

## HPMS E-Mail

**Date:** February 17, 2023

**Subject:** CMS-HCC Risk Adjustment Model Software Release

On February 1, 2023, CMS published the [2024 Advance Notice](https://www.cms.gov/files/document/2024-advance-notice.pdf) (<https://www.cms.gov/files/document/2024-advance-notice.pdf>), which discusses the proposed Part C risk adjustment model for payment year 2024. On Friday, February 3, 2023, CMS posted estimated 2021 plan-level risk scores on HPMS to support your evaluation of the proposed revisions to the CMS-HCC model in the 2024 Advance Notice.

This email serves to notify plans that CMS has posted risk adjustment model software for the CMS-HCC risk adjustment model proposed for 2024 (V28) on the [CMS risk adjustment webpage](https://www.cms.gov/Medicare/Health-Plans/MedicareAdvtgSpecRateStats/Risk-Adjustors-Items/RiskOtherModel-Related) (<https://www.cms.gov/Medicare/Health-Plans/MedicareAdvtgSpecRateStats/Risk-Adjustors-Items/RiskOtherModel-Related>) like we have in previous years. The information used in the software is from the risk adjustment model relative factor tables published in the 2024 Advance Notice and the diagnosis-to-HCC mappings posted on the CMS risk adjustment webpage. CMS used this software to produce the plan-level risk scores provided to Medicare Advantage Organizations through HPMS.
