Subject: CY 2024 Bid-Related Updates in HPMS - 4/18/2023

CMS released the following bid-related updates on Tuesday, April 18:

Plan Benefit Package:

- JSON variable "selPosNonMedMaxPlanBen" in the Plan Level Cost Share section was an array when it should have been a string.
- Plans that offer standard/preferred retail or standard/preferred mail order pharmacy network will have the option to select either the preferred or standard retail copayment for Long-Term Care and Out-of-Network Insulin tiers. Previously, the PBP was defaulting to the standard retail copayment for these fields.
- The Rx tiers section of the PBP was not populating correctly for 2023 Institutional SNP plans.
- For copied plans, the data in section 4c was not being reflected on the data report.
