

GitHub Repositories

CCSVDC-InfrastructureSecOps-Kibana-DashboardsList of all GitHub repositories in use across CCS/CNS/ITOPS (Old West List [Team GitHub.com Repository](#))

Please see [Creating a new Github.com/CMSGov Repository](#) if you need a new repo.

For instructions and runbooks for how to use Github on CMS Cloud please see: [GitHub Norms](#)

For the September Audit, please perform the following:

- Verify team, description, and access columns are correct.
- In the repo itself, make sure there is one owner, and the teams are setup according to [Github.com Teams](#)
 - Note: Unless the repo is shared to all ADOs, (e.g. Gold Image), please remove all non-cms cloud groups from your repo (e.g. aws-west-nava/corbalt)
- Once you have completed one and two, sign off with your name and tag the archive as active or archive

(e.g. [David Goeke](#) ACTIVE ARCHIVE)
