

CY 2022 Proposed Rule Hospital Outpatient PPS Cancer Hospital Payment Adjustment File

This file contains provider-level data used to determine the target payment-to-cost ratio (PCR) for the CY 2022 proposed rule cancer hospital adjustment using cost reports from the April 2021 OPSF. These data are from hospital cost report extracts predominately from fiscal years 2018 and 2019. Based on these data, a target PCR of 0.87 would be used to determine the CY 2022 cancer hospital payment adjustment. Therefore, the payment amount associated with the cancer hospital adjustment to be determined at cost report settlement would be the additional payment needed to result in a PCR equal to 0.87 for each cancer hospital.

Proposed Rule CY 2022 Hospital Outpatient PPS  
Cancer Hospital Payment Adjustment File

Column	Title	Description
A	Provider Number	Six character provider number. In general, the first two digits identify the State.
B	Cost Report FY Begin	Beginning date of the hospital cost report used in the analysis.
C	Cost Report FY End	Ending date of the hospital cost report used in the analysis.
D	Medical and Other Services Costs	Total hospital costs for OPPS services as reported on the cost report.
