### **Late Enrollment Surcharges/Penalties-**

If you aren't eligible for premium-free Part A, and you don't buy it when you're first eligible, your monthly premium may go up 10%. You'll have to pay the higher premium for twice the number of years you could have had Part A, but didn't sign up.

If you don't sign up for Part B when you're first eligible, or if you drop Part B and then get it later, you may have to pay a late enrollment penalty for as long as you have Medicare. Your monthly premium for Part B may go up 10% for each full 12-month period that you could have had Part B, but didn't sign up for it.

If you don't sign up for Part D when you're first eligible, or if you drop Part D and then get it later, you may have to pay a late enrollment penalty for as long as you have Part D. The cost of the late enrollment penalty depends on how long you didn't have creditable prescription drug coverage. The late enrollment penalty is calculated by multiplying 1% of the national base beneficiary premium (\$33.13 in 2015) times the number of full, uncovered months that you were eligible but didn't join a Medicare prescription drug plan and went without other creditable prescription drug coverage. This final amount is rounded to the nearest \$.10 and added to your monthly premium. The national base beneficiary premium may increase each year, so the penalty amount may also increase each year.
