Instructions

These instructions provide guidance on how to complete each section of this reporting template. A data dictionary, including official definitions for terms included in this form, is included at the end.

Data confirmations

This section asks you to confirm that the data you are submitting are consistent with reporting requirements.

Child data

You should report:

- a) The number of children for whom applications were submitted in the current reporting month
- b) The number of children verified as newly enrolled or renewed in the current reporting month, according to the data definitions provided below

If you *can* identify which children were already covered by Medicaid or CHIP when you provided substantial interactive assistance, data should be entered in columns 1, 2, 6, and 7; column 3 and 8 will calculate automatically. Only if you *cannot* identify which children were already covered, should you enter data in columns 3 and 8 and leave columns 1, 2, 6, and 7 blank. Similarly, if you *can* identify which children were targeted children, data should be entered in columns 4, 5, 9, and 10; if not, columns 4, 5, 9, and 10 should be left blank.

In the first months of the grant when no enrollments or renewals have been verified, and/ or when no applications are completed during the current reporting month, you should enter a zero in the relevant columns.

Parent data

This section is similar to the *Child data* section. You are only required to complete this section if your grant application included goals for enrolling or renewing parents. Still, you may choose to enter data in this section if you collect data consistent with the data definitions below.

Pregnant individuals data

This section is similar to the *Child data* section. You are only required to complete this section if your grant application included goals for enrolling pregnant individuals. Still, you may choose to enter data in this section if you collect data consistent with the data definitions below.

Main activities

This section allows you to provide narrative updates on your activities during the reporting month, and to report any areas in which you would like help that CMS may be able to provide. Each table cell is limited to 1,000 characters; you are encouraged to be more concise than this, as these tables are only intended as a starting point for monthly conversations with your CMS project officer.
