

## HPMS E-Mail

**Date:** January 07, 2022

**Subject:** COVID-19 Oral Antiviral Therapeutic Locator List Posted in HPMS

In the November 23, 2021 memo “Permissible Flexibilities Related to Oral Antiviral Drugs for Treatment of COVID-19 that May Receive U.S. FDA Emergency Use Authorization and are Procured by the U.S. Government,” CMS informed Part D sponsors that a list of pharmacies with provider agreements to dispense U.S. Government-procured oral antivirals for COVID-19 available under a U.S. Food and Drug Administration (FDA) Emergency Use Authorization (EUA) would be made available in HPMS.

The Therapeutic Locator list is now posted in the “Announcements” section of the HPMS home page at <https://hpms.cms.gov>. The list only includes those participating pharmacies that have supplied their NPI, not all participating pharmacies. CMS will update the list as more complete information becomes available to us. Additional information on participating pharmacies may be available from state or local health departments.

For billing-related guidance, Part D sponsors should refer to the National Council for Prescription Drug Programs (NCPDP) Emergency Preparedness Guidance on “Billing of a Self-Administered Free COVID-19 Oral Antiviral During an Emergency” (December 23, 2021 email update to section 11.15 “Billing of a Self-Administered Free Product During an Emergency” in version 1.12 of the guidance document).

Email [PartDPolicy@cms.hhs.gov](mailto:PartDPolicy@cms.hhs.gov) with CMS policy-related questions. PDE-related questions should be sent to [pdejan2011@cms.hhs.gov](mailto:pdejan2011@cms.hhs.gov).
