Subject: CY 2024 Bid-Related Updates in HPMS - 5/18/2023

Since the start of this process, CMS has communicated all reported issues to all organizations, including isolated cases impacting a single user. As we approach the bid submission deadline, we will limit our broadcast messages to issues with the potential to impact numerous organizations.

Note: As has been standard practice, CMS will continue to communicate directly with each individual reporting an issue on its status and resolution.

CMS released the following bid-related updates on Thursday, May 18:

- Addressed status issues in the Benefit Details UI.
- Updated API validations for service categories 1a and 1b.

Please report suspected defects via the following web form:
