

Minimum Data Set (MDS) 3.0 Resident Assessment Instrument (RAI) Version 1.18.11 *Implementation Action Plan*

Action planning helps you focus your ideas into steps to accomplish your goal(s). This worksheet will help you document the processes needed to inform and educate others at your facility about the new guidance, which will be effective starting October 1, 2023. Following each presentation in Part 1 and 2 of the training program, spend a few minutes planning your next steps.

As you think about your action items, consider the potential impact of each new or revised data element on your facility's:

- Policies.
- Processes/procedures.
- Tools (paper or electronic).
- People:
 - Who will be impacted?
 - What will they need to do differently?
 - Will the changes require training and efforts to build new skills?
 - What kind of proactive communication might be required to ensure those impacted understand the rationale for the change and how they will be supported?
 - What processes will your organization use to facilitate any required change? Do any feedback mechanisms need to be put in place?
 - What role might organizational leaders play in supporting the change?
- Reporting requirements (both internal and external).
