

**Top 10 Section 111 Non-Group Health Plan (NGHP) Reporting Error Codes from July 1 to December 15, 2023**

**Figure 1: NGHP Reporting Error Codes**

**Note:** This chart does not reflect soft edits and only takes into account errors that cause a record to reject.

**Table 1: Error Code Descriptions**

| Code | Description  |
|------|--|
| TN99 | No matching, valid TIN Reference File Detail Record was found for the TIN/Office Code combination on the Claim Input File Detail Record. |
| CI05 | Invalid Diagnosis Code 1.  |
| SP49 | No previously accepted record can be matched to the submitted delete. Delete failed.   |
| CP11 | Invalid dollar amount of limit on no-fault insurance.  |
| CJ04 | Invalid Total Payment Obligation to the Claimant (TPOC) amount.  |
| CI31 | Invalid ICD Indicator value.   |
| CI06 | Invalid Diagnosis Code 2.  |
| CJ07 | Invalid TPOC Threshold - ORM Indicator = "N" and the cumulative total of all submitted TPOC Amounts is zero.                             |
| CJ03 | Invalid TPOC Date 1 or invalid format of TPOC Date 1.  |
| CJ04 | Invalid TPOC amount or invalid format of the TPOC amount.  |

**Note:** Full details on all error codes and tips on how to resolve them can be found in the [NGHP User Guide](#) on CMS.gov.
