

MAXPOINT® (CPT 1025T) - Request for New APC Assignment

August 24, 2026

Goal of Today's Meeting

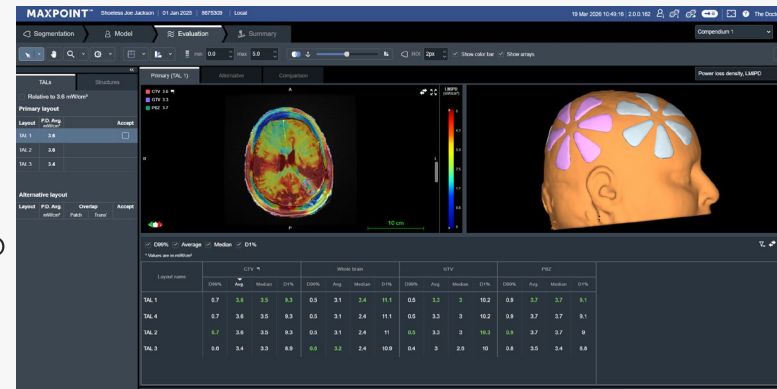

- We request that CMS change the existing APC category for MAXPOINT to APC 5613 (Level 3 Therapeutic Radiation Treatment Preparation)
- Currently, MAXPOINT (1025T) is assigned to APC 5611 (Level 1 Therapeutic Radiation Treatment Preparation)

***Suggested
option to
CMS:***

- Reassign MAXPOINT (CPT 1025T) to APC category 5613

What is MAXPOINT®

- Advanced treatment planning software for TTFields in glioblastoma
- Patient-specific optimization using brain MRI and supporting imaging data
- Enables precision array placement for Optune Gio®
- Supports physician decision-making
- Coding gap existed; CPT 1025T became effective 1/1/2026

Existing APC Category Does Not Capture Computational Output Generated by MAXPOINT

- **APC 5611 represents Level 1 Therapeutic Radiation Treatment Preparation. CPT codes under this category are basic and fast treatment preparation codes. No advanced computer modeling is required.**

MAXPOINT is different from other CPT codes in this APC category. MAXPOINT is a finite element analysis (FEA) software that uses imaging scans to generate a 3-Dimensional (3D) model to perform analytical computation to help with determining electrode array placement for Novocure's Optune Gio therapy device.

MAXPOINT Algorithm and Computational Requirements are Similar to 3D Visualization

- MAXPOINT takes MRI/CT imaging to generate a 3D image of the patient
- Physician manually segments the tumor area to separate it from the rest of the region
- After running the model, 3 options for array placement are offered for the physician to choose from

Similar in features and resources to CPT 77295 *3-Dimensional Radiotherapy Plan, Including Dose-Volume Histograms*

- **Uses 3D modeling to map the tumor and calculate dose distribution**
- **Generates isodose points to determine optimal placement points**
- **Complex computational analysis that requires multi-core computing to produce results**

In Closing

- We request that CMS change the existing APC category for MAXPOINT to APC 5613 (Level 3 Therapeutic Radiation Treatment Preparation)
- Currently, MAXPOINT (1025T) is assigned to APC 5611 (Level 1 Therapeutic Radiation Treatment Preparation)

***Suggested
option to
CMS:***

- Reassign MAXPOINT (CPT 1025T) to APC category 5613
