Maximum Fair Price File Field Definitions

IPAY:

The initial price applicability year of the selected drug.

Selected Drug Name:

Drug name(s) or proprietary name(s) on the application/approval; Drugs@FDA or Purple Book.

Active Ingredient Name or Active Moiety Name:

RxNorm Ingredient (IN) name associated with NDCs licensed by BLAs; Active moiety Unique Ingredient Identifier (UNII) mapped through IN UNII for NDCs approved by NDAs/ANDAs

NDC-9:

The first 9-digits of the National Drug Code (Labeler Code segment and Product Code segment) with the two segments separated by a dash.

NDC-11:

The 11-digit National Drug Code (Labeler Code segment, Product Code segment, and Package Size Code segment) with segments separated by dashes.

XREF NDC-11:

An optional field reserved to reference an older NDC-11 to facilitate tracking of situations where an NDC is replaced by another NDC.

MFP Effective Date:

The date which a particular single maximum fair price first applied to the NDC.

MFP End Date:

The date which a particular single maximum fair price last applied to the NDC.

Single MFP per 30 DES:

The single maximum fair price per 30-day equivalent supply (30 DES) of the selected drug.

NDC-9 MFP per Unit Price:

The single maximum fair price applied to the NDC-9 per unit.

NDC-11 MFP per Package Price:

The single maximum fair price applied to the NDC-11 package size.

As of date:

The date the record was added to the file.

Type of Update:

Whether the record was added or updated, or whether the record was not changed from last maximum fair price file update.

Remarks:

An explanation of latest update made to the record.
