

Socials: 4 Pillars, 9 Outcomes

Facebook Post:

Transforming Kidney Care — One Patient at a Time.

The ESRD Network Program is committed to revolutionizing how we deliver care for patients living with End-Stage Renal Disease. Through four key priorities — Empowering Patient & Family Choice, Improving Care Coordination, Promoting Whole Health, and Enhancing Data Interoperability — we're driving real, measurable change.

<i>Key Priority</i>	<i>Outcome Measure</i>	<i>Direction</i>
<i>Empower Patient & Family Choice</i>	Home dialysis utilization among eligible ESRD patients	↑ Increase
	ESRD patients offered transplant center referral	↑ Increase
	Acceptance of kidney transplant offers with KDPI \geq 60%	↑ Increase
<i>Improve Care Coordination</i>	Rate of outpatient ED visits per 100 patient-months	↓ Decrease
	Rate of hospitalizations per 100 patient-months	↓ Decrease
<i>Promote Whole Health</i>	Clinical depression screenings with follow-up plan if positive	↑ Improve
	Pneumococcal vaccine uptake among eligible ESRD patients	↑ Increase
	Influenza vaccine uptake among eligible ESRD patients	↑ Increase
<i>Enhance Data Interoperability</i>	Dialysis facilities using advanced EHR functionality for data sharing	↑ Increase

Every ESRD patient deserves care that is coordinated, compassionate, and centered on *their* needs. Together, we're making that a reality.

Kidney care is changing — and patients are at the center of it all.

The ESRD Network Program is working toward 9 powerful outcomes through 4 key priorities:

1. *Empowering Choice* with home dialysis & transplant referrals
2. *Improving Coordinating Care* means fewer ER visits & hospitalizations
3. *Promoting Whole Health* means depression screenings & life-saving vaccines, and
4. *Enhancing Data Interoperability* means smarter, connected care.

Every patient deserves care that sees the *whole* person — not just the diagnosis.

<i>Key Priority</i>	<i>Outcome Measure</i>	<i>Direction</i>
	Home dialysis utilization among eligible ESRD patients	↑ Increase

<i>Empower Patient & Family Choice</i>	ESRD patients offered transplant center referral	↑ Increase
	Acceptance of kidney transplant offers with KDPI ≥ 60%	↑ Increase
<i>Improve Care Coordination</i>	Rate of outpatient ED visits per 100 patient-months	↓ Decrease
	Rate of hospitalizations per 100 patient-months	↓ Decrease
<i>Promote Whole Health</i>	Clinical depression screenings with follow-up plan if positive	↑ Improve
	Pneumococcal vaccine uptake among eligible ESRD patients	↑ Increase
	Influenza vaccine uptake among eligible ESRD patients	↑ Increase
<i>Enhance Data Interoperability</i>	Dialysis facilities using advanced EHR functionality for data sharing	↑ Increase

Transforming Kidney Care Through Four Strategic Priorities

These four priorities are aligned to nine measurable outcome goals — a unified commitment to care that is coordinated, compassionate, and centered on the individual.

<i>Key Priority</i>	<i>Outcome Measure</i>	<i>Direction</i>
<i>Empower Patient & Family Choice</i>	Home dialysis utilization among eligible ESRD patients	↑ Increase
	ESRD patients offered transplant center referral	↑ Increase
	Acceptance of kidney transplant offers with KDPI ≥ 60%	↑ Increase
<i>Improve Care Coordination</i>	Rate of outpatient ED visits per 100 patient-months	↓ Decrease
	Rate of hospitalizations per 100 patient-months	↓ Decrease
<i>Promote Whole Health</i>	Clinical depression screenings with follow-up plan if positive	↑ Improve

	Pneumococcal vaccine uptake among eligible ESRD patients	↑ Increase
	Influenza vaccine uptake among eligible ESRD patients	↑ Increase
<i>Enhance Data Interoperability</i>	Dialysis facilities using advanced EHR functionality for data sharing	↑ Increase
