**SUBJECT:** Upcoming Complaints Tracking Module (CTM) Enhancements

On June 22, 2012, the Centers for Medicare & Medicaid Services (CMS) will implement some important enhancements to the Health Plan Management System (HPMS) CTM. The enhancements are as follows:

New Fields

- New fields for the first name and last name of a Congressional Staffer will become available when “Congressperson Other Complainant Type” is selected.
- A new section will appear in the Complaint History tab entitled “RPC History,” which will display all changes to the Retroactive Processing Contractor (RPC) related dates and RPC referral flag.
- The number of days that a complaint has been opened will display on the “My Open Complaints” page.
- The number of days open or “Resolution Date” will display on the CTM Dashboard and the Search Results pages near the status column.
- A new column on the “My Open Complaints” page will identify when a plan user enters notes or uploads a document.

Functional Changes

- When using the document upload feature, the user will no longer be required to re-upload a file in cases where the user fails to enter a required field.
- Congressional complaints will be defined as those complaints that have Congressperson as the “Complainant Type Other” or the value of Yes in the “Press/Hill Interest” field.

- The CMS caseworker or plan user who originally closed a complaint will no longer change if a different user edits data in a closed complaint.

#### Formatting Changes

- The “Limit Congress members by State” field will reside above the “Select Congress Person” field.
- When a complaint is printed to PDF, the CTM footer will include the current date and time stamp.

The CTM User’s Manual will be updated accordingly.
