

Part D Senior Savings Model Overview – “Insulin Savings”

- For the 2021 plan year, enhanced alternative (plans that offer extra benefits) standalone Part D plans (PDPs) and Medicare Advantage plans that offer prescription drug coverage (MA-PDs) can participate to offer a drug benefit that **offers both pen and vial forms of the common insulins (rapid-acting, short-acting, intermediate-acting, and long-acting) for no more than a \$35 copay for a month’s-supply, per insulin prescription.**
- For 2021, over 1,600 plans nationwide will offer these benefits, with plan options for beneficiaries in each state, DC, and PR. Plan benefits will include a maximum \$35 copay for a month’s supply, and start January 1, with coverage in the deductible, initial coverage, and coverage gap phases of Part D.
- CMS estimates enrollees in participating plans will **save an average of \$446** in annual out-of-pocket costs on insulin, or over 66 percent.

Part D Senior Savings Model Plan Finder

- People with Medicare will be able to find a drug plan participating in the Part D Senior Savings Model through the Medicare Plan Finder at [Medicare.gov/plan-compare](https://www.Medicare.gov/plan-compare).
- Plan Finder includes a filter – “Insulin Savings” - to help beneficiaries identify plans that will offer capped out-of-pocket costs for insulin through the model. The filter will be promoted with a call-out action for users who enter covered insulin in their drug lists.
- People with Medicare will be able to find participating plans in the Plan Finder beginning on October 1, and enroll in them during the Open Enrollment Period (OEP) October 15 – December 7.
