Project Title: Development of a Quality Measure Assessing Delay in Progression of Chronic Kidney Disease (CKD)

Project Overview:

The Centers for Medicare & Medicaid Services (CMS), through its Center for Medicare and Medicaid Innovation (CMMI), has contracted Yale New Haven Health Services Corporation Center for Outcomes Research and Evaluation (CORE) to develop a quality measure related to delay in CKD progression. The contract name is Quality Measure Development and Analytic Support, Option Year 1. The contract number is HHS-75FCMC18D0042, Task Order HHS-75FCMC19F0003. As part of its measure development process, CORE convenes groups of stakeholders and experts who contribute direction and thoughtful input to the measure developer during measure development and maintenance.

These individuals were selected and have agreed to serve as the Technical Expert Panel (TEP) for this project. The objective of the Technical Expert Panel is to advise on the measure specifications and provide their opinion on the face validity of the measure. The members on this panel are stakeholders that have varied backgrounds and perspectives on the treatment of patients with chronic kidney disease and end-stage renal disease.
