SUBJECT: Long-Term Institutionalized Resident Report

The third 2022 Long-Term Institutionalized (LTI) Resident Report will be distributed to Part D sponsors at the contract-level on September 8, 2022. Your organization will only receive a report if you have enrollees identified as LTI residents. This report will be distributed to each Part D sponsor through the secure CMS Enterprise File Transfer (EFT) process. The report can be retrieved using your existing Gentran or Connect:Direct service. If your organization utilizes the services of a third party vendor for Gentran or Connect:Direct access, please notify them that you may be receiving this report.

The LTI Resident Report lists Part D beneficiaries who were:

1. Enrolled in your organization, based on Common Medicare Environment (CME) data, and not deceased, as of September 6, 2022.
2. Identified as an LTI resident if they were resident in a nursing home or skilled nursing facility for at least 90 consecutive days based on Minimum Data Set (MDS) assessment data from March 1, 2022, to July 31, 2022. The assessment data may span prior and current contract(s) of enrollment during this period.

The report also includes a Prospective Payment System (PPS) Indicator that identifies the long-term nursing home residents whose last reported resident MDS assessment between March 1, 2022 and July 31, 2022 was a Medicare PPS assessment. The presence of the PPS indicator denotes that at least a portion of the admission either before or between these dates was part of a Medicare Part A stay.

The layout specifications of the file are shown in Appendix A. Appendix B contains a description of best practices related to sponsor's use of this LTI Resident Report.

If you have any questions concerning this memorandum, please send an e-mail to PartCandDStarRatings@cms.hhs.gov. Include "LTI Resident Report" in the subject line.

APPENDIX B: Best Practices Related to Use of the LTI Resident Report

Identification of Institutionalized Enrollees and Follow-up Facility Contact

The LTI Resident Report can assist sponsors in identifying the facilities in which their institutionalized enrollees reside to ensure that network pharmacies are available to serve these beneficiaries. For newly enrolling beneficiaries, long-term care (LTC) facility information, if provided on the enrollment application, can enable sponsors to contact facilities to determine the availability of network pharmacies to serve new enrollees. For enrollees who are institutionalized during the coverage year, sponsors should have procedures in place to receive notification of institutionalization and identification of the facility to determine the availability of a network pharmacy.

In all these situations, if a network pharmacy is not available to serve the sponsor's institutionalized enrollees, the Part D sponsor should contract with the facility's contracted LTC pharmacy. If that pharmacy will not sign a contract, the Part D sponsor should contract with another LTC pharmacy that can serve the facility. In some cases, a retroactive contract may be necessary.

Part D versus Part A payment for LTC drugs

The report may also be used by sponsors for retrospective reviews of paid claims to identify claims that should have been billed under Part A, thus permitting sponsors to recover inappropriate Part D payments and work with LTC providers to ensure future compliance.

Part D Medication Therapy Management (MTM) Programs

This report can help sponsors identify which beneficiaries who are eligible for their MTM program are in LTC settings to better coordinate care, offer MTM services, and improve reporting of LTC status per the Part D reporting requirements.
