the month in which the diagnosis is established and lasts for the next 3 consecutive patient months. A patient month is any month in which a dialysis treatment is furnished, and an acute comorbidity applies.

The acute diagnosis comorbidity adjustment is applied to each dialysis treatment for 4 patient months. If a second comorbidity is diagnosed during that period (either acute or chronic), then the adjustment is made using the higher adjustment factor. At no time is an adjustment applied for more than one comorbidity.

When there is a recurrence of an acute comorbidity within the 4 patient-month period, there will not be an extension of the 4 patient-month adjustment. A recurrence is defined as a new episode of a comorbidity that was previously experienced by an individual beneficiary. However, if the recurrence happens after the

completion of the 4-month period, then a new comorbidity adjustment for 4 months would start.

- Example – A male patient has been receiving hemodialysis since January 2010. He had a 2-week hospitalization due to a fracture in mid-January 2016. During his stay in the hospital, he was diagnosed with gastro-intestinal tract bleeding with hemorrhage on January 20, 2016. He resumed his outpatient maintenance dialysis on January 29, 2016. The 4 patient-months in which the patient's ESRD facility would be eligible to have the comorbidity adjustment applied to each dialysis treatment are January through April 2016.

b. Duration of Chronic Comorbidity Adjustment

The chronic diagnosis comorbidity adjustment is applicable only when the comorbidity effect*s* the cost of dialysis care and when that chronic diagnosis comorbidity appears on the claim. The adjustment does not automatically continue each month. When an acute diagnosis comorbidity with a higher adjustment value is applicable at the same time a chronic comorbidity applies, then the higher adjustment will be applied for 4 patient-months and then revert to the lower chronic comorbidity payment adjustment factor.

6. Pediatric case-mix adjusters: Age and dialysis modality

Pediatric patients are beneficiaries with ESRD who are under the age of 18. The same base rate is used for adult and pediatric patients, which is also adjusted by the area wage index. However, the base rate for pediatric patients is not adjusted for case-mix as adjustments used for adult patients. The pediatric payment adjustments use only two age categories (<13, age 13-17) and dialysis modality (PD or HD).

The pediatric case-mix adjusters, applicable for CY 2011, are shown below. These values are presented for the purpose of demonstrating the computations shown in the examples in the following sections. Any revisions to the case-mix adjusters will be published in subsequent rulemaking.

Based on the two classification categories for age and modality, there are four pediatric classification groups.

Pediatric Patient-Level Characteristics	Adjustment Value		
	CY 2011-2015	CY 2016 - *2026*	*Beginning CY 2027*
Age: <13, Modality: PD	1.033	1.063	*1.410*
Age:<13, Modality: Hemo	1.219	1.306	*1.503*
Age:13-17, Modality: PD	1.067	1.102	*1.436*
Age:13-17, Modality: Hemo	1.277	1.327	*1.536*

ESRD facilities receive*d* an additional transitional pediatric ESRD add-on payment adjustment (TPEAPA) for renal dialysis services furnished to pediatric ESRD patients (as defined at §413.171) from 2024 through 2026. This TPEAPA *represented* an increase in payment of 30% of the per-treatment payment amount. The TPEAPA *was* not an increase to the *2016-2026* case-mix adjustment factors displayed above, but it function*ed* similarly to an increase to the above case-mix adjustment factors of 30% (1.3 multiplier). The TPEAPA applie*d* for calendar years 2024, 2025 and 2026 as CMS collects

additional data on the costs associated with treating pediatric ESRD patients. The TPEAPA d*id* not impact the outlier services multipliers or the outlier payment in any way.

ESRD facilities do not *receive* the rural adjustment, described in §60.B.3, for pediatric beneficiaries. However, they are eligible for training add-on and outlier payments (described in §60.C.1 and §60.D, of this chapter respectively). *Beginning January 1, 2027, eligible ESRD facilities may receive the low-volume payment adjustment, described in §60.B.1, for renal dialysis services furnished to pediatric beneficiaries, if all other requirements are met.*

The following example demonstrates the calculation of the payment rate for a pediatric patient who receives dialysis at an ESRD facility and is located in an urban area with a wage index of 1.10. The example also shows the application of the training add-on for eligible training treatments. Before giving the particulars of the pediatric dialysis patient, shown first is the calculation of the labor-adjusted base rate of $297.26, which is the starting point for the computation of the case-mix adjusted base rate (the examples below use rates effective January 1, 2026, *and accordingly applies the 30% TPEAPA*).

- Base rate: $281.71
- Labor-related share of base rate: $281.71 * 0.552 = $155.50
- Wage index adjusted labor-related share: $155.50 * 1.1000 = $171.05
- Non labor-related share of base rate: $281.71 * (1 - 0.552) = $126.21
- Wage index adjusted base rate: $171.05 + $126.21 = $297.26

Provided next is the continuation of the example with the characteristics of the pediatric patient.

- Andrew, a 12-year-old male, has been on CCPD since June 2020. His mother, who assists him with his dialysis at home, is no longer able to assist with dialysis beginning May 10, 2026. His aunt, who lives nearby, has agreed to be the caregiver and assist him with his dialysis. The aunt required 17 training sessions at an ESRD facility to become knowledgeable and skilled sufficiently to perform this role. These training sessions began May 16 and ended June 10. The above pediatric classification table reveals that Andrew's pediatric dialysis classification group is cell 1, with an associated patient multiplier of 1.063. During the months of May and June 2026, the ESRD payment rate per HD- equivalent treatment at a facility with a wage index of 1.1 would be:

$297.26 * 1.063 = $315.99

- However, the ESRD facility is entitled to receive payment for a maximum of 15 training treatments furnished in connection with a new caregiver. Because the amount of the training add-on is adjusted by the ESRD facility's wage index (1.10), the amount of the training add-on is calculated as follows:

Training rate: $95.60
Wage index: 1.10
Training payment: $95.60 * 1.10 = $105.16

NOTE: This example is computed without regard to other adjustments (e.g., outlier payments.)

- For treatments furnished to pediatric ESRD patients in calendar years 2024, 2025 and 2026, a TPEAPA of 30% of the per treatment payment amount would be added to the payment amount.

Case-mix adjusted payment rate: $315.99
TPEAPA multiplier: 0.3
TPEAPA amount: : $315.99* 0.3 = $94.80

- Additionally, the above case-mix adjustment multiplier and the TPEAPA would be applied to any post-TDAPA add-on payment adjustment amounts applicable for the claim. For example, if the post-TDAPA add-on payment adjustment amount for the quarter of the claim in question was $0.50, the post-TDAPA add-on to the per-treatment payment rate would be:

$0.50 * 1.063 * 1.3 = $0.69

NOTE: the post-TDAPA add-on payment adjustment amount is only adjusted by the patient-level case-mix adjusters and the TPEAPA. Facility level adjustment factors (e.g. LVPA, rural adjustment) and other add-on payment adjustments (home and self-dialysis training add-on, outlier payment) are not applied to the post-TDAPA add-on payment adjustment.

- For the maximum number of 15 training treatments for which the training adjustment may be provided in connection with a PD patient, the payment rate, including the add-on payment adjustments, would be:

($297.26 * 1.063) + $105.16 + $94.80 + 0.69 = $516.64

B. Facility-level adjustments

There are three facility-level adjustments in the ESRD PPS. The first adjustment accounts for ESRD facilities furnishing a low-volume of dialysis treatments. The second adjustment reflects urban and rural differences in area wage levels using an area wage index developed from Core Based Statistical Areas (CBSAs). The third is a rural adjustment beginning in CY 2016.

1. Low-Volume Adjustment

ESRD facilities that qualify as being low-volume can receive the low-volume payment adjustment (LVPA) applied to each dialysis treatment they furnish beginning on or after January 1, 2011. For CY 2011 *the treatment volume threshold was 4,000 treatments and* the payment adjustment was 18.9 percent. *B*eginning January 1, 2016, the payment adjustment was 23.9 percent. Beginning January 1, 2025, the payment adjustment *was based on two tiers of volume up to a volume threshold of 4,000 treatments. Beginning January 1, 2027, the payment adjustment is based on 6 tiers of volume up to a volume threshold of 8,000 treatments*.

a. Low-Volume Criteria

To be eligible for the low-volume adjustment, an ESRD facility must meet specific criteria:

- The ESRD facility must have furnished less than *8,000* dialysis treatments in each of the 3 cost reporting years preceding its payment year. This 3 year eligibility period is based on the ESRD facility's as-filed or final settled 12- consecutive month cost reports.

- The term "payment year" is the period of time that is used for determining payment to ESRD facilities, which is a calendar year. The ESRD PPS is based on a calendar year which begins January 1 of each year.

- The eligibility years are defined as the 3 years preceding the payment year and are based on cost reporting periods—specifically, the cost reporting periods that end in the 3 years immediately preceding the payment year. The cost reporting periods must report costs for 12 consecutive months.

  - For purposes of determining eligibility for the low-volume adjustment, the number of "treatments" is the total number of treatments furnished to Medicare and non-Medicare patients. For peritoneal dialysis (PD) patients, 1 week of PD is considered equivalent to 3 hemodialysis (HD) treatments. For example, a patient on PD for 21 days would have (21/7) x 3 or 9 HD-equivalent treatments. See §50.A.4 of this chapter for more information on hemodialysis equivalent treatments. The ESRD facility must not have opened, closed, or received a new provider number due to a change in ownership, (see Pub. 100-07, chapter 3, §3210), in the 3 years preceding the payment year.

  - This 3-year period is based on the ESRD facility's as-filed or final settled 12-consecutive month cost reports that end in the 3 years immediately preceding the ESRD PPS payment year.

  - An ESRD facility is determined to be "opened" when the ESRD facility is a new establishment newly surveyed by the state and Medicare, is certified for Medicare participation, receives a provider number, and begins furnishing Medicare certified outpatient maintenance dialysis treatments.

  - If there is a change in ownership that does not result in a change in provider number but does cause a change in the fiscal year reporting to that of the new provider, the A/B MAC (A) should combine the reporting periods for determining eligibility to the LVPA.

    For example, prior to a change of ownership (CHOW), Facility A had a cost reporting period that spanned January 1 through December 31. Facility A had a CHOW mid-year that did not result in a new provider transaction access number (PTAN) but caused a break in the cost reporting period. The A/B MAC (A) would add Facility A's cost report that spanned January 1 through May 31 to its cost report that spanned June 1 through December 31 to verify the total treatment count. The other situation that could occur is when a CHOW results in a change of the original fiscal period. For example, prior to a CHOW, Facility B had a cost reporting period that spanned January 1 through December 31 and based on its cost reports for 2012 and 2013, it met the LVPA eligibility criteria. Then, Facility B had a CHOW in the beginning of 2014 that did not result in a new PTAN but changed its cost reporting period to that of its new owner, October 1, 2014, through September 30, 2015. This scenario would create a short and a long cost report that would not total 12 months that the A/B MAC (A) would need to review for verification. That is, Facility B would have a cost

report that spanned January 1, 2014, through July 31, 2014 (7 months) and a cost report that spanned August 1, 2014 through September 30, 2015 (14 months). In this situation, the A/B MAC (A) should combine the two non-standard cost reporting periods that in combination may exceed 12-consecutive months and prorate the data to equal a full 12-consecutive month period.

- Beginning January 1, 2019, if there is a CHOW that results in a change in provider number due to a facility-type change (for example, hospital based dialysis facility to independent dialysis facility) and the new owner accepts the Medicare agreement, the ESRD facility can qualify for the LVPA if they otherwise meet the LVPA eligibility criteria. This policy does not extend to CHOWs where a new PTAN is issued for any other reason.

- Effective January 1, 2019, ESRD facilities that change their fiscal year end for cost reporting purposes, outside of a CHOW, qualify for the LVPA if they otherwise meet the LVPA eligibility criteria. When this occurs, the MACs will combine the two nonstandard cost reporting periods of less than 12 months to equal a full 12- consecutive month period or combine the two non-standard cost reporting periods, that in combination may exceed 12-consecutive months, and prorate the data to equal a full 12-consecutive month period. This does not impact or change requirements for reporting, as established by the MACs, or those set forth in § 413.24(f)(3).

    - Effective January 1, 2016, the ESRD facility must not be located within 5 road miles of another ESRD facility under common ownership. The geographic proximity criterion is applicable to all ESRD facilities that are Medicare certified to furnish outpatient maintenance dialysis treatments. For the purpose of determining the number of treatments furnished by the ESRD facility, the number of treatments considered furnished by the ESRD facility would be equal to the aggregate number of treatments furnished by the other ESRD facilities that are both under common ownership, and 5 road miles or less from the ESRD facility in question.

For example, ESRD facility A received its Medicare certification on February 1, 2011, allowing them to bill and receive payment for outpatient maintenance dialysis that they furnish to Medicare beneficiaries. ESRD facility A will need to meet the low-volume criteria for 3 years. When the ESRD facility A submits its attestation to the A/B MAC (A), the A/B MAC (A) will need to consider ESRD facility A's ownership and the ownership of all of the ESRD facilities located within a 5 road mile radius or less when determining total treatments. A/B MACs (A) shall use the Provider Enrollment, Chain, and Ownership System (PECOS) (or the most recent available Medicare enrollment system) to locate the ESRD facility's ownership information. A/B MACs (A) shall refer to 42 CFR §421.404(a) when determining common ownership.

Prior to January 1, 2016, ESRD facilities that were Medicare certified prior to January 1, 2011, were grandfathered into the geographic proximity criterion.

Beginning January 1, 2025, the structure of the LVPA change*d* to include two tiers *based on treatment volume. Beginning January 1, 2027, the number of tiers increased to 6*. An ESRD facility's LVPA tier *is* determined based on the median treatment count of the last three cost-reporting years, rather than using a single year treatment count. *The applicable adjustment factor based on the volume tier determination is presented below.* Should a facility receive an exception under § 413.232(g)(5) in one or more of the past three cost-reporting years, the median treatment count of the unaffected cost-reporting years will be used to make the facility's tier determination. In the case that a facility does not have cost-reporting data from the last 3 years that are unaffected by a disaster or other emergency, the

facility will be assigned to a tier based on their last full year of unaffected treatment volume, assuming all LVPA eligibility criteria are met.

Two-Tier LVPA Structure *(CY 2025 – 2026)*

Tier	LVPA Adjuster *2025-2026*
Tier 1 (less than 3,000)	28.4%
Tier 2 (3,000 – 3,999)	18.1%

Six-Tier LVPA Structure Effective January 1, 2027

Tier	*LVPA Adjuster Beginning 2027*
***Tier 1** (less than 3,000)*	*36.8%*
***Tier 2** (3,000 – 3,999)*	*24.9%*
***Tier 3** (4,000 – 4,999)*	*17.3%*
***Tier 4** (5,000 – 5,999)*	*12.0%*
***Tier 5** (6,000 – 6,999)*	*8.0%*
***Tier 6** (7,000 – 7,999)*	*5.0%*

For example, if cost-reporting data indicated that an ESRD facility furnished 2,500, 2,999, and 4,500 treatments in the 3 years preceding the payment year, but the facility received an exception under § 413.232(g)(5) during the year it furnished 4,500 treatments, the median treatment count from the two prior years (2,500 and 2,999) would be used determine the facility's LVPA tier, which would place the facility in tier 1. The facility would then receive a *36.8* percent payment adjustment for all of the treatments furnished during the payment year.

NOTE: *Beginning January 1, 2027, t*he low-volume adjustment applies to dialysis treatments provided to pediatric *ESRD* patients. *The LVPA did not apply to dialysis treatments provided to pediatric patients prior to 2027.*

b. ESRD Facility Attestation Instruction for Low-Volume Adjustment

*T*o receive the low-volume adjustment under the ESRD PPS, each individual ESRD facility must submit an attestation statement each year to its A/B MAC (A). The attestation must state that the ESRD facility qualifies as a low-volume facility in accordance with 42 CFR §413.232 as described above. Specifically, the attestation states that the ESRD facility was low-volume for the first 2 eligibility years and that they will be for the third eligibility year, that is, the cost reporting period ending in the year that immediately precedes the payment year. In most cases, the A/B MACs (A) will not have received the third eligibility year's cost report and will rely on the attestation to allow the application of the adjustment. November 1st of each year is the mandatory deadline for the submission of attestations for ESRD facilities that believe they are eligible to receive the low-volume payment adjustment.

If the ESRD facility qualifies for LVPA based on the three prior years (i.e., the treatment counts in each of the three cost reports) then it will receive the LVPA adjustment in that 4th year, which is the payment year. Should the facility exceed the *8*,000 treatment count in that payment year, it will qualify for the full LVPA adjustment during the entire payment year; however, the facility will not qualify for three subsequent payment years.

Beginning January 1, 2019, ESRD facilities may request an extraordinary circumstance exception to the November 1 deadline. *T*o request an extraordinary circumstance exception, the facility is required to submit a narrative explaining the rationale for the exception to their MAC. The MAC will evaluate the narrative to determine if an exception is justified. The determination will be final, with no appeal.

However, for new or resubmitted attestations applicable to payment years 2011 to 2015, to allow A/B MACs (A) and facilities adequate time to review policy clarifications related to the low volume adjustment, the attestation deadline was extended to December 31, 2014. For attestations applicable to payment year 2016, the attestation deadline was extended to December 31, 2015, to allow A/B MACs (A) and facilities adequate time to review policy changes finalized in the CY 2016 ESRD PPS final rule. The attestation deadline for payment year 2021 was extended until December 31, 2020, due to the extraordinary circumstance of COVID-19 for all ESRD facilities requesting the LVPA.
A/B MACs (A) have a maximum of 60 days to verify attestations for implementation of the low-volume adjustment beginning January 1 of the following payment year.

A/B MACs (A) shall notify the ESRD facilities no later than September 1 of each year that they need to submit the low-volume attestation no later than November 1 of each year to receive the adjustment the following payment year. A/B MACs (A) may not accept attestations submitted after the mandatory deadline. If an ESRD facility is receiving the low-volume payment adjustment and will qualify for the adjustment in the subsequent payment year they must submit another attestation. If the ESRD facility does not submit an attestation, the A/B MAC (A) should no longer apply the low-volume payment adjustment beginning January 1 of the next payment year and the ESRD facility cannot receive the low-volume payment adjustment until the following payment year.

An ESRD facility should notify its A/B MAC if it determines that it did not maintain low-volume status for its cost reporting period ending immediately preceding the payment year or if it finds that it will not remain low-volume for any subsequent cost reporting year. The A/B MAC (A) is responsible to reconcile incorrect payments made to ESRD facilities retroactively, if needed, to ensure overpayments have not been made. If an A/B MAC (A) determines that an ESRD facility has received the low-volume adjustment in error, the A/B MAC (A) is required to adjust all of the ESRD facility's affected claims to remove the adjustment within 6 months of finding the error.

The A/B MAC (A) shall:

- Recoup low-volume adjustment payments made to an ESRD facility that failed to meet the low-volume adjustment criteria defined in 42 CFR §413.232(b)(1). Recoupment shall occur when the A/B MAC (A) receives the as-filed cost report for the third eligibility year and finds that the ESRD facility did not meet the eligibility criteria. Recoupment shall also occur if any cost reports used for eligibility are subsequently found to have not met the low-volume criteria, for example, reopening or appeals. A/B MACs (A) shall reprocess claims paid during the payment year in which the ESRD facility incorrectly received the low-volume payment adjustment.

Recoup low-volume adjustment payments made to an ESRD facility that failed to meet the low-volume adjustment criteria defined in 42 CFR §413.232(b)(2). A/B MACs (A) shall use PECOS (or most recent Medicare enrollment system) to locate the ESRD facility's ownership information at the time of

verification to determine if the ESRD facility is in the process of a CHOW. A/B MACs (A) shall use the current owner provided in PECOS. If the ESRD facility was in the process of a CHOW, recoupment shall occur when the CHOW is effective and the new owner is assigned a new provider number. A/B MACs(A) shall reprocess claims paid during the payment year in which the ESRD facility incorrectly received the low-volume payment adjustment.

If an ESRD facility does not remain low-volume for each of the 3 years (described above in §60.B.1.a) immediately preceding the payment year, the ESRD facility cannot be eligible for the adjustment until it can demonstrate again that for 3 years it has met the low-volume criteria.

Example - Provider 21-25XX is an independent ESRD facility that has a June 30th cost report year end.

The ESRD facility concluded in October 2010 that it met the criteria of a low- volume facility. For its cost reporting periods, 7/1/2007 – 6/30/2008, 7/1/2008 – 6/30/2009, and 7/1/2009 – 6/30/2010, it did not open, close, or have a change of ownership and furnished less than 4,000 dialysis treatments in each of those cost reporting periods. In October 2010, the ESRD facility sent its A/B MAC (A) an attestation stating that it believes that it meets the low-volume criteria and would like to begin to receive the low-volume adjustment. The A/B MAC (A) receives the attestation on November 1st and then has 60 days (that is, until December 30th) to verify if the ESRD facility qualifies as a low-volume facility. On December 28th the A/B MAC (A) was able to verify that provider 21-25XX met the criteria and allowed for the adjustment to be applied to each dialysis treatment the ESRD facility furnished beginning January 1, 2011.

Determining Low-Volume Eligibility in Hospitals with Multiple Subunits and Satellites

A hospital may be affiliated with multiple hospital-based ESRD facilities. In addition, an individual hospital-based ESRD facility may have several locations that are subsumed under it, billing under the same ESRD facility provider number.

Verification of an ESRD facility's low-volume status is based on the A/B MAC's (A) review of the total treatment count on an ESRD facility's (or a hospital's) cost report. In the situation where a hospital has multiple locations of a hospital-based ESRD facility under its governing body, the aggregate cost and treatment data of all of the locations (not just the treatment count of one of the subunits or satellite entities) are reported on the hospital's cost report I series. In the case where a hospital has multiple locations and treatment counts are aggregated in the hospital's cost report, the A/B MAC (A) may consider other supporting documentation which may include individual facility treatment counts, rather than the hospital's cost report alone. The hospital must provide the documentation to support the total treatment count for all the facilities that make up the total treatment count on the cost report for the A/B MAC (A) to review, even if not all the facilities are applying for the low volume adjustment.

LVPA Eligibility for Cost Reporting Periods Ending in 2020

For ESRD facilities that have an increase in their treatment counts for cost reporting periods ending in 2020 that are COVID-related such that the increase prevents them from qualifying for the LVPA, CMS will hold these facilities harmless from losing the LVPA. For purposes of determining LVPA eligibility for payment years 2021, 2022, and 2023, CMS will only consider total dialysis treatments furnished for any 6 months of a facility's cost-reporting period ending in 2020; ESRD facilities will select those 6 months (consecutive or nonconsecutive) during which treatments will be counted for purposes of the LVPA determination. ESRD facilities will attest that their total dialysis treatments for those 6 months of their cost-reporting period ending in 2020 are less than 2,000 and that, although the total number of treatments furnished in the entire year otherwise exceeded the LVPA threshold, the excess treatments furnished were due to temporary patient shifting resulting from the COVID–19 PHE. MACs will annualize the total dialysis treatments for the total treatments reported in those 6 months by multiplying by 2. ESRD facilities will be expected to

provide supporting documentation to the MACs upon request.

c. LVPA Emergency Provisions

Beginning January 1, 2024, ESRD facilities that are affected by disasters and other emergencies may qualify for exceptions to certain eligibility requirements for the LVPA. These exceptions affect both an ESRD facility that closes as a result of a disaster or other emergency, along with a facility that surpasses the LVPA treatment threshold eligibility requirement due to treating patients with ESRD who are displaced from their usual ESRD facility because of the disaster or other emergency.

First, an ESRD facility may request an exception to the eligibility requirement at 42 CFR § 413.232(b)(2). This exception would allow the ESRD facility to close and reopen in response to a disaster or other emergency and still receive the LVPA. If an ESRD facility is affected by a disaster or other emergency and the ESRD facility closes and re-opens later, the ESRD facility must request an exception from CMS in writing to continue to be eligible for the LVPA. Written requests must be sent to the ESRD Payment Mailbox (ESRDPAYMENT@cms.hhs.gov) within 60 days of the facility's closure. Additionally, the ESRD facility must inform the MAC of the request. CMS will review the request within 30 days of receipt and either approve the request based on a determination that the ESRD facility closed due to a disaster or other emergency, or deny the request, and would inform both the ESRD facility and the MAC of its decision. Second, an ESRD facility may request an exception to the eligibility requirement at 42 CFR § 413.232(b)(1). This exception would allow the ESRD facility to receive the LVPA even if it exceeds the LVPA treatment volume threshold (i.e., *8*,000 treatments) if its treatment count increases due to temporary patient shifting due to a disaster or other emergency. For the purposes of this exception, temporary patient shifting is defined as providing renal dialysis services to one or more patient(s) at any time through the end of the calendar year following the 12-month period. This 12-month period begins on the date the accepting ESRD facility first begins providing renal dialysis services to the displaced patient(s). The accepting ESRD facility must submit to CMS a written request for this exception. These written requests must be sent to the ESRD Payment Mailbox (ESRDPAYMENT@cms.hhs.gov) no later than the annual attestation deadline of November 1st or 30 days after the end of the cost reporting year for which the ESRD facility is attesting, whichever is later. In addition, the accepting ESRD facility must attest to its MAC that it furnished treatments equal to or in excess of *the treatment volume threshold* in the cost reporting year due to temporary patient-shifting as a result of the closure or operational disruption of an ESRD facility due to a disaster or other emergency.

CMS will review the exception request and notify the ESRD facility and the MAC within 30 days if the ESRD facility qualifies for the exception. If CMS approves the request, the ESRD facility is paid the low-volume adjustment on claims for Medicare beneficiaries, on the basis of the exception during the payment year in which the temporary patient-shifting occurred, so long as all other requirements for the low-volume adjustment are met. For any future payment year, the ESRD facility would not be prevented from receiving the low-volume adjustment if the ESRD facility meets or exceeds the treatment threshold in a cost reporting year due to temporary patient-shifting as a result of the disaster or other emergency that resulted in another ESRD facility's closure or operational disruption, so long as all other requirements for the low-volume adjustment are met.

These exceptions are set forth at 42 CFR §§ 413.232(g)(5) and (g)(6).

d. LVPA Exception for Pediatric Facilities

Beginning January 1, 2027, ESRD facilities can receive the LVPA for treatments furnished to pediatric patients. Alongside this change, CMS also established a process for pediatric-focused ESRD facilities to request an exception to the aggregation of treatment volume with non-pediatric-focused ESRD facilities

under common ownership under § 413.232(c). To receive this exception the ESRD facility must either be owned and operated by a Medicare-certified children's hospital, as defined at § 412.23(d), or the ESRD facility provides at least 50 percent of its total treatments (Medicare and non-Medicare) to pediatric patients. Additionally, the ESRD facility must be under common ownership with one or more ESRD facilities that do not furnish at least 50 percent of its total treatments to pediatric patients.

First, an ESRD facility may request an exception to the treatment volume aggregation at 42 CFR § 413.232(c) for a facility that does not furnish at least 50 percent of total treatments to pediatric patients. This exception would mean that the volume of the commonly-owned non-pediatric ESRD facility would not be considered when determining the treatment volume for the pediatric-focused ESRD facility. Written requests must be sent to the ESRD Payment Mailbox (ESRDPAYMENT@cms.hhs.gov) by the attestation deadline as noted in CFR § 413.232(e) or within 30 days of the end of the facility's cost reporting year, whichever is later. Additionally, the ESRD facility must inform the MAC of the request. CMS will review the request within 30 days of receipt and either approve or deny the request based on a determination that the ESRD facility meets the requirements for this exception specified above.

CMS will review the exception request and notify the ESRD facility and the MAC within 30 days if the ESRD facility qualifies for the exception. If CMS approves the request, the treatment volume for the ESRD facility would not include any treatment volume of facilities for which the ESRD facility received an exception. The ESRD facility must still meet the treatment volume threshold for the LVPA and all other requirements for the LVPA. For any future payment year, the treatment volume for the ESRD facility would not include the treatment volume of the facility for which the exception has been received so long as the ESRD facility remains a children's hospital or furnishes more than 50 percent of treatments to Pediatric ESRD Patients.

This exception is set forth at 42 CFR § 413.232(g)(7).

2. Wage index

The wage index adjustment is applied when calculating the ESRD PPS payment to account for geographic differences in area wage levels. Each ESRD facility's payment is adjusted using the wage index for the CBSA in which the ESRD facility is located.

Rural ESRD facilities use the statewide average.

The wage index values and the budget neutrality adjustment factor are updated during rulemaking, are issued via annual Recurring Update Notifications, and are posted on the ESRD Payment Webpage.

Prior to 2025, the ESRD PPS used the wage index calculated based on data collected from CMS-certified hospitals nationwide for purposes of the acute care hospital inpatient prospective payment system (IPPS). CMS used the IPPS wage index values for each CBSA prior to the application of certain adjustments and modifications applicable to hospitals under the IPPS (i.e., the pre-floor, pre-reclassification wage index). When this IPPS-based wage index was in use, CMS also adopted methodologies for calculating wage index values for ESRD facilities located in urban and rural areas where there is no hospital data. For urban areas with no hospital data, CMS computed the average wage index value of all urban areas within the state to serve as a reasonable proxy for the wage index of that urban CBSA, that is, CMS used that value as the wage index. For rural areas with no hospital data, CMS computed the wage index using the average wage index values from all contiguous CBSAs to represent a reasonable proxy for that rural area. For a full discussion, see CY 2011 and CY 2012 ESRD PPS final rules at 75 FR 49116 through 49117 and 76 FR 70239 through 70241, respectively.

For CY 2021, CMS adopted the CBSA delineations as described in the September 14, 2018 Office of Management and Budget (OMB) Bulletin No. 18-04. As a result, several counties now have new CBSA numbers. In addition, CMS applied a 5 percent cap on any decrease in an ESRD facility's wage index from the ESRD facility's final wage index in CY 2020. This transition was phased in over 2 years, where the reduction in an ESRD facility's wage index was capped at 5 percent in CY 2021 (that is, no cap would be applied to the reduction in the wage index for the second year (CY 2022). These policies were applied budget neutrally and incorporated into the overall ESRD PPS wage index budget neutrality adjustment. In the CY 2023 ESRD PPS final rule CMS finalized making the 5 percent cap on decreases in wage index permanent. This rule also finalized a wage index floor of 0.600. These policies are applied budget neutrally and incorporated into the overall ESRD PPS wage index budget neutrality adjustment.

Beginning for CY 2025 the ESRD PPS uses a new wage index methodology, which uses data from the Bureau of Labor Statistics (BLS) Occupational Employment Wages & Statistics (OEWS). The new methodology uses mean hourly wage data from BLS OEWS data, which is then weighted by a national ESRD facility occupational mix derived from freestanding ESRD facility cost report data. The BLS OEWS wage data includes data from freestanding ESRD facilities and similar care locations, whereas the prior ESRD PPS wage index methodology was based on the IPPS wage index, which is derived from inpatient acute care hospital data. CMS still applies the wage index floor of 0.600 and the 5 percent cap on wage index decreases finalized in CY 2023.

For CY 2025, CMS adopted the most recent CBSA delineations as described in the July 21, 2023, OMB Bulletin No. 23-01. As a result, several counties now have new CBSA numbers.
ESRD facilities may confirm their CBSA delineation status and wage index value on the CMS website at https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ESRDpayment/End-Stage-Renal-Disease-ESRD-Payment-Regulations-and-Notices.

3. Rural adjustment

Beginning January 1, 2016, the ESRD PPS provides a 1.008 percent payment adjustment for ESRD facilities located in a rural CBSA.

When CMS adopted the newest CBSA definitions according to OMB Bulletin 23-01, CMS also adopted a phase-out policy for ESRD facilities located in a rural CBSA in CY 2024 but were re-designated to an urban CBSA in CY 2025. These facilities, which would otherwise lose the rural adjustment for CY 2025 instead receive 2/3rd*s* of the rural adjustment for 2025, a 1.0053 percent payment adjustment, and 1/3rd of the rural adjustment for 2026, a 1.0027 percent payment adjustment.

4. Non-Contiguous Areas Payment Adjustment

Beginning January 1, 2026, ESRD facilities located in certain non-contiguous areas of the United States for which CMS has identified as having higher non-labor costs receive an increase to the non-labor portion of the ESRD PPS bundled payment. This increase is 1.21 for ESRD facilities in Hawaii and 1.25 for ESRD facilities in Alaska, Guam, American Samoa, and the Northern Marianas Islands. The non-labor related share of the ESRD PPS base rate is *36.5% beginning January 1, 2027*.

Below is an example calculation using the CY 2026 ESRD PPS final base rate of 281.71 *and the CY 2026 labor related share of 44.8%* for an ESRD facility in Alaska with a wage index of 1.0775:

CY 2026 Base Rate: $281.71

CY 2026 Labor related share: 0.552
*CY 2026 n*on-labor related share: 0.448
Wage index: 1.0775
Alaska NAPA Factor: 1.25

Labor related portion: $281.71 * 0.552 * 1.0775 = $167.56
Non-labor related portion: $281.71 * 0.448 * 1.025 = $157.76
Wage-adjusted base rate: $167.56 + $157.76 = $325.32

The wage-adjusted base rate of $325.32 is the figure to which other case-mix and facility level adjustment factors would be applied.

C. Add-On Payment Adjustments

Payment amounts under the ESRD PPS are adjusted by several add-on payment adjustments as described below.

1. Training and Retraining Add-On Payment Adjustment

A training add-on payment adjustment is available under the ESRD PPS. The training add-on payment is computed by using the national average hourly wage for nurses from the Bureau of Labor Statistics. The payment accounts for *2.66* hours of nursing time for each training treatment that is furnished and is adjusted by the geographic area wage index. The training add-on payment applies to both peritoneal dialysis and hemodialysis training treatments, and added to the ESRD PPS payment, when a training treatment is provided by a Medicare certified training ESRD facility. An ESRD facility may bill a maximum of 25 training sessions per patient for hemodialysis training, and 15 sessions for CCPD and CAPD training. ESRD facilities should not expect additional reimbursement beyond the maximum sessions. CMS expects that ESRD patients who opt for home dialysis are good candidates for home dialysis training and will successfully complete their method of training before reaching the maximum number of allotted training treatments. For more information regarding dialysis training, see §30.2 of this chapter. For more information regarding retraining, see §30.2.E of this chapter.

Beginning for CY 2025, the training and retraining add-on payment adjustment is allowed for claims for renal dialysis services provided to AKI beneficiaries. This is the only add-on payment adjustment extended to AKI dialysis claims.

2. Outlier Payment

The ESRD PPS provides additional payment for high-cost outliers due to unusual variations in the type or amount of medically necessary care when applicable. Outlier payments are based on a comparison of the predicted Medicare allowable payment (MAP) per treatment to actual incurred expenditure per treatment for services that were or would have been considered separately billable prior to the implementation of the ESRD PPS. The ESRD PPS outlier policy is set forth at 42 CFR § 413.237. For more information regarding the ESRD outlier services included in the outlier calculation and an example of the outlier calculation, see §60.D of this chapter.

3. TDAPA

The Transitional Drug Add-on Payment Adjustment (TDAPA) is an add-on payment adjustment for claims for services provided to patients who utilize certain new renal dialysis drugs and biological

products. The TDAPA is set forth at 42 CFR § 413.234(c). The TDAPA is explained in further detail in §20.3.1 of this chapter.

4. TPNIES

The Transitional Add-On Payment Adjustment for New and Innovative Equipment and Supplies (TPNIES) is an add-on payment adjustment for claims for services provided to patients who utilize certain new and innovative renal dialysis equipment and supplies. The TPNIES is set forth at 42 CFR § 413.236. The TPNIES is explained in further detail in §20.4.1 of this chapter.

5. Post-TDAPA Add-on Payment Adjustment

The post-TDAPA add-on payment adjustment is an add-on payment adjustment for all ESRD PPS patients for 3 years following the end of the TDAPA period for certain renal dialysis drugs and biological products. The amount of the post-TDAPA add-on payment adjustment for a drug or biological product is calculated based on 65% of the total payment for that drug or biological product across the most recent available 12 months of claims data and is published in the annual ESRD PPS rule. The post-TDAPA add-on payment amount for a claim is adjusted by the patient-level case-mix adjusters described in §60.A of this chapter (for pediatric patients this includes the TPEAPA described below and in §60.C.6 of this chapter). The post-TDAPA add-on payment adjustment is only calculated for new renal dialysis drugs and biological products in existing ESRD PPS functional categories. The application of the post-TDAPA add-on payment adjustment is set forth at 42 CFR § 413.234(c)(3), and the methodology for calculating the post-TDAPA add-on payment adjustment is set forth at § 413.234(g).

For drugs and biological products for which there is not 12 months of claims data available at the time of rulemaking, CMS publishes the post-TDAPA add-on payment adjustment amount in a change request 2 calendar quarters before the end of the TDAPA payment period for that drug or biological product.

6. TPEAPA

The Transitional Pediatric ESRD Add-on Payment Adjustment (TPEAPA) is an add-on payment adjustment of 30 percent of the per-treatment payment amount applied to all claims for renal dialysis services provided to ESRD patients aged 17 or younger for CYs 2024, 2025, and 2026. The TPEAPA is 30 percent of the per-treatment payment amount for a patient, which reflects both the patient-level case mix adjusters, described in §60.A of this chapter, and the facility level adjusters, described in §60.B of this chapter, but does not include any of the other add-on payment adjustments described in this §60.C. The TPEAPA is a temporary adjustment, which is applied only for CYs 2024, 2025 and 2026. The TPEAPA is set forth at 413.235(b)(2).

D. Outlier Policy

The ESRD PPS provides additional payment for high cost outliers due to unusual variations in the type or amount of medically necessary care when applicable. Outlier payments are based on a comparison of the predicted Medicare allowable payment (MAP) per treatment to actual incurred expenditure per treatment for services which were or would have been considered separately billable prior to the implementation of the ESRD PPS. ESRD outlier services include:

- Drugs and biological products used for the treatment of ESRD that were or would have been, prior to January 1, 2011, separately billable under Medicare Part B;

- Laboratory tests used for the treatment of ESRD that were or would have been, prior to January 1, 2011, separately billable under Medicare Part B;

- Medical or surgical supplies used to administer drugs and biological products used for the treatment of ESRD that were or would have been, prior to January 1, 2011, separately billable under Medicare Part B; and

- Drugs and biological products used for the treatment of ESRD that were or would have been, prior to January 1, 2011, separately billable under Part D, including renal dialysis oral-only drugs effective January 1, 2025.

- New and innovative renal dialysis equipment or supplies previously paid for using the TPNIES, regardless of whether the equipment or supply would have been separately billable prior to 2011 (excluding capital-related assets that are home dialysis machines).

- Drugs and biological products that were historically included in the composite rate, as well as newer drugs and biological products that are currently included in the calculation of the post-TDAPA add-on payment adjustment.

The list of renal dialysis services that are included as outlier services may be found at https://www.cms.gov/medicare/payment/prospective-payment-systems/end-stage-renal-disease-esrd/esrd-pps-outlier-services.

NOTE: All renal dialysis service Part B drugs and biological products reported with a HCPCS code that is on the ASP List are included for outlier payments. The laboratory tests that comprise the AMCC panel do not qualify for an outlier payment, see §20.2.A for information regarding the 50/50 rule.

ESRD facilities may receive outlier payments for the treatment of both adult and pediatric ESRD patients. An ESRD facility is eligible for an outlier payment if its actual or imputed MAP amount per treatment for ESRD outlier services exceeds a threshold. The MAP amount represents the average incurred amount per treatment for services that were or would have been considered separately billable services prior to January 1, 2011. The threshold is equal to the ESRD facility's predicted ESRD outlier services MAP amount per treatment (which is case-mix adjusted) plus the fixed dollar loss (FDL) amount. In accordance with 42 CFR §413.237(c), facilities are paid 80 percent of the per treatment amount by which the imputed MAP amount for outlier services (that is, the actual incurred amount) exceeds this threshold. In the CY 2025 ESRD PPS final rule, CMS finalized a change that adds the case-mix adjusted post-TDAPA add-on payment adjustment amount to the predicted MAP for a patient.

The MAP and FDL amounts are prospectively calculated each year with a target that outlier payments equal 1% of total ESRD PPS payments. For example, the average outlier services MAP amounts per treatment for pediatric and adult dialysis patients for CY 2026 were $50.19 and $23.68, respectively. After multiplication by applicable patient and facility specific adjusters to yield a predicted outlier services MAP amount, a fixed amount is added (the "fixed dollar loss" amount) to determine the outlier threshold. The *FDL* amounts for CY 2026 were $162.43 for pediatric patients and $14.80 for adult patients. The CY 2026 values of the average outlier services MAP amount and the *FDL* amount are used below for the purpose of following the outlier payment computation. These values may be revised as a result of subsequent rulemaking.

In computing the MAP amount, the adjusters used are:

Adult Characteristics — Adjustment Value

	CY 2011-2015	Beginning CY 2016
Age: 18-44	0.996	1.044
Age: 45-59	0.992	1.000
Age: 60-69	1.000	1.005
Age: 70-79	0.963	1.000
Age: 80+	0.915	0.961
Body Surface Area	1.014	1.000
Low Body Mass Index (BMI <18.5)	1.078	1.090
Onset of Dialysis	1.450	1.409
Pericarditis	1.354	1.209
Bacterial pneumonia	1.422	---
Gastro-intestinal tract bleeding	1.571	1.426
Hereditary hemolytic or sickle cell anemia	1.225	1.999
Myelodysplastic syndrome	1.309	1.494
Monoclonal gammopathy	1.074	---
Low-volume facility adjustment (*any* tier)	0.975	0.955
Rural facility adjustment*	---	0.978
*Non-contiguous areas payment adjustment***	---	*Varies*

*For CY 2025 and 2026 ESRD facilities that were redesignated from rural to urban will receive 2/3rds and 1/3rd of the rural adjustment respectively. For the outlier services adjustment these values are 0.9853 for CY 2025 and 0.9927 for CY 2026.

*** The NAPA was implemented in CY 2026 and no factor was applied prior to 2026. For 2026 and onward the factor applied is the same as the factor applied to the base payment for the NAPA area (1.25 for Alaska, American Samoa, Guam and the Northern Marianas Island, 1.21 for Hawaii)*

Pediatric Characteristics Adjustment Value

	CY 2011-2015	*CY* 2016 - *2026*	Beginning *2027*
Age: <13, Modality: PD	0.319	0.410	*0.523*
Age: <13, Modality: Hemo	1.185	1.406	*1.269*
Age: 13-17, Modality: PD	0.476	0.569	*0.734*
Age: 13-17, Modality: Hemo	1.459	1.494	*1.531*

Both the adult and pediatric CY 2016 separately billable case-mix adjusters are presented for the purpose of following the outlier payment computations shown below and may be revised as a result of subsequent rulemaking.

1. Outlier Payment Calculation

The outlier payment computations use the case-mix adjusters for separately billable services. These adjusters are applied to the relevant outlier services MAP amount for either adult or pediatric patients discussed above to obtain the predicted MAP amount for outlier services, reflecting all patient-specific and any facility-specific adjustments.

The following example shows how outlier payments are calculated under the ESRD PPS. For further information on the calculation of a patient's BSA, see §60.A.1. The pricing amounts for laboratory services qualifying as outlier services are based on the Medicare Clinical Laboratory Fee Schedule. For injectable drugs and biological products, pricing is based on the latest available quarterly average sales price plus 6 percent (ASP + 6) methodology. For formerly Part D drugs with an injectable version, pricing is generally based on national average drug prices based on the Medicare Prescription Drug Plan Finder. For medical/surgical supplies, pricing is based on prices established by the local A/B MAC (A). For further information regarding A/B MAC (A) pricing of medical/surgical supplies, see Pub. 100- 04, chapter 8, §20.1.

2. Example of Outlier Payment

The following is an example of the calculation of the outlier payment using rates effective January 1, 2026.

John, a 68-year-old male Medicare beneficiary, is 187.96 cm. in height and weighs 95 kg. John receives hemodialysis 3 times weekly. In January 2026, he was hospitalized for 4 days for a compound ankle fracture. During the hospitalization John did not undergo any dialysis treatments. After discharge John resumed his dialysis treatments but required additional laboratory testing and above-average doses of several injectable drugs, particularly EPO, to return his hemoglobin levels to the normal range. During January 2026, John received 9 hemodialysis treatments at his usual ESRD facility. The facility submitted a claim for eligible ESRD outlier services including drugs and biological products, laboratory tests, and supplies totaling $3,000.00.

Begin by computing the predicted MAP amount per treatment based on the ESRD outlier services case-mix adjustment factors applicable to John. These factors are age and BSA. John's BSA is 2.2161.

Applying the ESRD outlier services multiplier from the table in §60.D for BSA, John's ESRD outlier services payment multiplier for BSA is computed as follows:

$\{1.000\}^{\{(2.2161-1.9)/0.1\}} = \{1.000\}^{\{3.16135\}} = 1.000$

Step 1: Determine the predicted, ESRD outlier services MAP amount using the product of all applicable case-mix adjusters.

Using this calculated multiplier for BSA and the multiplier for age from the table in §60.D, John's outlier services PM is calculated as:

1.005 * 1.000 = 1.005

As described in §60.C of this chapter, the (case-mix adjusted) post-TDAPA add-on payment adjustment amount is added to the predicted MAP for a patient. Supposing the post-TDAPA add-on payment adjustment amount for Q1 2025 is $0.50 and John's applicable patient-level case-mix adjustment factors are age (1.070) and BSA ($\{1.032\}^{\{(2.2161-1.9)/0.1\}} = \{1.032\}^{\{3.16135\}} = 1.105$) the post-TDAPA add-on payment adjustment amount for John is $0.59 ($0.50*1.070*1.105).

For CY 2026, the national average MAP amount per treatment for adult patients is $23.68. Therefore, the predicted MAP amount per treatment for John is: $23.68 * 1.005 + $0.59 = $24.39.

Step 2: Determine the imputed average, per treatment, ESRD outlier services MAP amount based on utilization of all separately billable services on the monthly ESRD facility bill

John's imputed MAP amount per treatment is equal to the total amount of drugs and biological products, laboratory tests, and supplies submitted on the claim, divided by the number of treatments. This is calculated as:

$3000.00 / 9 = $333.33.

Step 3: Add the fixed dollar loss amount to the predicted, ESRD outlier services MAP amount
Calculate the threshold per treatment by adding the CY 2026 FDL amount to the predicted MAP amount for John.
The threshold amount for John is calculated to reflect the case-mix adjustments for age and BSA.

Threshold = Predicted MAP amount ($24.39) + FDL ($14.80) = $39.19

Because John's imputed MAP amount per treatment was $333.33, which exceeds the sum of the predicted MAP amount and FDL amount ($39.19), John's ESRD facility is eligible for outlier payments.

Step 4: Calculate outlier payment per treatment

The outlier payments for John's 9 treatments are calculated as the amount by which the imputed MAP amount exceeds the threshold, then multiplied by the 80 percent loss-sharing ratio.

Imputed MAP amount minus Threshold: $333.33 - $39.19 = $294.14
Outlier payments per treatment: $294.14 * .80 = $235.31
Total outlier payments: $235.31 * 9 = $2117.79

E. Co-Insurance

Eighty percent of the total ESRD PPS payment amount for renal dialysis services furnished by ESRD facilities to ESRD beneficiaries is paid by Medicare. ESRD beneficiaries are responsible for the remaining 20 percent after the deductible. Therefore, the beneficiary co-insurance amount under the ESRD PPS is 20

percent of the total ESRD PPS payment, which includes the ESRD PPS base rate and all applicable payment adjustments, including any applicable add-on payment adjustments such as the TPNIES and the TDAPA, any applicable training add-on amounts, and any applicable outlier payments. For example, under the ESRD PPS the patient's co-insurance liability is based on the payment made to the ESRD facility and NOT on specific renal dialysis items and services. Therefore, any renal dialysis service drug or biological product or laboratory service furnished to a beneficiary would NOT require a separate co-insurance amount, because the renal dialysis service drug or biological product or laboratory service is included in the single payment made to the ESRD facility.

In the event a claim is reprocessed and the amount that was paid to the ESRD facility changes, the ESRD facility is responsible for reconciling with the ESRD patient any overpayment or underpayment of co-insurance or deductible amounts paid to the ESRD facility.

100.4 Other Adjustments to the AKI Dialysis Payment Rate

(Rev. 14043, Issued: 11-12-26, Effective: 01-01-27, Implementation: 01-04-27)

Beginning for 2025 ESRD facilities are allowed to bill for the ESRD PPS home and self-dialysis training add-on payment adjustments on claims for renal dialysis services provided to AKI beneficiaries. For these beneficiaries, the add-on payment adjustment is applied in the same way as under the ESRD PPS, a payment of $*138.00* multiplied by the ESRD facility's wage index value, as described in §60.C of this chapter. As this adjustment is required to be extended *o*n a budget neutral basis under section 1834(r) of the Act, we finalized a reduction that rounds to $0.00 per treatment to the AKI dialysis payment rate in the CY 2025 ESRD PPS final rule based on a calculation of estimated training payments. For more information, please see Pub 100-04 Chapter 8 § 40.

100.5 Renal Dialysis Services Included in the AKI Dialysis Payment Rate

(Rev. 14043, Issued: 11-12-26, Effective: 01-01-27, Implementation: 01-04-27)

Drugs, biological products, laboratory services, and supplies considered to be renal dialysis services under the ESRD PPS as defined in 42 CFR § 413.171, are considered to be renal dialysis services for patients with AKI. As such, no separate payment would be made for renal dialysis drugs, biological products, laboratory services, and supplies that are included in the ESRD PPS base rate when they are furnished by an ESRD facility to an individual with AKI.

Other items and services furnished to beneficiaries with AKI not considered to be renal dialysis services as defined in 42 CFR § 413.171, but are related to their dialysis treatment as a result of their AKI and that an ESRD facility might furnish to a beneficiary with AKI, would be separately payable. *A*n ESRD facility could seek separate payment for drugs, biological products, laboratory services, and supplies that ESRD facilities are certified to furnish and that would otherwise be furnished to a beneficiary with AKI in a hospital outpatient setting. Items and services included on the consolidated billing list are not separately payable for patients with AKI, except for items and services that are not considered included in the ESRD PPS base rate. *We note that, as of January 1, 2027, all renal dialysis services, including oral-only drugs, are considered included in the ESRD PPS base rate.*

All dialysis treatments, that is, hemodialysis and peritoneal dialysis, furnished to individuals with AKI in an ESRD facility will be paid the AKI dialysis payment rate. This includes any treatments that exceed the three times-weekly limitation applied to treatments furnished to ESRD beneficiaries. CMS expects that individuals with AKI will need renal dialysis services for a finite number of days since the intent of the dialysis for these patients is curative.

CY 2027 Outlier Services (Effective January 1, 2027 - June 30, 2027) **ATTACHMENT A**

Oral and Other Equivalent Forms of Injectable Drugs [1,2]

NDC	Reference NDC RxNorm Description	Mean Unit Cost
00049241010	DOXAZOSIN 1 MG ORAL TABLET [CARDURA]	$5.84
00049251210	DOXAZOSIN 2 MG ORAL TABLET [CARDURA]	$5.88

73154012060	Tenapanor HCl Tab 20 MG [3]	$46.99

[1] Outlier services imputed payment amounts. Oral or other equivalent forms of Part B injectable drugs included in the ESRD PPS bundle (Note: oral-only phosphate binders are billed by NDC in CY 2027 where NDC pricing is available).

[2] The mean dispensing fee of the NDCs listed above is $0.50. This amount will be applied to each NDC included fee on the monthly claim. We will limit 1 dispensing per NDC per month. Providers should report the quantity in the smallest available unit. This is necessary because Medicare is using the mean per unit cost in calculating the outlier. For example, if the provider reports NDC 00054312041 Calcitriol 1 mcg/ml oral solution (15/ml/bottle) reported and uses the full 15 ml bottle, the quantity is as 15, not 1. This allows for the most accurate calculation for the outlier.

[3] Prices for Tenapanor are based on mean unit cost derived from the total drug cost in Medicare Part D claims through December 2024, because these NDCs are not listed in the latest available Medicare Plan Finder.

ATTACHMENT B

CY 2027 ESRD PPS CONSOLIDATED BILLING LIST

This is not an all-inclusive list. All injectable drugs and biologicals and their oral or other form of administration, laboratory tests, supplies, and services provided for the treatment of ESRD are included in the ESRD PPS.

DME ESRD SUPPLY HCPCS FOR ESRD PPS CONSOLIDATED BILLING EDITS

HCPCS Code	Long Description
A4216	STERILE WATER, SALINE AND/OR DEXTROSE, DILUENT/FLUSH, 10 ML
A4217	STERILE WATER/SALINE, 500 ML
A4218	STERILE SALINE OR WATER, METERED DOSE DISPENSER, 10 ML
A4450	TAPE, NON-WATERPROOF, PER 18 SQUARE INCHES
A4452	TAPE, WATERPROOF, PER 18 SQUARE INCHES
A6215	FOAM DRESSING, WOUND FILLER, STERILE, PER GRAM
A6216	GAUZE, NON-IMPREGNATED, NON-STERILE, PAD SIZE 16 SQ. IN. OR LESS, WITHOUT ADHESIVE BORDER, EACH DRESSING
A6402	GAUZE, NON-IMPREGNATED, STERILE, PAD SIZE 16 SQ. IN. OR LESS, WITHOUT ADHESIVE BORDER, EACH DRESSING
E0210	ELECTRIC HEAT PAD, STANDARD

DME ESRD SUPPLY HCPCS NOT PAYABLE TO DME SUPPLIERS

HCPCS Code	Long Description
A4215	NEEDLE, STERILE, ANY SIZE, EACH
A4244	ALCOHOL OR PEROXIDE, PER PINT
A4245	ALCOHOL WIPES, PER BOX
A4246	BETADINE OR PHISOHEX SOLUTION, PER PINT
A4247	BETADINE OR IODINE SWABS/WIPES, PER BOX
A4248	CHLORHEXIDINE CONTAINING ANTISEPTIC, 1 ML
A4651	CALIBRATED MICROCAPILLARY TUBE, EACH
A4652	MICROCAPILLARY TUBE SEALANT
A4653	PERITONEAL DIALYSIS CATHETER ANCHORING DEVICE, BELT, EACH
A4657	SYRINGE, WITH OR WITHOUT NEEDLE, EACH
A4660	SPHYGMOMANOMETER/BLOOD PRESSURE APPARATUS WITH CUFF AND STETHOSCOPE

HCPCS Code	Long Description
A4663	BLOOD PRESSURE CUFF ONLY
A4670	AUTOMATIC BLOOD PRESSURE MONITOR
A4671	DISPOSABLE CYCLER SET USED WITH CYCLER DIALYSIS MACHINE, EACH
A4672	DRAINAGE EXTENSION LINE, STERILE, FOR DIALYSIS, EACH
A4673	EXTENSION LINE WITH EASY LOCK CONNECTORS, USED WITH DIALYSIS
A4674	CHEMICALS/ANTISEPTICS SOLUTION USED TO CLEAN/STERILIZE DIALYSIS EQUIPMENT, PER 8 OZ
A4680	ACTIVATED CARBON FILTER FOR HEMODIALYSIS, EACH
A4690	DIALYZER (ARTIFICIAL KIDNEYS), ALL TYPES, ALL SIZES, FOR HEMODIALYSIS, EACH
A4706	BICARBONATE CONCENTRATE, SOLUTION, FOR HEMODIALYSIS, PER GALLON
A4707	BICARBONATE CONCENTRATE, POWDER, FOR HEMODIALYSIS, PER PACKET
A4708	ACETATE CONCENTRATE SOLUTION, FOR HEMODIALYSIS, PER GALLON
A4709	ACID CONCENTRATE, SOLUTION, FOR HEMODIALYSIS, PER GALLON
A4714	TREATED WATER (DEIONIZED, DISTILLED, OR REVERSE OSMOSIS) FOR PERITONEAL DIALYSIS, PER GALLON
A4719	"Y SET" TUBING FOR PERITONEAL DIALYSIS
A4720	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 249CC, BUT LESS THAN OR EQUAL TO 999CC, FOR PERITONEAL DIALYSIS
A4721	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 999CC BUT LESS THAN OR EQUAL TO 1999CC, FOR PERITONEAL DIALYSIS
A4722	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 1999CC BUT LESS THAN OR EQUAL TO 2999CC, FOR PERITONEAL DIALYSIS
A4723	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 2999CC BUT LESS THAN OR EQUAL TO 3999CC, FOR PERITONEAL DIALYSIS
A4724	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 3999CC BUT LESS THAN OR EQUAL TO 4999CC, FOR PERITONEAL DIALYSIS

HCPCS Code	Long Description
A4725	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 4999CC BUT LESS THAN OR EQUAL TO 5999CC, FOR PERITONEAL DIALYSIS
A4726	DIALYSATE SOLUTION, ANY CONCENTRATION OF DEXTROSE, FLUID VOLUME GREATER THAN 5999CC, FOR PERITONEAL DIALYSIS
A4728	DIALYSATE SOLUTION, NON-DEXTROSE CONTAINING, 500 ML
A4730	FISTULA CANNULATION SET FOR HEMODIALYSIS, EACH
A4736	TOPICAL ANESTHETIC, FOR DIALYSIS, PER GRAM
A4737	INJECTABLE ANESTHETIC, FOR DIALYSIS, PER 10 ML
A4740	SHUNT ACCESSORY, FOR HEMODIALYSIS, ANY TYPE, EACH
A4750	BLOOD TUBING, ARTERIAL OR VENOUS, FOR HEMODIALYSIS, EACH
A4755	BLOOD TUBING, ARTERIAL AND VENOUS COMBINED, FOR HEMODIALYSIS, EACH
A4760	DIALYSATE SOLUTION TEST KIT, FOR PERITONEAL DIALYSIS, ANY TYPE, EACH
A4765	DIALYSATE CONCENTRATE, POWDER, ADDITIVE FOR PERITONEAL DIALYSIS, PER PACKET
A4766	DIALYSATE CONCENTRATE, SOLUTION, ADDITIVE FOR PERITONEAL DIALYSIS, PER 10 ML
A4770	BLOOD COLLECTION TUBE, VACUUM, FOR DIALYSIS, PER 50
A4771	SERUM CLOTTING TIME TUBE, FOR DIALYSIS, PER 50
A4772	BLOOD GLUCOSE TEST STRIPS, FOR DIALYSIS, PER 50
A4773	OCCULT BLOOD TEST STRIPS, FOR DIALYSIS, PER 50
A4774	AMMONIA TEST STRIPS, FOR DIALYSIS, PER 50
A4802	PROTAMINE SULFATE, FOR HEMODIALYSIS, PER 50 MG
A4860	DISPOSABLE CATHETER TIPS FOR PERITONEAL DIALYSIS, PER 10
A4870	PLUMBING AND/OR ELECTRICAL WORK FOR HOME HEMODIALYSIS EQUIPMENT
A4890	CONTRACTS, REPAIR, AND MAINTENANCE, FOR HEMODIALYSIS EQUIPMENT
A4911	DRAIN BAG/BOTTLE, FOR DIALYSIS, EACH
A4913	MISCELLANEOUS DIALYSIS SUPPLIES, NOT OTHERWISE SPECIFIED
A4918	VENOUS PRESSURE CLAMP, FOR HEMODIALYSIS, EACH
A4927	GLOVES, NON-STERILE, PER 100
A4928	SURGICAL MASK, PER 20

HCPCS Code	Long Description
A4929	TOURNIQUET FOR DIALYSIS, EACH
A4930	GLOVES, STERILE, PER PAIR
A4931	ORAL THERMOMETER, REUSABLE, ANY TYPE, EACH
A6204	SURGICAL DRESSING
A6250	SKIN SEALANTS, PROTECTANTS, MOISTURIZERS, OINTMENTS, ANY TYPE, ANY SIZE
A6260	WOUND CLEANSERS, STERILE, ANY TYPE, ANY SIZE
E1500	CENTRIFUGE, FOR DIALYSIS
E1510	KIDNEY, DIALYSATE DELIVERY SYST. KIDNEY MACHINE, PUMP RECIRCULAT- ING, AIR REMOVAL SYST, FLOWRATE METER, POWER OFF, HEATER AND TEMPERATURE CONTROL WITH ALARM, I.V.POLES, PRESSURE GAUGE, CONCENTRATE CONTAINER
E1520	HEPARIN INFUSION PUMP FOR HEMODIALYSIS
E1530	AIR BUBBLE DETECTOR FOR HEMODIALYSIS, EACH, REPLACEMENT
E1540	PRESSURE ALARM FOR HEMODIALYSIS, EACH, REPLACEMENT
E1550	BATH CONDUCTIVITY METER FOR HEMODIALYSIS, EACH
E1560	BLOOD LEAK DETECTOR FOR HEMODIALYSIS, EACH, REPLACEMENT
E1570	ADJUSTABLE CHAIR, FOR ESRD PATIENTS
E1575	TRANSDUCER PROTECTORS/FLUID BARRIERS, FOR HEMODIALYSIS, ANY SIZE, PER 10
E1580	UNIPUNCTURE CONTROL SYSTEM FOR HEMODIALYSIS
E1590	HEMODIALYSIS MACHINE
E1592	AUTOMATIC INTERMITTENT PERITIONEAL DIALYSIS SYSTEM
E1594	CYCLER DIALYSIS MACHINE FOR PERITONEAL DIALYSIS
E1600	DELIVERY AND/OR INSTALLATION CHARGES FOR HEMODIALYSIS EQUIPMENT
E1610	REVERSE OSMOSIS WATER PURIFICATION SYSTEM, FOR HEMODIALYSIS
E1615	DEIONIZER WATER PURIFICATION SYSTEM, FOR HEMODIALYSIS
E1620	BLOOD PUMP FOR HEMODIALYSIS, REPLACEMENT
E1625	WATER SOFTENING SYSTEM, FOR HEMODIALYSIS
E1630	RECIPROCATING PERITONEAL DIALYSIS SYSTEM
E1632	WEARABLE ARTIFICIAL KIDNEY, EACH
E1634	PERITONEAL DIALYSIS CLAMPS, EACH
E1635	COMPACT (PORTABLE) TRAVEL HEMODIALYZER SYSTEM
E1636	SORBENT CARTRIDGES, FOR HEMODIALYSIS, PER 10

HCPCS Code	Long Description
E1637	HEMOSTATS, EACH
E1639	SCALE, EACH
E1699	DIALYSIS EQUIPMENT, NOT OTHERWISE SPECIFIED

LABS SUBJECT TO ESRD CONSOLIDATED BILLING

CPT/ HCPCS Code	Short Description
80047	Basic Metabolic Panel (Calcium, ionized)
80048	Basic Metabolic Panel (Calcium, total)
80051	Electrolyte Panel
80053	Comprehensive Metabolic Panel
80069	Renal Function Panel
80076	Hepatic Function Panel
82040	Assay of serum albumin
82108	Assay of aluminum
82306	Vitamin d, 25 hydroxy
82310	Assay of calcium
82330	Assay of calcium, Ionized
82374	Assay, blood carbon dioxide
82379	Assay of carnitine
82435	Assay of blood chloride
82565	Assay of creatinine
82570	Assay of urine creatinine
82575	Creatinine clearance test
82607	Vitamin B-12
82652	Vit d 1, 25-dihydroxy
82668	Assay of erythropoietin
82728	Assay of ferritin
82746	Blood folic acid serum
83540	Assay of iron
83550	Iron binding test
83735	Assay of magnesium
83970	Assay of parathormone
84075	Assay alkaline phosphatase
84100	Assay of phosphorus
84132	Assay of serum potassium
84134	Assay of prealbumin

CPT/ HCPCS Code	Short Description
84155	Assay of protein, serum
84157	Assay of protein by other source
84295	Assay of serum sodium
84466	Assay of transferrin
84520	Assay of urea nitrogen
84540	Assay of urine/urea-n
84545	Urea-N clearance test
85014	Hematocrit
85018	Hemoglobin
85025	Complete (cbc), automated (HgB, Hct, RBC, WBC, and Platelet count) and automated differential WBC count.
85027	Complete (cbc), automated (HgB, Hct, RBC, WBC, and Platelet count)
85041	Automated rbc count
85044	Manual reticulocyte count
85045	Automated reticulocyte count
85046	Reticyte/hgb concentrate
85048	Automated leukocyte count
86704	Hep b core antibody, total
86705	Hep b core antibody, igm
86706	Hep b surface antibody
87040	Blood culture for bacteria
87070	Culture, bacteria, other
87071	Culture bacteri aerobic othr
87073	Culture bacteria anaerobic
87075	Cultr bacteria, except blood
87076	Culture anaerobe ident, each
87077	Culture aerobic identify
87081	Culture screen only
87340	Hepatitis b surface ag, eia
87341	Hepatitis b surface ag eia
G0499	Hepb screen high risk indiv
G0306	CBC/diff wbc w/o platelet
G0307	CBC without platelet

DRUGS SUBJECT TO ESRD CONSOLIDATED BILLING

Category	HCPCS	Title
Access Management[1]	J1642	Inj heparin sodium per 10 u
	J1644	Inj heparin sodium per 1000u
	J2993	RETEPLASE INJECTION
	J2997	ALTEPLASE RECOMBINANT, 1 mg
	J0884	INJECTION, ARGATROBAN, 1 MG (FOR ESRD ON DIALYSIS)
	J0899	ARGATROBAN DIALYSIS, AUROMED 1 mg
Anemia Management	J0882	INJECTION, DARBEPOETIN ALFA, 1 MICROGRAM (FOR ESRD ON DIALYSIS)
	J0887	INJ. EPOETIN BETA (FOR ESRD ON DIALYSIS), 1 MCG
	J0901	VADADUSTAT, ORAL, 1MG, (FOR ESRD ON DIALYSIS)
	J1439	INJ FERRIC CARBOXY MALTOSE, 1MG
	J1750	INJECTION, IRON DEXTRAN, 50 MG
	J1756	IRON SUCROSE INJECTION
	J2916	INJECTION, SODIUM FERRIC GLUCONATE COMPLEX IN SUCROSE INJECTION, 12.5 MG
	Q0139	INJECTION, FERUMOXYTOL, FOR TREATMENT OF IRON DEFICIENCY ANEMIA, 1 MG (FOR ESRD ON DIALYSIS)
	Q4081	INJECTION, EPOETIN ALFA, 100 UNITS (FOR ESRD ON DIALYSIS)
	Q5105	INJECTION, EPOETIN ALFA-EPBX, BIOSIMILAR, (RETACRIT) (FOR ESRD ON DIALYSIS), 100 UNITS
Antiemetic	J2405	Ondansetron hcl injection 1 mg
	Q0162	Ondansetron oral 1mg
	J1308	Inj, famotidine, 0.25 mg
Cellular Management	J3420	INJECTION, VITAMIN B-12 CYANOCOBALAMIN, UP TO 1000 MCG
Fluid and Electrolyte Management Including Volume Expanders	P9041	Albumin (human),5%, 50ml

[1] For Urokinase use unclassified code J3490 with NDC/drug detail

	P9045	Albumin (human), 5%, 250 ml
	P9046	Albumin (human), 25%, 20 ml
	P9047	Albumin (human), 25%, 50ml
Bone and Mineral Metabolism[2]	J0601	SEVELAMER CARBONATE 20 MG
	J0602	SEVELAMER CARBONATE PDR 20MG
	J0603	SEVELAMER HYDROCHLORIDE 20MG
	J0604	CINACALCET, ORAL, 1 MG, (FOR ESRD ON DIALYSIS)
	J0605	SUCROFERRIC OXYHYDROXIDE 5MG
	J0606	INJECTION, ETELCALCETIDE, 0.1 MG
	J0607	LANTHANUM CARBONATE ORAL 5MG
	J0608	LANTHANUM CARBONATE PWDR 5MG
	J0609	FERRIC CITRATE ORL 3 MG IRON
	J0612	CALCIUM GLUCONATE INJECTION
	J0615	CALCIUM ACETATE, ORAL, 23 MG
	J0620	CALCIUM GLYCER & LA CT/10 ML
	J0630	CALCITONIN SALMON INJECTION
	J0636	INJ CALCITRIOL PER 0.1 MCG
	J0895	DEFEROXAMINE MESYLATE INJ
	J1270	INJECTION, DOXERCALCIFEROL
	J1740	IBANDRONATE SODIUM
	J2430	PAMIDRONATE DISODIUM /30 MG
	J2501	PARICALCITOL
	J3489	ZOLEDRONIC ACID
Cellular Management	J1955	INJ LEVOCARNITINE PER 1 GM
Anti-Infectives	J0878	DAPTOMYCIN
	J0911	INSTILLATION, TAUROLIDINE 1.35 MG AND HEPARIN SODIUM 100 UNITS (CENTRAL VENOUS CATHETER LOCK FOR ADULT PATIENTS RECEIVING CHRONIC HEMODIALYSIS)
	J3373[3]	VANCOMYCIN HCL INJECTION per 10 mg
Composite Rate Drugs and Biologicals	A4802	INJ PROTAMINE SULFATE
	J0670	INJ MEPIVACAINE HYDROCHLORIDE
	J0879	INJECTION, DIFELIKEFALIN, 0.1 MICROGRAM, (FOR ESRD ON DIALYSIS)

[2] Oral-only phosphate binders are included effective January 1, 2025.

[3] Effective July 1, 2025

J0945	BROMPHE NIRAMINE MALEATE
J1200	INJ DIPHEN HYDRAMINE HCL
J1205	INJ CHLOROTHIAZIDE SODIUM
J1240	INJ DIMENHYDRINATE
J1938[4]	INJ FUROSEMIDE per 1 mg, generic
J2003[5]	INJ LIDOCAINE HCL FOR INTRAVENOUS INFUSION, per 1 MG
J2002[6]	Lidocaine in 5% dextrose per 1 mg
J2004[7]	Lidocaine with epinephrine per 1 mg
J2151[8]	INJ MANNITOL per 250 mg
J2360	INJECTION, ORPHENADRINE CITRATE, UP TO 60 MG
J2720	INJ PROTAMINE SULFATE
J2795	INJ ROPIVACAINE HYDROCHLORIDE
J3265	INJ TORSEMIDE
J3410	INJ HYDROXYZINE HCL
J3480	INJ. POTASSIUM CHLORIDE, PER 2 MEQ.
J7030	INFUSION, NORMAL SALINE SOLUTION , 1000 CC
J7040	INFUSION, NORMAL SALINE SOLUTION, STERILE (500 ML = 1 UNIT)
J7042	5% DEXTROSE/NORMAL SALINE (500 ML = 1 UNIT)
J7050	INFUSION, NORMAL SALINE SOLUTION, 250 CC
J7060	5% DEXTROSE/WATER (500 ML = 1 UNIT)
J7070	INFUSION, D5W, 1000 CC
J7120	RINGERS LACTATE INFUSION, UP TO 1000 CC
J7131	HYPERTONIC SALINE SOL

[4] Effective April 1, 2025, J1938 replaced J1940.
[5] Effective October 1, 2024
[6] Effective October 1, 2024
[7] Effective October 1, 2024
[8] Effective October 1, 2024

	Q0163	DIPHENHYDRAMINE HYDROCHLORIDE
