

How to read NDC EDIT CORRECTIONS excel document.

1. Column A- contains 11 digit NDCs that required a Prescription Drug Event (PDE) edit change affecting PDEs submitted for Dates of Service (DOS) in Contract Year 2006 (CY 06) and Contract Year 2007 (CY 07).
2. Column B- contains drug name, brand and or generic, associated with the NDC listed in Column A.
3. Column C – identifies the incorrect PDE NDC edit or Coverage Status associated with that specific NDC in CY 2006.
4. Column D – identifies the Correct PDE edit or coverage status associated with that specific NDC for PDEs submitted for dates of service in contract year 2006.
5. Column E – identifies the effective date of the correction specified in Column D. The majority of contract year 2006 NDC edit corrections are retro-active to 1.1.06. Please be aware, however, that some NDCs may not have appeared in Medispan or First Data bank until later in 2006 and subsequently, would have an effective date other than 1.1.06.
6. Column F- identifies NDCs that were overridden to covered status in 2006 and have since changed PDE edit or coverage status for dates of service effective January 1, 2007. These edit corrections were made because the drugs are excluded (DESI 5-6).
7. Column G - – identifies the effective date of the correction specified in Column F.
