

CMS Center for Consumer Information & Insurance Oversight (CCIIO), State-based Exchange Public Use Files (SBE PUF) Data Dictionary for Service Area PUF

1. Overview of the Service Area PUF

The Centers for Medicare & Medicaid Services (CMS) Center for Consumer Information and Insurance Oversight (CCIIO) is releasing the State-Based Exchange (SBE) PUF in order to improve the transparency and increase access to the SBE data. The SBE PUF includes data on Qualified Health Plans (QHPs) and Stand-alone Dental Plans (SADPs) offered in states which operate their own Marketplaces that do not rely on the federal information technology platform for QHP eligibility and enrollment functionality. This includes states which operate their own Small Business Health Options Programs (SHOP).

The Service Area PUF (SA-PUF) is one of the six files that make up the SBE PUF. The SA-PUF contains issuer level data on the geographic coverage or service area (i.e., where the plan is offered) including state, county, and zip code. These data originate from the Service Area template (i.e., template field), an Excel-based form used by issuers to describe their plans in the QHP/SADP application process, and were provided by the National Association of Insurance Commissioners (NAIC) by extracting the information from their System for Electronic Rate and Form Filing (SERFF).

This data dictionary describes the variables contained in the SA-PUF file for each SBE. Each record relates to a set of rules for the application of rates for one plan. The SA-PUF is available for SBEs for plan year 2019.
