Subject: Release of the Insulin and Vaccine Footnotes on MPF

In the September 26, 2022 memo entitled “Contract Year 2023 Program Guidance Related to Inflation Reduction Act Changes to Part D Coverage of Vaccines and Insulin,” CMS stated that insulin and vaccine footnotes and other help features would be implemented in the CY 2023 Medicare Plan Finder (MPF) on October 1, 2022.

Please see the **corrected** schedule below:

- Release of the vaccine footnote - October 1, 2022
- Release of the insulin footnote - October 15, 2022
- Release of other help features - October 15, 2022

We apologize for the confusion.
