1. Introduction

1.1 Purpose

This document describes the file-layout for "File 1 of 2" that will support the Centers for Medicare & Medicaid Services (CMS) annual collection of Healthcare Effectiveness Data and Information Set (HEDIS®¹) patient-level detail quality of care measures received from Medicare Advantage Organizations (MAOs), Cost Plans, and Demonstration Plans.

1.2 Scope

This specification document is intended to assist the participating Plans in understanding File 1 specifications.

- File 1 should be 482 in length.
- Each row should be 482 characters long.
- There are 193 fields in File 1.

The following changes were made to the HEDIS Measurement Year (MY) 2025 Patient Level Detail Data File 1 of 2. For a more detailed explanation of changes to the HEDIS MY 2025 Patient Level Detail Data File Specifications, participating Plans can refer to the 'HEDIS_MY_2024_to_2025_Patient-Level_Data_File_Specifications_Crosswalk'.

1.2.1 Removed Measures

The following measures were removed from the HEDIS MY 2025 PLD Data File, File 1 of 2:

- Antidepressant Medication Management (AMM)
- Acute Hospital Utilization (AHU)
- Emergency Department Utilization (EDU)
- Follow-Up After Emergency Department Visit for Substance Use (FUA)
- Use of Opioids at High Dosage (HDO)
- Use of Opioids from Multiple Providers (UOP)
- Adherence to Antipsychotic Medications for Individuals with Schizophrenia (SAA)
- Pharmacotherapy for Opioid Use Disorder (POD)
- Social Need Screening and Intervention (SNS-E)

1.2.2 Changes to Existing Measures

The following measures were revised in the HEDIS MY 2025 PLD Data File, File 1 of 2:

- Updated the specification for the "Last Name", "First Name" and "City" fields. Double quotes are no longer allowed in these fields.
- Breast Cancer Screening (BCS-E) measure:
 - Updated to include 42-51 years age band stratifications.
 - Added 52-74 years age band stratifications.

¹ HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA)

- Adult Immunization Status (AIS-E) measure:
 - Updated age band stratification from 19-65 years to 19-64 years and 66+ years to 65+ years for the Td/Tdap and Influenza indicators.
 - Updated age band stratification from 50-65 years to 50-64 years and 66+ years to 65+ years for the Zoster indicator.
 - Updated age band stratification from 66+ years to 65+ years for the Pneumococcal indicator.
 - Added new Hepatitis B indicator with age band stratifications for 19-30 years and 31-59 years.

1.2.3 New Measures

No new measures were added to the HEDIS MY 2025 PLD Data File, File 1 of 2.

2. Important Technical Elements Regarding HEDIS MY 2025 Patient- Level Detail Data Submissions

2.1 Patient-Level and Summary-Level Data Must Match

The patient-level data must match the summary-level data for each measure. The patient-level data should contain all beneficiaries enrolled in the Contract during the measurement period for the summary measures. The patient-level data should be calculated following the same measure specifications as the summary-level data. To ensure an exact match, make a copy or “freeze” the database when the measures are calculated. If the measure was calculated using the hybrid method, the patient-level data should be reported on the minimum required sample size, including additional records, if an “over-sample” method was used, or the total denominator population, or if the sample was smaller than the minimum required sample size. Reporting patient-level data should encompass only the members included in the timeframes used in summary measures submitted by your plan. The HEDIS specifications regarding timeframes should be strictly followed for each measure and should in no instance include experience from 2026.

2.2 Inclusion of Contract Number

There should be no embedded spaces between the “H” or “R” and the four digits of the contract number.

2.3 Medicare Beneficiary Identifier (MBI) Format

The MBI has 11 characters that are a mix of numbers and upper-case letters. The MBI uses numbers 0-9 and all letters from A to Z, except for S, L, O, I, B, and Z. The MBI’s 2nd, 5th, 8th, and 9th positions will always be a letter, except for S, L, O, I, B, and Z. Positions 1st, 4th, 7th, 10th, and 11th will always be a number. The 3rd and 6th positions will be a letter or a number. MBIs does not have spaces and dashes. The first position in the MBI will be a numeric value 1 through 9 only. The MBIs should not start with a “0”.

Table 1: MBI Format

Position	1	2	3	4	5	6	7	8	9	10	11
Type	C	A	AN	N	A	AN	N	A	A	N	N

C – Numeric 1 through 9

N – Numeric 0 through 9

AN – Either A or N

A – Alphabetic Character (A... Z); Excluding (S, L, O, I, B, Z)

Table 2: MBI Examples

Valid MBI	Invalid MBI	Reason for Invalidity
2M30GF8DP56	0M3G0F8DP56	The first character cannot be 0
9G30ME7KT23	9g30me7kt23	All alpha characters should be upper-case
1W56QX2NT63	1W5-6QX-2NT-63	Dashes are present in the MBI
1GF6JX2DT72	1GF6JX2DT72	Embedded spaces in the beginning of the MBI
3VD0H35AT10	3VD0H35AT1	Valid MBIs are 11 characters long

NOTE: For more information regarding the MBIs please follow the link below:

<https://www.cms.gov/Medicare/New-Medicare-Card/Understanding-the-MBI-with-Format.pdf>.

2.4 Use Logical vs. Quantitative Values in Numerators and Denominators

The HEDIS MY 2025 Patient-Level Detail Data File Specifications require logical values for some measures and quantitative values for others. An example of a logical value is found in the Breast Cancer Screening measure. Values of “1” or “0” indicate that the member was either included or not included in the numerator or denominator of the measure. An example of a quantitative value can be found in the Follow-Up After Hospitalization for Mental Illness measure, where the submission will show a numerical value that indicates the number of times the member was included in the numerator or denominator of a measure. Pay special attention to the description of each measure in these instructions to derive a valid, acceptable value. Do not use a quantitative value of “2” in columns where only logical values of “1” and “0” are accepted. Please do not use stars, asterisks, or any other values; they are not acceptable.

2.5 Member Months Values and Value of Zero (0) in Member Months Field

The member month contribution (MMC) is the number of months each Medicare member was enrolled in the contract in 2025. The MMC does not vary by measure and does not apply to the Effectiveness of Care or Risk Adjusted Utilization measures. The MMC pertains to only Utilization measures. Each member should have a member month contribution value between “0” and “12”. Values greater than “12” are not acceptable. The Enrollment by Product Line (ENP) measure should be used to determine member months.

A value of “0” is valid for the member months’ field in the rare instances when a member may have incurred contract services early in January 2025 and may have been included in one or more HEDIS PLD measures, but perhaps dis-enrolled prior to the point at which they met the definition for incurring a member month as defined by the contract.

Some members may have “aged” into the Medicare product from the contract’s commercial product or have dual eligibility with Medicare and Medicaid during the year. In these instances, the contribution to the MMC calculation of a non-Medicare product should not be counted.

2.6 How to Report Rates of “NR, NQ, or BR” “NB,” and “NA” in Patient-Level Submissions

Reported rates of “Not Reported (NR)”, “Not Required (NQ)” and “Biased Rate (BR)” should be recorded in the patient-level file as a “0” in the numerator and denominator field for all members. For Effectiveness of Care measures with multiple numerators (e.g., Cardiac Rehabilitation) that are either “NR, NQ, or BR” or Reportable (R), Plans should report “0” in each “NR, NQ, or BR” measure’s numerator field and record either “0” or “1,” for each numerator assigned an “R.” For such a measure, if at least one of the numerators receives an “R,” members who were included in the eligible population for HEDIS PLD rate calculation should also show a “1” in the associated denominator column.

If the measure rate is “No Benefit (NB)” because the contract does not offer a benefit required for the measure (e.g., pharmacy benefit for Potentially Harmful Drug-Disease Interactions in Older Adults), each member should receive a “0” for both the denominator and numerator(s) of the measure.

If the measure rate is “Not Applicable (NA)” because of an insufficient number of members in the eligible population, those members who were in the eligible population of the measure and those who received the event or service in question should be counted in the denominator and numerator, respectively.

Table 3: Member Designation Reporting

Member Designation	Reported Numerator	Reported Denominator
"NR, NQ and BR"	"0"	"0"
Multiple numerators – Some "NR, NQ and BR" and some "R" with single denominator	"0" for "NR, NQ and BR". "0" or "1" for "R"	"1" for at least 1 "R"
Multiple numerators – some “NR” and some “R” for measures with multiple denominators	“0” for “NR” “0” or “1” for “R”	“0” for “NR” “0” or “1” for “R”
"NB" (Contract doesn't offer benefit required)	"0"	"0"
"NA" (Insufficient number of members)	Number of members who received event/service	Number of members in eligible population

For example, if a contract has 29 members in the eligible population for the Controlling High Blood Pressure (CBP) and 20 members who qualified for inclusion in the numerator, the contract’s Interactive Data Submission System (IDSS) will show “NA” as the reported rate. In its patient-level detail data file, the contract should show a “1” in CBP denominator for each of the 29 eligible members and a “1” in CBP numerator for each of the 20 members whose blood pressure was adequately controlled.

Table 4: Example Contract

Measure	Number of Members per Group	Patient-Level Detail Data File – Members' Data Entries	IDSS Submission – Contract's Data Entry
Eligible Population	29 members	"1" in CBP denominator	"NA"
Qualified for inclusion in numerator	20 members	"1" in CBP numerator	"NA"

2.7 How to Report Data When Using the Hybrid Data Collection Method

When using the Hybrid Method, record “1” in the measure denominator field for the final set of sampled members and record “1” in the measure numerator field for the final set of sampled members who were also in the numerator when the HEDIS PLD measure was calculated.

Table 5: Reporting Hybrid Data

Members	Patient-Level Data File – Members' Data Entries
Final Set of Sampled Members	"1" in denominator
Final Set of Sampled Members Who Recorded a Numerator “Hit” When the HEDIS PLD Measure was Calculated	"1" in numerator

For example, in a sample of 411, members drawn from eligible population for *Glycemic Status Assessment for Patients with Diabetes*, the assessment for 275 members may have been identified through administrative data, 25 through medical record review and 25 through supplemental data. Therefore, all 325 members identified through all methods show “1” in the numerator and the 411 sampled members from the eligible population show “1” in the denominator column. The PLD Data file does not consider how the member was determined to be numerator compliant

3. File 1 Specification

3.1 Header Record

Refer to the HEDIS_MY_2025_Patient_Level_Data_File_1_of_2.

3.2 Detail Record

Refer to the HEDIS_MY_2025_Patient_Level_Data_File_1_of_2.

4. Technical Support

For technical support regarding this document, contact the HEDIS PLD Help Desk by phone or by email.

HEDIS PLD Help Desk contact details are below:

Email: HEDISPLD_Helpdesk@cms.hhs.gov

Phone: 1-833-760-2116

Hours of Operation:

- March 2, 2026 – June 12, 2026,
M-F 9:00 AM to 5:00 PM ET
- June 15, 2026 – Last Day of the MY 2025 Annual Submission
9:00 AM to 9:00 PM ET
- May 25, 2026 – Closed for the Memorial Day Holiday

Participating Plan users may also contact the HEDIS PLD Help Desk by signing into the HEDIS PLD web-portal and submit a Technical Assistance Request (TAR).
