

Appendix A1:

Data Collected for the Office of Minority. The below section allows the provider to input minority health information.

Provider Interface - Data Collection

Screen shot of the Individual Provider Profile page when it is first initiated

The screenshot displays a web form titled "Provider Profile". It includes a note: "Note: Fields with a green icon will NOT be publicly available". The form is divided into two main sections:

- Provider Name Information:** This section contains two identical sets of input fields. Each set includes a "Prefix" dropdown, a "First" text field, a "Middle" text field, a "Last" text field, and a "Suffix" dropdown. Below these are fields for "Credential(s) (MD, DO, etc.)" and "Other Name(s) (Appellation)".
- Other Identifying Information:** This section includes:
 - "Date of Birth" (with a green icon), "DOB Type" (with a green icon), and "Tax Identification Number/TIN" (with a green icon).
 - "State of Birth (US)" (with a green icon) and "Country of Birth" (with a green icon).
 - "Gender" with radio buttons for Male and Female.
 - "Is a Practitioner in Your Program?" with radio buttons for Yes and No.
 - "Ethnicity" (with a green icon) section containing a list of checkboxes: "Hispanic or Latino", "Black or African American", "American Indian or Alaska Native", "Asian", and "Native Hawaiian or other Pacific Islander".
 - "Primary Language Spoken" (with a green icon) dropdown menu with options: English, Arabic, Urdu, American Tagalog, Bengali, Hindi, and Vietnamese.
 - "Secondary Language(s) Spoken" (with a green icon) dropdown menu with options: English, Arabic, Urdu, American Tagalog, Bengali, Hindi, and Vietnamese.

Data Collected for the Office of Minority. The below section allows the provider to input minority health Ethnicity information.

Provider Interface - Data Collection

Appendix A2:

Data collected for the 21st Century Cures Act, interoperability.

Data collected for 21st Century Cures Act, interoperability.

- Increase Innovation and Competition by giving patients and their health care providers safe and secure access to health information and to new tools, allowing for more choice in care and treatment.
- Reduce Burden and Advance Interoperability through the use of United States Core Data for Interoperability (USCDI) standard, new API requirements, and EHI export capabilities for the purposes of switching health IT or to provide patients their electronic health information.
- Promote Patient Access through a provision requiring that patients can electronically access all of their electronic health information (structured and/or unstructured) at no cost

Endpoint (optional)

* Indicates Required fields.

Endpoints provide a simple, secure, scalable, and standards-based way for participants to send authenticated, encrypted health information directly to known, trusted recipients over the Internet. Endpoint Information will be made available on the [NPI Registry](#), [API](#), and [Data Dissemination Files](#) for users to receive and consume.
