### State-based Exchange Public Use Files (SBE PUF) Data Dictionary for PY 2023 Network PUF

#### Overview of PY 2023 Network PUF

CMS CCIIO is releasing the State-based Exchange (SBE) PUF to improve the transparency and increase access to the SBE data. The SBE PUF includes Qualified Health Plans (QHPs) and stand-alone dental plans (SADPs) offered in states which operate their own Marketplaces that do not rely on the Federal information technology platform for QHP eligibility and enrollment functionality. This includes states which operate their own Small Business Health Options Programs (SHOP).

The Network PUF (Ntwrk-PUF) is one of the six files that make up the SBE PUF. The Ntwrk-PUF contains issuer level data identifying each provider network. These data originate from the Network ID template (i.e., template field), an Excel-based form used by issuers to describe their plans in the QHP/SADP application process and were provided by the National Association of Insurance Commissioners (NAIC) by extracting the information from their System for Electronic Rate and Form Filing (SERFF).

This data dictionary describes the variables contained in the Ntwrk-PUF for each SBE. Each record relates to one issuer's provider network. The Ntwrk-PUF is available for SBEs for plan year (PY) 2023.
