

## Model Part D Exception and Prior Authorization Request Form (“Trigger Form”) for Prescribing Physicians

A model exception and prior authorization request form developed specifically for use by prescribing physicians has been posted to the CMS.gov website, on the Provider Center page under “Part D Tools for Health Care Professionals.”

<http://www.cms.hhs.gov/center/provider.asp>

CMS considers use of this model form a “best practice” and expects widespread adoption of it by the Part D plans and physicians. To ensure access to the form, plans must post the form on their appeals and exceptions websites.

The form was developed collaboratively by an AMA workgroup representing several professional associations, America’s Health Insurance Plans (AHIP), Part D plan sponsors, and beneficiary advocates.
