2014 Edition Release 2 EHR Certification Criteria Final Rule	Michael Lipinski, ONC

CMS 2014 CEHRT Flexibility Rule

Beth Myers

Policy and Outreach Lead,
CMS eHealth Initiatives

CMS 2014 CEHRT Flexibility Rule Overview

- » CMS published final rule on August 29
- » Effective October 1
- » Rule provisions:
 - Allows providers to meet meaningful use with EHRs certified to the 2011 or the 2014 Edition criteria, or a combination of both Editions for an EHR Reporting Period in 2014
 - Requires providers to report using 2014 Edition CEHRT for EHR Reporting Period in 2015
 - Extends Stage 2 through 2016

Stage 2 Extension

Rule extends Stage 2 through 2016

Earliest a provider can begin Stage 3 is now 2017

Benefits of this extension include:

- Ensures that CMS has enough data to inform Stage 3 policy
- Allows providers who first attested to meaningful use in 2011 or 2012 to remain in Stage 2 for an additional year
- Affords providers and technology developers with additional time to prepare for Stage 3

2014 CEHRT Flexibility

- Flexibility only available to providers who are **unable to fully implement** 2014 Edition CEHRT for an EHR reporting period in 2014 due to delays in 2014 Edition CEHRT availability
- First-year Medicaid participants must use 2014 Edition CEHRT in order to receive a payment for adopt, implement, or upgrade for 2014 participation

2014 Flexibility Options: Stage 1

Options for providers scheduled to meet Stage 1 in 2014

2011 CEHRT

- 2013 Stage 1 objectives and 2013 CQMs

2011 & 2014 CEHRT

- 2013 Stage 1 objectives and 2013 CQMs; **or**
- 2014 Stage 1 objectives and 2014 CQMs

2014 CEHRT

- 2014 Stage 1 objectives and 2014 CQMs

2014 Flexibility Options: Stage 2

Options for providers scheduled to meet Stage 2 in 2014

2011 CEHRT

- 2013 Stage 1 objectives and 2013 CQMs

2011 & 2014 CEHRT

- 2013 Stage 1 objectives and 2013 CQMs; **or**
- 2014 Stage 1 objectives and 2014 CQMs; **or**
- 2014 Stage 2 objectives and 2014 CQMs

2014 CEHRT

- 2014 Stage 2 objectives and 2014 CQMs; **or**
- 2014 Stage 1 objectives and 2014 CQMs

Attestation System Updates

- Attestation System will make options clear
- Enter EHR product information into CHPL to identify Edition of CEHRT and obtain a unique certification ID
 - Entering that ID into Attestation System will show provider which options they have for 2014
- New Attestation User Guide will be available soon

For CHPL, go to: <http://oncchpl.force.com/ehrcert?q=chpl>

ONC CHPL Website:

<http://oncchpl.force.com/ehrcert?q=chpl>

The screenshot shows a web browser window displaying the ONC CHPL website. The browser's address bar shows the URL <http://oncchpl.force.com/ehrcert?q=chpl>. The website header features the HealthIT.gov logo and the title "Certified Health IT Product List" with the subtitle "The Office of the National Coordinator for Health Information Technology".

The main content area contains the following text:

The Certified Health IT Product List (CHPL) provides the authoritative, comprehensive listing of Complete Electronic Health Records (EHRs) and EHR Modules that have been tested and certified under the ONC HIT Certification Program, maintained by The Office of the National Coordinator for Health Information Technology (ONC).

Each Complete EHR and EHR Module listed on CHPL has been tested and certified by an authorized testing and certification body against applicable standards and certification criteria adopted by the HHS Secretary. EHR technologies that have been certified under the ONC HIT Certification Program are eligible to be used for the Centers for Medicare and Medicaid (CMS) EHR Incentive Programs. The CHPL provides CMS EHR Certification ID for qualified products to be used in the CMS EHR Incentive Programs.

Eligible providers have the ability to use EHR technology that is certified to 2011 edition certification criteria, 2014 edition certification criteria, and a combination of 2011 and 2014 edition certification criteria to generate CMS EHR Certification ID that is submitted to CMS as part of attesting to meaningful use of certified EHR technology.

Please send suggestions and comments regarding the Certified Health IT Product List (CHPL) to ONC.certification@hhs.gov, with "CHPL" in the subject line.

Vendors or developers with questions about their product's listing should contact their certification body that certified their product.

STEP 1: TO WHICH EDITION OF ONC HIT EHR CERTIFICATION ARE YOU ATTESTING?

Three buttons are visible for selection:

- 2011 Edition
- Combination of 2011 and 2014 Edition
- 2014 Edition

USING THE CHPL WEBSITE / CERTIFICATION ID NUMBERS FOR OPTIONS UNDER THE 2014 CEHRT FLEXIBILITY RULE

UPDATE: These step-by-step instructions also would apply to providers who intend to use a certified EHR technology option identified in the Flexibility Rule, which was published by CMS on September 4, 2014. The Flexibility Rule grants flexibility to providers who are unable to fully implement 2014 Edition for an EHR reporting period in 2014 due to delays in the availability of 2014 certified EHR technology. Under the Flexibility Rule, such providers participating in the Medicare and Medicaid EHR Incentive Programs in 2014 may use EHRs that have been certified under the 2011 Edition, a combination of the 2011 and 2014 Edition, or the 2014 Edition. More information on the Flexibility Rule may be found [here](#).

To browse the CHPL and review the comprehensive listing of certified EHR products, follow the steps outlined below:

- Select the EHR Certification Criteria Edition for attestation (2011 Edition, Combination of 2011 and 2014 Edition, 2014 Edition)
 - 2011 Edition – List of EHR products that are certified to 2011 Edition certification criteria
 - 2014 Edition – List of EHR products that are certified to 2014 Edition certification criteria
 - Combination of 2011 and 2014 Edition – List of EHR products that are certified to 2011 Edition certification criteria AND/OR equivalent 2014 Edition certification criteria
- Select Practice Type (Ambulatory or Inpatient). Practice Type selection available only for '2011 Edition' and 'Combination of 2011 and 2014 Edition' attestation
- Select the "Browse" button to view the list of all CHPL products

To obtain a CMS EHR Certification ID, follow the steps outlined below:

- Select the EHR Certification Criteria Edition for attestation (2011 Edition, Combination of 2011 and 2014 Edition, 2014 Edition)
- Select Practice Type (Ambulatory or Inpatient). Practice Type selection available only for '2011 Edition' and 'Combination of 2011 and 2014 Edition' attestation
- Search for certified complete EHR products or EHR modules by browsing all products, searching by product name, CHPL product number, vendor name, product classification, or criteria met. A search by state with multiple providers (CMS) is available only for 2014 Edition attestation.

ONC CHPL Website:

<http://oncchpl.force.com/ehrcert?q=chpl>

STEP 1: TO WHICH EDITION OF ONC HIT EHR CERTIFICATION ARE YOU ATTESTING?

2011 Edition Combination of 2011 and 2014 Edition 2014 Edition

USING THE CHPL WEBSITE / CERTIFICATION ID NUMBERS FOR OPTIONS UNDER THE 2014 CEHRT FLEXIBILITY RULE

UPDATE: These step-by-step instructions also would apply to providers who intend to use a certified EHR technology option identified in the [Flexibility Rule](#), which was published by CMS on September 4, 2014. The Flexibility Rule grants flexibility to providers who are unable to fully implement 2014 Edition for an EHR reporting period in 2014 due to delays in the availability of 2014 certified EHR technology. Under the Flexibility Rule, such providers participating in the Medicare and Medicaid EHR Incentive Programs in 2014 may use EHRs that have been certified under the 2011 Edition, a combination of the 2011 and 2014 Edition, or the 2014 Edition. More information on the Flexibility Rule may be found [here](#).

To browse the CHPL and review the comprehensive listing of certified EHR products, follow the steps outlined below:

1. Select the EHR Certification Criteria Edition for attestation (2011 Edition, Combination of 2011 and 2014 Edition, 2014 Edition)
2011 Edition – List of EHR products that are certified to 2011 Edition certification criteria.
2014 Edition – List of EHR products that are certified to 2014 Edition certification criteria.
Combination of 2011 and 2014 Edition – List of EHR products that are certified to 2011 Edition certification criteria AND/OR equivalent 2014 Edition certification criteria.
2. Select Practice Type (Ambulatory or Inpatient). Practice Type selection available only for '2011 Edition' and 'Combination of 2011 and 2014 Edition' attestation
3. Select the "Browse" button to view the list of all CHPL products

To obtain a CMS EHR Certification ID, follow the steps outlined below:

1. Select the EHR Certification Criteria Edition for attestation (2011 Edition, Combination of 2011 and 2014 Edition, 2014 Edition)
2. Select Practice Type (Ambulatory or Inpatient). Practice Type selection available only for '2011 Edition' and 'Combination of 2011 and 2014 Edition' attestation
3. Search for certified complete EHR products or EHR modules by browsing all products, searching by product name, CHPL product number, vendor name, product classification, or criteria met. A search by clinical quality measures (CQMs) is available only for 2014 Edition attestation
4. Add certified complete EHR product(s) or a combination EHR module(s) to cart to determine if selected product(s) meet 100% of the required criteria to demonstrate meaningful use
5. Request a CMS EHR Certification ID for CMS registration or attestation

Office of the National Coordinator for Health Information Technology

Addressing Public Comments: Attesting

- Attestation Timing Options
 - Attest at any time after reporting period ends- up until 2 months after end of fiscal/calendar year
 - Ex: Providers can attest to Q1 data after Attestation System updates with flexibility options in mid-October

Addressing Public Comments: Payment Adjustments

- Payment adjustments set by HITECH Act
- To avoid 2016 payment adjustment, Medicare eligible professionals should:
 - Demonstrate meaningful use during an EHR reporting period in 2014 and attest by:
 - **November 30, 2014** for eligible hospitals
 - **February 28, 2015** for eligible professionals
 - OR**
 - Apply to CMS for hardship exception by:
 - **April 1, 2014** for eligible hospitals
 - **July 1, 2015** for eligible professionals

April 1, 2014

Medicare EH
2015 hardship
exception
deadline

Oct 1, 2014

1st yr Medicare EP
attestation deadline to
avoid 2015 payment
adjustment

Feb 28, 2015

Medicare EP

avoid 2016
adjustment

April 1, 2015

Medicare EH
2016 hardship
exception
deadline

Addressing Public Comments: Reporting

- Flexibility does **not** allow for objectives and measures to be mixed and matched
- CQMs **cannot** be separated from meaningful use objectives and measures
 - Allowed to use updated specifications

CEHRT Rule Resources

- » [CEHRT Interactive Decision Tool](#) – providers answer a few questions about their current stage of meaningful use and Edition of EHR certification, and the tool displays the corresponding 2014 options.
- » [2014 CEHRT Flexibility Chart](#) – chart provides a visual overview of CEHRT participation options for 2014.
- » [2014 CEHRT Rule Quick Guide](#) – guide provides corresponding resources based on the option a provider chooses for 2014 EHR Incentive Programs participation.

These resources are all available on the Educational Resources webpage:
<http://www.cms.gov/Regulations-and-Guidance/Legislation/EHRIncentivePrograms/EducationalMaterials.html>

The Office of the National Coordinator for
Health Information Technology

2014 Edition Release 2 EHR Certification Criteria Final Rule

Michael L. Lipinski, JD
Office of Policy

Putting the **I** in **HealthIT**
www.HealthIT.gov

- **Background**
- **Edition Naming Approach**
- **2014 Edition Release 2 Criteria and Provisions**
- **2014 Edition Framework with Release 2**
- **What's Next?**

Background

- Proposed a Voluntary Proposed Edition on February 26, 2014
- Goals were to provide regulatory flexibility, clarify policy, improve interoperability, and make administrative changes to the ONC HIT Certification Program
- Stakeholders provided feedback that the full set of proposals in the proposed rule was too expansive
- Support for incremental rule making was mixed

- Adopts a small subset of the proposals as optional and revised 2014 Edition Release 2 certification criteria that provide flexibility, clarity, and enhance health information exchange
- Provides more choices for health IT developers and their customers, including new interoperable ways to securely exchange health information
- Adopts proposals make our program more effective and less burdensome
- Provides gradual rulemaking that serves as a model for ONC to update its rules as technology and standards evolve to support innovation

Edition Naming Approach

- Previous editions of EHR certification criteria were named for the first year when we would expect compliance to support the EHR Incentive Programs. e.g., 2011 and 2014 Editions.
- Stakeholder feedback on our most recent February NPRM noted that this naming approach creates unrealistic expectations that certified products will be available by the edition year.
- ONC determined that editions should not have any additional implied meaning and will therefore name editions of certification criteria by the year in which the final rule is released.
- Other rulemakings similar to the 2014 Edition Release 2 final rule would be added to the most current edition of certification criteria (e.g., 201X Edition Release 2).

2014 Edition Release 2 Criteria and Provisions

2014 Edition Release 2

EHR Certification Criteria

Optional Certification Criteria		Revised Certification Criteria	
Regulation Section	Title of Regulation Paragraph	Regulation Section	Title of Regulation Paragraph
§ 170.314(a)(18)	Optional – computerized provider order entry – medications	§ 170.314(e)(1)	View, download, and transmit to 3 rd party
§ 170.314(a)(19)	Optional – computerized provider order entry – laboratory	§ 170.314(g)(3)	Safety-enhanced design
§ 170.314(a)(20)	Optional – computerized provider order entry – diagnostic imaging		
§ 170.314(b)(8)	Optional – transitions of care		
§ 170.314(b)(9)	Optional – clinical information reconciliation and incorporation		
§ 170.314(f)(7)	Optional – ambulatory setting only – Transmission to public health agencies – syndromic surveillance		
§ 170.314(g)(1)	Optional – automated numerator recording		
§ 170.314(h)(1)	Optional – Applicability Statement for Secure Health Transport		
§ 170.314(h)(2)	Optional – Applicability Statement for Secure Health Transport and XDR/XDM for Direct Messaging		
§ 170.314(h)(3)	Optional – SOAP Transport and Security Specification and XDR/XDM for Direct Messaging		

Alternative Certification Criteria and Certification Approaches

Computerized Provider Order Entry (CPOE)

- Divides CPOE into three separate certification criteria:
 - Medications (same requirements remain)
 - Laboratory (same requirements remain)
 - Diagnostic imaging (formerly radiology)
- **Why?**
 - Allows an EHR technology developer to create adaptations, such as mobile apps for one of the three capabilities **OR** certify to just one capability
 - Provides eligible professionals flexibility for the EHR Incentive Programs based on practice needs

Transitions of Care (ToC) & View, Download, and Transmit to 3rd Party (VDT)

- New ToC criterion
 - Decoupled the “content” portion of the 2014 Edition “transitions of care” (ToC) criterion from the “transport” capabilities and adopted a new set of transport criteria (see next slide).
 - Adopted the Implementation Guide (IG) for Direct Edge Protocols v1.1 to promote interoperability and an EHR’s ability to reliably connect to a HISP.
- Revised VDT criterion
 - Revised the VDT criterion to include the same decoupling of transport made to the new ToC criterion as optional for certification (i.e., use of the Edge Protocols IG v1.1)
- **Why?** Allows health information service providers (HISPs) and other health IT developers to certify to either **content** capabilities or **transport** capabilities.
Note: Developers do not have to seek certification to both criteria.

- Adopted three certification criteria for transmission methods as part of decoupling “content” and “transport” for ToC and VDT:
 1. Direct
 2. Direct and XDR/XDM for Direct Messaging
 3. SOAP RTM and XDR/XDM for Direct Messaging
- **Why?** Allows for flexibility in the certification and use of transmission methods

- CIRI certification criterion “moves” incorporation capabilities from the ToC certification criterion.
- **Why?** Moves incorporation to a more appropriate criterion which better reflects the clinical workflow associated with incorporation.

- Applicable to ambulatory setting/eligible professionals
- Permits any electronic method of creating syndromic surveillance information for exchange
- **Why?**
 - The industry has not developed an implementation guide (IG) for the adopted standard (HL7 2.5.1 IG) and providers are sending syndromic surveillance data to public health using alternate standards (such as CDA and QRDA III) without developed, consensus IGs for syndromic surveillance.
 - Promotes flexibility and providers' ability to achieve the MU syndromic surveillance objective for Stage 2 using certified EHR technology.

- Safety-enhanced design (SED) criterion
 - Revised to include the optional three CPOE criteria and optional CIRI criterion.
 - **Why?** Provides regulatory clarity.
- Automated numerator recording criterion
 - Designated as “optional” for the purposes of excluding it from the 2014 Edition Complete EHR definition.
 - **Why?** Provides regulatory clarity.
 - **Note:** EHR Modules **must** be certified to the automated numerator recording criterion or the automated measure calculation criterion.

- **How does it work?** Allows the use of test results from a previous certification for certification to functionalities that have not changed in Release 2, subject to the discretion of an ONC-Authorized Certification Body (ONC-ACB).
- Seven Release 2 criteria are eligible for gap certification if EHRs were certified to the 2014 Edition versions of these functionalities or, **in some cases**, the 2011 Edition:
 - Three optional CPOE criteria
 - Optional syndromic surveillance criterion
 - Three optional transmission criteria

- Discontinued the “Complete EHR” definition and Complete EHR certification beginning with the next adopted edition of certification criteria.
 - **Why?** Adds regulatory clarity, supports flexibility & reduces burden
 - **Note:** This does not affect prior or future 2014 Edition certifications.
- Adopted the “ONC Certified HIT” certification and design mark for required use by ONC-ACBs.
 - **Why?** Provides clarity for the market as it relates to health IT certified under the program.
 - **Note:** Health IT developers do **not** have to use the mark.
- Adopted an updated standard (ISO/IEC 17065) for the accreditation of ONC-ACBs.
 - **Why?** Maintains alignment with industry practices.

- Finalized a proposal to remove 2011 Edition-specific EHR certification criteria and related standards, terms, and requirements from the Code of Federal Regulations (CFR) effective March 1, 2015.
 - **Why?**
 - EHR technology certified to 2011 Edition will no longer meet the CEHRT definition starting in 2015
 - Keeps criteria editions current for the purposes of Stark/Anti-Kickback EHR donation rules
- Finalized a proposal to remove the temporary certification program (TCP) regulations from the CFR on the effective date of this final rule.
 - **Why?** TCP sunset on October 4, 2012, and is no longer in existence

2014 Edition Framework With Release 2

2014 Edition CEHRT

Easy as 1, 2, 3 + C*

EP/EH/CAH would only need to have EHR technology with capabilities certified for the MU menu set objectives & measures for the stage of MU they seek to achieve.

EP/EH/CAH would need to have EHR technology with capabilities certified for the MU core set objectives & measures for the stage of MU they seek to achieve unless the EP/EH/CAH can meet an exclusion.

EP/EH/CAH must have EHR technology with capabilities certified to meet the Base EHR definition.

*C = CQMs

Certification Criteria Included in the Base EHR Definition

- It is a definition. It is meant to be used like a checklist to meet the CEHRT definition.
- It is not “a Base EHR” or a singular type of EHR technology that has these capabilities.
- The Base EHR definition includes CQM requirements not specified in this table.

2014 Edition EHR Certification Criteria Required to Satisfy the Base EHR Definition		
EHR technology that:	Certification Criteria	
Includes patient demographic and clinical health information, such as medical history and problem lists	Demographics § 170.314(a)(3)	<input checked="" type="checkbox"/>
	Problem List § 170.314(a)(5)	<input checked="" type="checkbox"/>
	Medication List § 170.314(a)(6)	<input checked="" type="checkbox"/>
	Medication Allergy List § 170.314(a)(7)	<input checked="" type="checkbox"/>
Has the capacity to provide clinical decision support	Clinical Decision Support § 170.314(a)(8)	<input checked="" type="checkbox"/>
Has the capacity to support physician order entry	Computerized Provider Order Entry For at least one of the four criteria at § 170.314(a)(1), (a)(18), (a)(19) or (a)(20)	<input checked="" type="checkbox"/>
Has the capacity to capture and query information relevant to health care quality	Clinical Quality Measures § 170.314(c)(1) through (3)	<input checked="" type="checkbox"/>
Has the capacity to exchange electronic health information with, and integrate such information from other sources	Transitions of Care § 170.314(b)(1) and (2); or (b)(8) and (h)(1); or (b)(1) and (b)(2) combined with either (b)(8) or (h)(1), or both (b)(8) and (h)(1)	<input checked="" type="checkbox"/>
	Data Portability § 170.314(b)(7)	<input checked="" type="checkbox"/>
Has the capacity to protect the confidentiality, integrity, and availability of health information stored and exchanged	Privacy and Security § 170.314(d)(1) through (8)	<input checked="" type="checkbox"/>

- Core - CPOE Example
 - Stage 2 has separate % measure requirements for medications, laboratory, and radiology orders, but exclusions *may* apply (i.e., writing fewer than 100 of each order type during an EHR reporting period)
 - Stage 1 does not include measures for laboratory and radiology orders
- Menu - Syndromic Surveillance Example
 - Stage 2 Measure: Successful ongoing submission of electronic syndromic surveillance data from CEHRT to a public health agency for the entire reporting period

Two Types of Certifications

“Complete EHR” (i.e., EHR tech certified to all mandatory cert. criteria)

“EHR Module” (i.e., EHR tech certified to less than all mandatory cert. criteria)

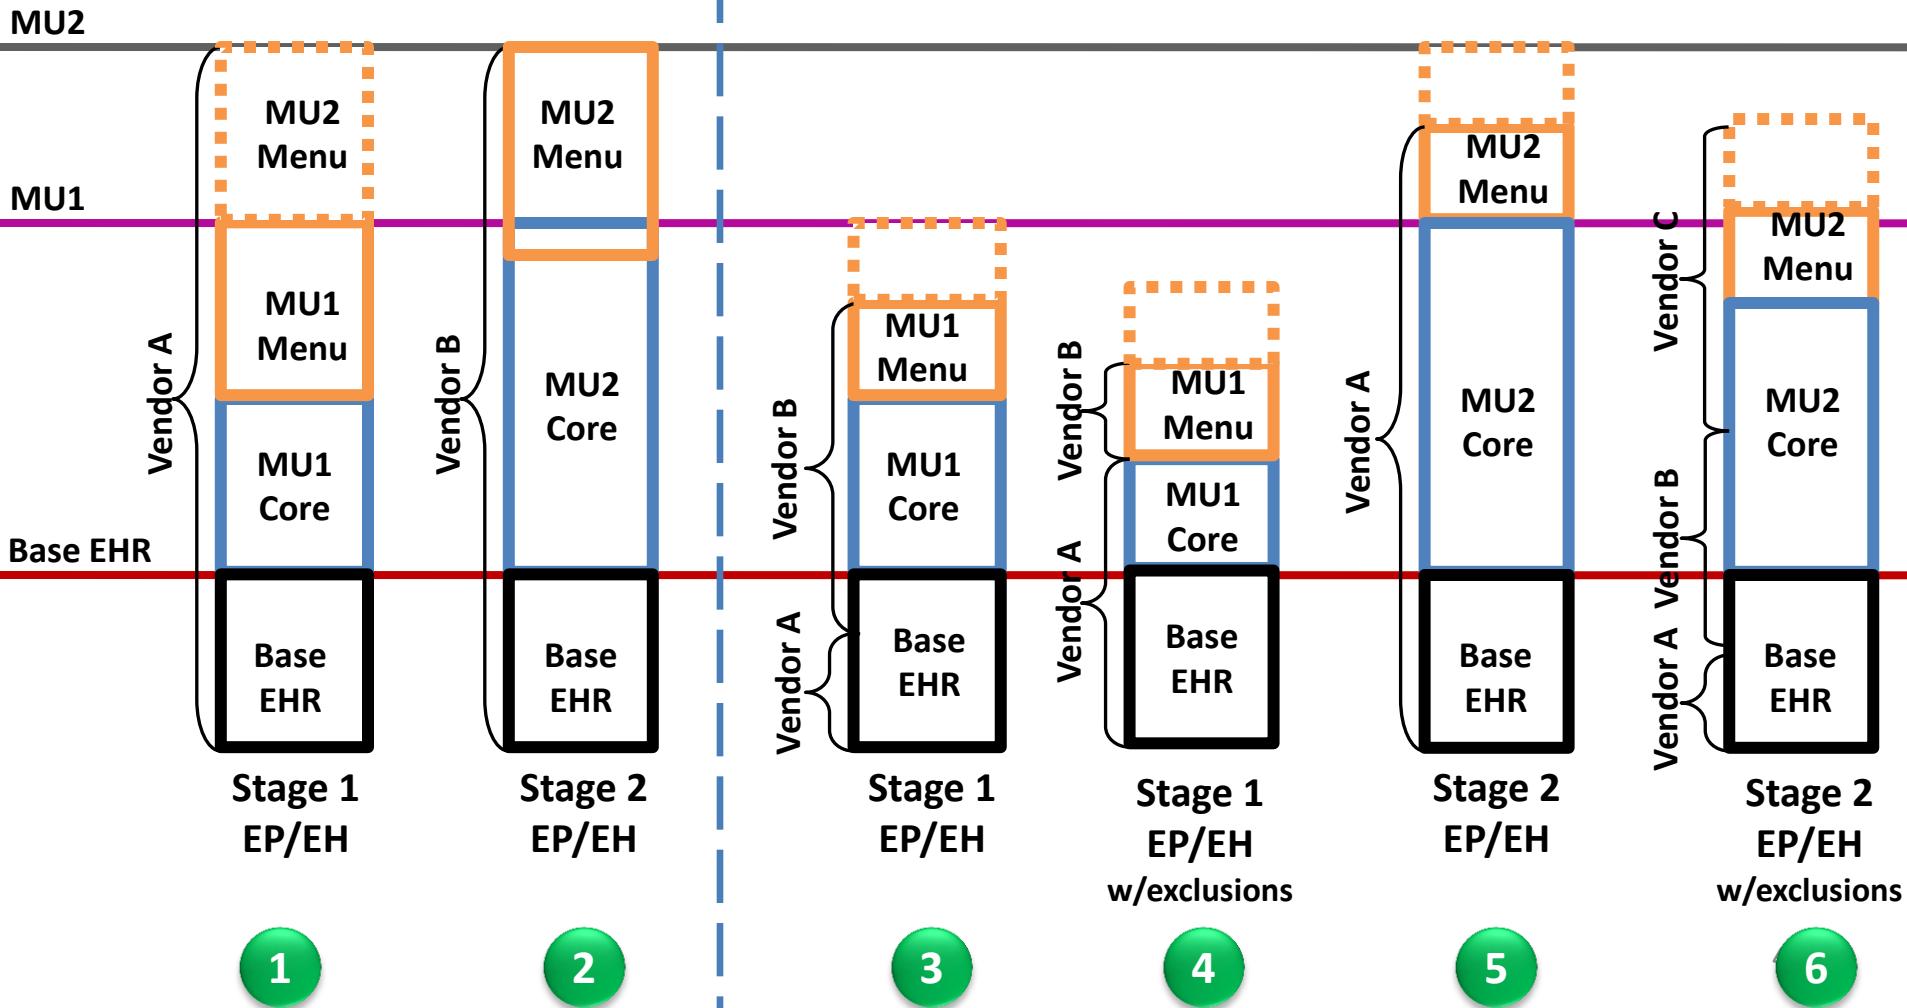

Why do we designate certification criteria optional?

Answer: The designation of “optional” for certification criteria (in this case, the 2014 Edition) was developed to accommodate the Complete EHR definition. If a certification criterion is not designated as “optional,” an EHR technology designed for the ambulatory setting or inpatient setting would need to be certified to the criterion in order to satisfy the Complete EHR definition and be issued a Complete EHR certification.

Understanding the CEHRT Definition and the Minimum Number of Certification Criteria to which EHR Technology would need to be certified

2014 Edition Complete EHR

2014 Edition EHR Module Approaches

What's Next?

- ONC will be publishing a proposed rule for the next edition of EHR certification criteria jointly with the next CMS EHR Incentive Programs proposed rule. We anticipate these rules will be published this winter.
- We anticipate that the next edition of certification criteria will contain functionalities that will be required for the next stage of the EHR Incentive Programs.
- The public comments we received on the proposed rule will help inform our proposals for the next edition of certification criteria.
