### Key Features of the CMS QIN-QIO 13th Scope of Work: Transforming Healthcare Quality Improvement

#### LinkedIn and Facebook:

The CMS QIN-QIO 13th Scope of Work is revolutionizing healthcare quality improvement across America. This represents a complete paradigm shift in how quality improvement is delivered to healthcare providers.

#### Key Program Features:

- Advanced Technology Platform: Real-time analytics and 24/7 quality improvement tool access
- Customer Service Approach: Partnership-focused rather than compliance-driven
- Strategic Focus Areas: Chronic disease management, healthcare-associated infections, behavioral health integration, and care transitions

#### Provider Benefits:

- Reduced Administrative Burden
- Real-time data access tailored to specific organizational needs
- Face-to-face support when appropriate
- Collaborative improvement approach versus external mandates

**National Alignment:** The program directly supports HHS' Make America Healthy Again (MAHA) initiative and aligns with CMS strategic priorities.

This transformation represents quality improvement that works in partnership with healthcare providers. Seven consolidated regional QIN-QIOs are prepared to collaborate with hospitals, nursing homes, and outpatient practices nationwide. Learn more [here](#)
