

## **HPMS E-Mail**

**Date:** February 27, 2014

**Subject:** Preliminary ICD-10-CM Codes for CMS-HCC and RxHCC Models

### **Message:**

Beginning October 1, 2014, the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) will replace the ICD-9 code sets used to report medical diagnoses and inpatient procedures. In preparation for this change, CMS has released preliminary mappings of ICD-10 codes to the hierarchical condition categories (HCCs) used in the risk adjustment models used to pay Medicare Advantage (MA) organizations, PACE organizations, and Part D sponsors. The mappings can be found at:

<https://www.cms.gov/Medicare/Health-Plans/MedicareAdvtgSpecRateStats/Risk-Adjustors-Items/Risk2015.html>

After the fiscal year 2015 ICD-10 codes become available, CMS will release updated mappings.

Questions related to these ICD-10 to HCC mappings should be sent to [riskadjustment@cms.hhs.gov](mailto:riskadjustment@cms.hhs.gov) with a subject header of "ICD-10 to HCC mappings."
