Data-Driven Excellence in Kidney Care

The End Stage Renal Disease (ESRD) Network Program is revolutionizing quality care for ESRD patients across the nation through the power of data and analytics!

Here's how we're making a difference:

- **100% Technical Assistance Coverage** - Every dialysis facility has access to expert support for managing patient data
- **Advanced Data Analytics** - Specialized staff use sophisticated systems to validate and analyze data, ensuring every decision is informed by accurate information
- **Continuous Quality Improvement** - We identify facilities experiencing challenges and provide ongoing follow-up until satisfactory results are achieved
- **Reduced Provider Burden** - Near real-time data support helps providers while enhancing quality oversight

By ensuring data accuracy and leveraging advanced analytics, we're creating a foundation for continuous quality improvement that benefits every kidney patient in America.

Transforming Kidney Care Through Data-Driven Excellence

The End Stage Renal Disease (ESRD) Network Program is setting a new standard for quality improvement in healthcare by harnessing advanced analytics and comprehensive technical assistance.

Key Program Highlights:

- **Sophisticated Data Management** - Networks employ specialized staff performing advanced data analysis using the End-Stage Renal Disease Quality Reporting System (EQRS) and other relevant data sources
- **Universal Technical Assistance** - 100% of dialysis facilities receive support for managing patient and facility-level census data —no facility is left behind.
- **Proactive Quality Oversight** - ESRD Networks identify facilities experiencing challenges for targeted technical assistance and provide ongoing follow-up to ensure continuous improvement
- **Real-Time Support** - Near real-time data analytic support reduces provider reporting burden while enhancing quality oversight

Critical Data Challenges Addressed:

- Reconciling routine and acute terminations for the Social Security Administration

- Resolving Near Matches, System Discharges, and Accretions within 60 days
- Active participation in EQRS system demonstrations

This comprehensive approach to data accuracy, validation, and technical assistance creates a foundation for continuous quality improvement that benefits every kidney patient in America.
