

# Medicare Parts B/D Coverage Issues

For discussion purposes only – subject to change

This table provides a reference guide for the most frequent B/D coverage determination scenarios facing Part D plans and Part D pharmacy providers. It does not address all potential situations. For more extensive discussion, please refer to the Medicare Part B vs. Part D Coverage Issues document available at:

[http://www.cms.hhs.gov/PrescriptionDrugCovGenIn/Downloads/PartBandPartDdoc\\_07.27.05.pdf](http://www.cms.hhs.gov/PrescriptionDrugCovGenIn/Downloads/PartBandPartDdoc_07.27.05.pdf)

Part B Coverage Categories	Part B Coverage Description	Retail and Home Infusion Pharmacy Setting B/D Coverage	LTC Pharmacy Setting B/D Coverage	Comments	Written Prescription Indicators to Highlight B/D Coverage
Durable Medical Equipment (DME) Supply Drugs <b>NOTE: Only available for beneficiaries residing in their “home”<sup>1</sup></b>	Drugs that require administration via covered DME (e.g. nebulizer drugs, drugs “requiring” a pump for infusion, and insulin via infusion pump) <sup>2</sup>	<b>Part B</b>	<b>Part D</b> Because most LTC facilities are not considered a beneficiary’s “home” <sup>3</sup>		<b>Part B:</b> “To be administered in the home setting with DME (i.e., nebulizer or infusion pump)” <b>Part D:</b> “To be administered in a LTC facility” <sup>4</sup>

<sup>1</sup> In addition to a hospital, a SNF or a distinct part SNF, the following facility or distinct parts of facilities cannot be considered a home for purposes of receiving the Medicare Part B DME benefit:

- A nursing home that is dually-certified as both a Medicare SNF and a Medicaid nursing facility (NF)
- A Medicaid-only NF that primarily furnishes skilled care;
- A non-participating nursing home (i.e. neither Medicare nor Medicaid) that provides primarily skilled care; and
- A distinct part of a facility that primarily furnishes skilled care.

<sup>2</sup>The DMERCs do a medically necessity determination with regard to whether a nebulizer or infusion pump is medically necessary for a specific drug/condition.

<sup>3</sup> If a facility does not meet the criteria in footnote 1, it would be considered a home, and Part B could cover the drugs.

<sup>4</sup> Prescriptions for inhalation drugs to be used with a non-covered nebulizer or a hand held insufflator would also be covered under Part D.

Part B Coverage Categories	Part B Coverage Description	Retail and Home Infusion Pharmacy Setting B/D Coverage	LTC Pharmacy Setting B/D Coverage	Comments	Written Prescription Indicators to Highlight B/D Coverage
Drugs furnished “incident to” a physician service	Injectable/ Intravenous drugs 1) administered “incident to” a physician service <u>and</u> 2) considered by Part B carrier as “not usually self-administered”.	<b>Part D</b> Because by definition a pharmacy cannot provide a drug “incident to” a physician’s service (Only a physician office, or where applicable a CAP vendor, would bill Part B for “incident to” drugs).	<b>Part D</b> Because by definition a pharmacy cannot provide a drug “incident to” a physician’s service (Only a physician office, or where applicable a CAP vendor, would bill Part B for “incident to” drugs). <sup>5</sup>	Part D plans should not implement pharmacy edits to determine B vs. D coverage for injectable/IV drugs only covered under Part B when furnished “incident to” a physician service.	
Immunosuppressant Drugs	Drugs used in immunosuppressive therapy for beneficiaries that received transplant from Medicare approved facility and were entitled to Medicare Part A at time of transplant (i.e. “Medicare Covered Transplant”).	<b>B or D:</b> <b>Part B</b> for Medicare Covered Transplant  <b>Part D</b> for all other situations	<b>B or D:</b> <b>Part B</b> for Medicare Covered Transplant  <b>Part D</b> for all other situations	Participating Part B pharmacies must bill the DMERC in their region when these drugs are covered under Part B.	<b>Part B:</b> “ <i>For Medicare-covered transplant</i> ” <b>Part D:</b> “ <i>For rheumatoid arthritis (or other non-transplant use)</i> ” or “ <i>Not for Medicare-covered transplant</i> ”

<sup>5</sup> For a LTC resident, if a physician furnishes the drug from the physician’s own stock, administers or directly supervises the administration of the drug, and bills for the drug, then the drug would be considered “incident to” and covered under Part B

Oral Anti-Cancer Drugs	Oral drugs used for cancer treatment that contain same active ingredient (or pro-drug) as injectable dosage forms that would be covered as 1) not usually self administered and 2) provided incident to a physician's service	<b><u>B or D:</u></b> <b>Part B</b> for cancer treatment  <b>Part D</b> for all other indications	<b><u>B or D:</u></b> <b>Part B</b> for cancer treatment  <b>Part D</b> for all other indications	Participating Part B pharmacies must bill the DMERC in their region when these drugs are covered under Part B.	<b>Part B:</b> <i>"For the treatment of _____ cancer"</i> <b>Part D:</b> <i>"For rheumatoid arthritis (or other non-cancer use)" or "Not for the treatment of cancer"</i>
Oral Anti-emetic Drugs	Oral anti-emetic drugs used as full therapeutic replacement for IV anti-emetic drugs within 48 hrs of chemo	<b><u>B or D:</u></b> <b>Part B</b> within 48 hrs of chemo  <b>Part D</b> all other situations	<b><u>B or D:</u></b> <b>Part B</b> within 48 hrs of chemo  <b>Part D</b> all other situations	Participating Part B pharmacies must bill the DMERC in their region when these drugs are covered under Part B.	<b>Part B:</b> <i>"To be used within 48 hours of chemotherapy"</i> <sup>6</sup> <b>Part D:</b> <i>"To be used beyond 48 hours of chemotherapy" or "For _____ (any non-chemotherapy-associated use)"</i> <sup>7</sup>

<sup>6</sup> *"To be used within 24 hours of chemotherapy"* for granisetron and dolasetron.

<sup>7</sup> Consider separate prescriptions for chemotherapy-related anti-emetics if administration will exceed Part B coverage limits

## Appendix A.

### Examples of Drugs that may Require an External Infusion Pump for Administration

ACYCLOVIR  
AMPHOTERICIN B  
BLEOMYCIN  
CLADRIBINE  
CYTARABINE  
DEFEROXAMINE MESYLATE  
DOBUTAMINE  
DOPAMINE  
DOXORUBICIN  
EPOPROSTENOL  
FENTANYL  
FLOXURIDINE  
FLUOROURACIL  
FOSCARNET  
GALLIUM NITRATE  
GANCICLOVIR  
HYDROMORPHONE  
INSULIN  
MEPERIDINE  
MILRINONE  
TREPROSTINIL  
VINBLASTINE  
ZICONOTIDE
